Regulated Industries And Public Enterprise European And United States Perspectives:

Regulated Industries and Public Enterprise European Institute for Advanced Studies in Management,1980

REGULATED INDUSTRY AND PUBLIC ENTERPRISE : EUROPEAN AND UNITED STATES PERSPECTIVES ,1980

Competition and Regulation in the Postal and Delivery Sector Michael A. Crew,Paul R. Kleindorfer,2008-01-01 Worldwide postal and delivery economics has attracted considerable interest Numerous questions have arisen including the role of regulation funding the Universal Service Obligation postal reform in Europe Asia and North America the future of national postal operators demand and pricing strategies and the principles that should govern the introduction of competition Collected here are responses to these questions in the form of 24 essays written by researchers practitioners and senior managers from throughout the world This volume will have a broad appeal with an audience ranging from practitioners in the express and delivery industry national Postal Operators and managers to economists regulators competition lawyers marketers scholars in economic regulation and institutional libraries **Public Sector Economics** Jörg

Finsinger,1983-06-30 Powering China:Reforming the Electric Power Industry in China Xu Yi-chong,2018-02-05 This title was first published in 2002 This study of the Chinese electric power industry examines the ownership and the restructuring of the industry The reform of the electric power industry is also seen as part of the wider economic development that has been taking place in China thus providing fresh perspectives on the changes taking place in both the economy and society more generally Presenting a wealth of extensive research on the subject the book elucidates the power struggle between political and bureaucratic elite and explains the sensitive and volatile relationship between the central and provincial government against an increasingly complex global background **Regulatory Choices** Richard J. Gilbert,2023-11-15 Regulatory Choices offers the first comprehensive economic history of energy policy and its consequences for California where some of the most innovative and far ranging programs of regulatory reform have originated The authors of this volume have gathered together an impressive wealth of material about actual policy decisions and their repercussions and have subjected their findings to astute economic analysis This book will serve for years to come as an invaluable reference on the costs and effects of various energy policies With its focus on bringing prices in alignment with the true cost of producing power and delivering it to the customer the first part of the book outlines the issue of setting utility rates and considers some of the proposals to provide regulated industries with incentives to respond to economic and environmental concerns The problems of energy supply occupy the second part of the book which includes a survey of the costs of alternative energy sources and estimates of their environmental impacts as well as a case study of the construction of the Diablo Canyon nuclear power plant The book concludes by documenting the results of subsidy programs that were designed to target the development of wind power and residential energy conservation Regulators we learn have a mixed record when it comes to managing the production of energy Some conservation programs have enjoyed considerable economic success particularly

those that correct a lack of consumer information Others such as the renewable energy tax credits or programs designed to subsidize new technologies have cost much more than the value of the energy they have saved What emerges clearly from this study is that regulated industries are not immune from the forces of competition This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991

Social Ethics and Normative Economics Marc Fleurbaey, Maurice Salles, John A. Weymark, 2011-04-11 This collection of thirteen essays on social ethics and normative economics honouring Serge Christophe Kolm's seminal contributions to this field addresses the following questions How should the public sector price its production and services What are the normative foundations of criteria for comparing distributions of riches and advantages How should intergenerational social immobility and inequality in circumstances be measured What is a fair way to form partnerships How vulnerable to manipulation is the Lindahl rule for allocating public goods What are the properties of Kolm's ELIE tax proposal Would the addition of EU level income taxes enhance equity How should we compare different scenarios for future societies with different population sizes How can domain conditions in social choice theory be justified using Kolm's epistemic counterfactuals How can Kolm's distributive liberal contract be implemented What are the implications of norms of reciprocity for the organization of society The answers to these questions give major insight into the state of the art of social ethics and normative economics and are thus an indispensable source for researchers in both of these fields

Industry and Firm Studies Victor J. Tremblay, Carol Horton Tremblay, 2015-03-26 The fourth edition of this acclaimed text is a rich resource for undergraduate and graduate courses in industrial organization applied game theory and management strategy It incorporates game theory into industry analysis by studying the behavior of successful and failing firms as well as the structure conduct performance of particular industries Chapters address a wide variety of issues concerning industry structure policy towards business and the strategic innovations and blunders of individual firms New coverage of professional sports soft drinks distilled spirits and cigarettes complements revised and updated chapters on airline services retail and commercial banking health insurance motion pictures and brewing The book includes firm case studies of General Motors Microsoft Schlitz and TiVo

Industry Studies Larry L. Duetsch, 2019-07-23 Featuring new chapters on casino gambling and the nursing home industry and updated throughout the new edition of this highly readable text analyzes well defined industries from commodities and manufacturing to distribution and services showing how firms compete with one another Each study gives appropriate attention to government policies that have influenced competitive conditions in the industry and the material is presented without the use of calculus so that anyone with some background in economic principles can benefit from it The book provides balance in regard to the mix of industries dealt with and also in the varying perspectives of the contributors

The

Economic Effects of Airline Deregulation Steven Morrison, Clifford Winston, 2010-12-01 In 1938 the U S Government took under its wing an infant airline industry Government agencies assumed responsibility not only for airline safety but for setting fares and determining how individual markets would be served Forty years later the Airline Deregulation Act of 1978 set in motion the economic deregulation of the industry and opened it to market competition This study by Steven Morrison and Clifford Winston analyzes the effects of deregulation on both travelers and the airline industry The authors find that lower fares and better service have netted travelers some 6 billion in annual benefits while airline earnings have increased by 2.5 billion a year Morrison and Winston expect still greater benefits once the industry has had time to adjust its capital structure to the unregulated marketplace and they recommend specific public policies to ensure healthy competition

Selected Library Acquisitions United States. Department of Transportation, **Federal Communications Commission Reports** United States. Federal Communications Commission, 1984 *Regulated Industries and Public Enterprise* Bridger M. Mitchell, Paul R. Kleindorfer, 1980 *Telecommunications Pricing* Bridger M. Mitchell, Ingo Vogelsang, 1991-11-29 Systematically reviews recent innovations in the economic theory of pricing and extends results to the conditions which characterize telecommunications markets Handbook of Standards and Guidelines in Ergonomics and Human Factors Waldemar Karwowski, 2005-12-16 A comprehensive review of international and national standards and guidelines this handbook consists of 32 chapters divided into nine sections that cover standardization efforts anthropometry and working postures designing manual material human computer interaction occupational health and safety legal protection military human factor standard **Social Experimentation** Jerry A. Hausman, David A. Wise, 2007-12-01 Since 1970 the United States government has spent over half a billion dollars on social experiments intended to assess the effect of potential tax policies health insurance plans housing subsidies and other programs Was it worth it Was anything learned from these experiments that could not have been learned by other and cheaper means Could the experiments have been better designed or analyzed These are some of the questions addressed by the contributors to this volume the result of a conference on social experimentation sponsored in 1981 by the National Bureau of Economic Research The first section of the book looks at four types of experiments and what each accomplished Frank P. Stafford examines the negative income tax experiments Dennis J. Aigner considers the experiments with electricity pricing based on time of use Harvey S. Rosen evaluates housing allowance experiments and Jeffrey E. Harris reports on health experiments In the second section addressing experimental design and analysis Jerry A. Hausman and David A. Wise highlight the absence of random selection of participants in social experiments Frederick Mosteller and Milton C. Weinstein look specifically at the design of medical experiments and Ernst W. Stromsdorfer examines the effects of experiments on policy Each chapter is followed by the commentary of one or more distinguished economists **Private and Public Enterprise in Europe** Robert Millward, 2007 **The US-EU Regulatory Dialogue** United States.
