Regional Labor Market Dynamics, Housing, and Migration Kari Hämäläinen, Petri Bockerman, 2004 This study explores the impact of plant level labor market dynamics and housing markets on gross migration flows The internal and the external reorganizations of regional labor markets are shown to be related An increase in internal turnover of jobs and workers in regional labor markets is found to increase net migration This effect arises mainly from a reduction in out migration Housing markets constitute constraints for migration In particular an increase in regional housing prices and a large share of owner occupancy housing discourages net migration to a region by reducing in migration In contrast the out migration rate remains largely unaffected by housing markets

Institutions and Regional Labour Markets in Europe Lambert van der Laan, Santos M. Ruesga, 2019-05-23 First published in 1998 this volume examines the performance of labour markets against the background of different economic and institutional settings in Western and Eastern Europe The book gives a clear picture of the mosaic of impressive transformations presently taking place in Western and Eastern European labour markets and

provides access to information which was previously either widely dispersed or non-existent. The book gives detailed information about how countries and regions deal with transformations described. The substantive country-wide and regional diversity that is discussed allows the reader to understand the role of labour and institutions in the development of countries and regions. The book is written by labour market and regional experts from the various countries concerned. Search and Matching in the Housing and Labour Markets Gaetano Lisi, 2025-08-25. This book explores the dynamic relationship between housing tenure, employment status and market outcomes through the lens of search and matching models. By focusing on search and matching as core features of the housing market trading process, it introduces a modern economic framework for analyzing housing markets. Key topics include: The role of search markets in shaping housing prices; Interactions between rental and sale prices of homes; Connections between homeownership and unemployment; The impact of housing needs on labor market policies. Designed for scholars and students of housing and labor economics, this book serves as both a comprehensive resource for researchers and a textbook for courses examining the interplay between housing tenure and labor market dynamics. *Spatial Dependence and Heterogeneity in Empirical Analyses of Regional Labour Market Dynamics* Norbert Schanne, 2015-06-23. Warum sollen Regionen innerhalb eines Landes unabhängige Inseln sein? Und warum sollen über das gesamte Land hinweg einheitlich starke ökonomische oder soziale Wirkungszusammenhänge bestehen? Diese zwei Annahmen werden in der angewandten empirischen Wirtschafts- und Sozialforschung üblicherweise implizit unterstellt. Wie in statistischen Verfahren von dieser unrealistischen Modellstruktur unter Ausnutzung der räumlichen Strukturen in beobachteten Variablen und unterstellten Zusammenhängen abgewichen werden kann, diskutiert Norbert Schanne im vorliegenden Band. Möglichkeiten unser Verständnis der Ökonomie zu vertiefen werden ebenso verdeutlicht wie Chancen und Risiken beim Einsatz der Methoden in Studien zu verschiedenen Aspekten der Arbeitsmarktdynamik. *Compensation of Regional Unemployment in Housing Markets* Jos van Ommeren, 2005. The Impacts of Automotive Plant Closure Andrew Beer, Holli Evans, 2013-09-13. Economic restructuring has been a notable feature of so-called mature industrial economies such as the UK and Australia in the last two decades, with deregulation, privatisation, technological change and globalisation combining to reshape such economies. Some industries have grown while others have declined. Moreover, while overall employment in the UK and Australia has grown, many newly created positions require skills not found in the industries shedding labour or are in casualised and low-paid occupations. Many lesser-skilled workers leaving declining industries are therefore at risk of long-term unemployment or leaving the workforce entirely. Both mental and physical health can be affected after redundancy. It is therefore crucial that the measures put in place in many domains of social policy, such as formal health policy, employment assistance, community development, housing assistance, and so on, adequately address the difficulties confronting this group. This volume takes a closer look at the impact of manufacturing, notably automotive plant closures in the UK, Birmingham and Australia, Adelaide, in recent years, and policy responses to those closures. It attempts to

