Regions Local Power Economic:

Energy Economics Yi-Ming Wei, Qiao-Mei Liang, Gang Wu, Hua Liao, 2019-09-23 This book sets out a systematic piece of research which attempts to assess the level of energy security in China investigate how national energy supply security might be improved and consider how energy trade risks might be reduced **The Routledge Research Companion to Energy**

Geographies Stefan Bouzarovski, Martin J Pasqualetti, Vanesa Castán Broto, 2017-07-06 Energy has become a central concern of many strands of geographical inquiry from global climate change to the effects of energy decisions on our lives However many aspects of the black box of relationships at the energy society interface remain unopened especially in terms of the spatial underpinnings of energy production and consumption within nations cities and regions Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world Providing an integrated perspective on the complex interdependencies between energy and geography The Routledge Research Companion to Energy Geographies offers a timely conceptual framework to study the multiple facets of energy geography including security space and place planning environmental science economics and political science Illustrating how a geographic approach towards energy can aid decision making pathways in the domains of social justice and environment this book provides insights that will help move the international community toward greater cooperation stability and sustainability **Technological Economics** Shoubo Xu, 2020-10-26

This book creatively puts forward the subject nature object system theory method and application of technical economics and brings together the research achievements of 50 years especially the latest research results It is of great significance for the development of China's technical and economic disciplines and the cultivation of special talents for technical and economic development It is of great significance for the solution of major technical and economic problems in economic and social development and has a landmark significance in the history of world technical economics The book can be used as teaching material for both the liberal arts science and engineering students within higher education institutions and as a leading cadre training source for engineers Furthermore it can facilitate readers engaged in policy making program planning macro control evaluation of investment decision feasibility studies project with aspects such as government consulting companies banks and financial personnel needs Also this book can aid readers with engineering design product development business management as well as with the needs of engineering and technical personnel and enterprise management personnel

Governing Metropolitan Regions in the 21st Century Donald Phares, 2015-01-28 While government provides the structure of public leadership governance is the art of public leadership This timely book examines current trends in metropolitan governance issues It analyzes specific cases from thirteen major metropolitan regions in the United States Canada and Mexico all woven together by an overall framework established in the first three chapters The distinguished contributors address such governance issues as city county consolidation local federal coordination annexation and special districting and

private contracting with special attention to lessons learned from both successes and failures As urban governance innovations have clearly outpaced urban government structures in recent years the topics covered here are especially relevant

Prosperity, Region, and Institutions in Maritime China Billy K.L. So, 2020-03-23 Prosperity signifies success in economic performance Economic performance always takes place in a spatial context And institutions matter in economic performance These three interwoven themes underlie this inquiry into the regional economy of southern Fukien province during the Sung and Yuan dynasties when the area was one of the most prosperous regions in China Through a meticulous reading of the sources the author seeks to understand the meaning of prosperity in the premodern Chinese context and argues that we have to understand economic performance as a process occurring in space and influenced by institutions which affect economic actors particularly through the means of transaction costs

An Ecological Characterization of the Pacific Northwest Coastal Region: Conceptual model, 1980 **Energy and Environment in the California-Baja California Border Region** Alan Sweedler, Paul Ganster, Patricia Bennett, 1995 **An Ecological Characterization of the Pacific Northwest Coastal Region**, 1981 *The Dynamics of Economic Culture in the North Sea and Baltic Region* Hanno Brand, Leos Müller, 2007 *The Territories of the Russian Federation 2003* Europa Publications, 2003 Presents a distinctive collection of political geographical and economic information on the 89 constituent units of the Russian Federation *A Regional Approach to Industrial Restructuring in the Tomsk Region, Russian Federation* OECD, 1998-10-07 At the invitation of the regional authorities the OECD organised a conference in Tomsk on a regional approach to industrial restructuring in June 1997 This report presents the economic assessment conference conclusions and recommendations *2004 Power Marketing Program for Sierra Nevada Customer Service Region (CA, NV)*, 1997

Politics in the Russian Regions G. Gill, 2007-06-28 This volume analyzes the changing power relations in the Russian regions and in their relationship with the centre It considers Russian federalism and the changes that Putin has introduced and the distribution of power at the regional level The result is a rich survey of the state of federal relations in Russia *Handbook of Energy Economics and Policy* Alessandro Rubino, Alessandro Sapio, Massimo La Scala, 2021-05-01 Handbook of Energy Economics and Policy Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies economics regulation and governance of the industry Sections cover the origins types and measurement of energy sources transportation networks and regulatory and policy issues on electricity and gas at a global level new economic and policy issues including innovation processes in the energy industry and economic and policy implications Final sections cover state of the art methods for modeling and predicting the dynamics of energy systems Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design develop plan or deploy energy systems Energy planners and policymakers

will also find this to be a solid foundation on which to base decisions Presents key concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and forecasting the impacts of energy technologies and systems as well as their costs and possible business models *Relative Water and Power Resource Development in the U.S.S.R. and the U.S.A.* United States. Congress. Senate. Committee on Interior and Insular Affairs, United States. Congress. Senate. Committee on Public Works, 1960 Managing Environmental and Energy Transitions for Regions and Cities OECD, 2020-11-18 This report offers guidance on how to prepare regions and cities for the transition towards a climate neutral and circular economy by 2050 and is directed to all policymakers seeking to identify and implement concrete and ambitious transition pathways It describes how cities regions and rural areas can manage the transition in a range of policy domains including energy supply conversion and use the transformation of mobility systems and land use practices **The Journal of Land & Public Utility Economics**, 1928 Includes book reviews and bibliographical references Supplemental Phases of the Interterritorial Freight Rate Problem of the United States Tennessee Valley Authority. Commerce Department, 1939 Energy Transition and Energy Democracy in East Asia Jusen Asuka, Dan Jin, 2022-03-23 This is an open access book The subject of this book is to provide down to earth information on what kind of actions are being taken by the Government Local community Businesses Researchers NGOs on the energy transition in this region It gives an updated picture of the energy transition in the East Asian countries where the economic growth as well as CO2 emission growth is significant This book focuses not only on the technological perspective of the energy transition but also on the relationship between democracy and energy transition Readers of this book can understand what kind of international support and pressure is needed to promote the energy transition in this region Since energy transition is needed not only for combatting climate change but also for the Green Recovery from the COVID 19 pandemic publishing this book is very helpful to promote the Green Recovery and the Green New Deal world widely **Peacemaking and Peacebuilding in the Kurdistan Region of Iraq post-1998** Hawre Hasan Hama, 2025-08-30 This book argues although peace in the KRI has lasted for over a quarter century it remains a form of negative peace due to weak institutions Achieving positive peace requires addressing political legal and security challenges It examines the factors that have shaped both the stability and fragility of peace settlements since the 1998 Washington Agreement By combining theoretical models with in depth empirical data the book explores the interplay of power sharing economic development and third party intervention arguing that these elements are pivotal to the durability of peace settlements in post conflict societies To secure a lasting and positive peace the KRI must confront deeply rooted political legal and military challenges that continue to undermine progress This includes establishing political and legal accountability and depoliticizing the Kurdish armed forces Such a transition requires not only genuine political will and committed internal

reforms but also sustained international support to prevent future armed conflict and lay the foundation for a stable and prosperous KRI