tease out differences in policy response and effectiveness and attempts to identify areas where policy could be made to work better in terms of adjusting to large scale manufacturing change and resulting job losses In so doing it begins for the first time we believe to take a comparative approach to understanding the impact of plant closures and policy responses This book was published as a special issue of Policy Studies Revival of a City Jason Begley,Tom Donnelly,David Jarvis,Paul Sissons,2019-07-26 In 2021 Coventry celebrates being the national City of Culture Modern Coventry is a product of successive rounds of industrial economic and social developments driven by regional national and global forces This book presents a timely opportunity to reflect on this rich and often misunderstood history The book examines the development of industry services infrastructure and social transformation and the role which globalising forces have played in influencing these particularly since the 1950s It looks at the experiences of the city of Coventry in responding to the challenges of socioeconomic change technological advances reconstruction and renewal Issues of investment economic decline reconstruction employment change and local and national governance are all considered in assessing the story of modern Coventry a city influenced by new industries and development opportunities while still being shaped by its historical economic challenges By focusing on the case of Coventry this book contributes to debates surrounding urban structural change economic diversification and resilience from the perspective of a medium sized city The Economics of Affordable Housing Alexander Styhre,2022-11-23 The economic system of competitive capitalism has proven to be both resilient and flexible over time and has contributed to the economic welfare of citizens in liberal and coordinated market economies in diverse regions and countries At the same time over the entire post World War II period there has been a notable endemic shortage of affordable housing in many advanced economies This book points at both the causes and the consequences of this circumstance and provides an integrated economic and legal view of how housing production is dependent on housing finance which in turn means that legal conditions and the sovereign state play an active role Further the book contributes to the literature from two otherwise partially separated disciplines housing and urban development studies on the one hand and the institutional centrality of the finance industry in the contemporary economic system on the other The author asserts that although somewhat assimilated due to the ambitions of policy makers to optimize social and economic welfare for their constituencies the combining of these two realms of expertise generates many favorable outcomes but also some costs derived from finance industry instabilities The book connects theoretical perspectives and provides an empirical explanation for how affordable housing is generated in an actual real world economy context The book will be relevant to the work of a number of academic disciplines including economics government studies housing policy and urban planning social geography and law and society **Investigating Spatial Inequalities** Peter Gladoić Håkansson,Helena Bohman,2019-11-29 Offering in depth perspectives on factors such as local labour markets housing and mobility this book investigates centralization tendencies in Scandinavia and South East Europe that help shape regional development and act as a catalyst to creating

regional inequalities **Journal of Housing Research** ,2006 **OECD Territorial Reviews: Brussels-Capital Region, Belgium** OECD,2024-02-06 The OECD Territorial Review of the Brussels Capital Region Belgium provides an in depth assessment of the trends challenges and opportunities for sustainable and inclusive urban development in the region

Haynes,Zeynep Elburz,2025-08-11 This thematic Encyclopedia explores the multifaceted world of regional science presenting a systematic and coherent overview of its central topics It highlights the interdisciplinary nature of the field examining the wide range of concepts theories methods and models that shape spatial oriented approaches to the social sciences Consumption and Class Roger Burrows,Catherine Marsh,2016-07-27 An edited collection exploring divisions and changes within and between the spheres of consumption and production Topics include the relationship between consumption and production the social construction of consumers housing and social class mobility health provision the role of the service class and access to higher education Peter Saunders work provides the initial stimulus for many of the papers but all go beyond his narrow conception of a sociology of consumption and his liberal analysis of patterns of social inequality The Labour Market Impact of the EU Enlargement Floro Ernesto Caroleo,Francesco Pastore,2010-03-18 Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on The Labour Market Impact of the European Union Enlargements A New Regional Geography of Europe of the XXII Conference of the Italian Association of Labour Economics AIEL The session aimed to stimulate the debate on the continuity fracture of regional patterns of development and employment in old and new European Union EU regions In particular we asked whether and how different the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe CEE are compared to those in the old EU members Several contributions in this book suggest that a factor common to all backward regions often neglected in the literature is to be found in their higher than average degree of structural change or more precisely in the hardship they experience in coping with the process of structural change typical of all advanced economies In the new EU members of CEE structural change is still a consequence of the continuing process of transition from central planning to a market economy but also of what Fabrizio et al 2009 call the second transition namely that related to the run up to and entry in the EU
