Sports Law in the European Union Andrea Cattaneo, Richard Parrish, 2020-09-22 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in the European Union deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in the European Union will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

Assembling Consumption

Robin Canniford, Domen Bajde, 2015-09-16 *Assembling Consumption* marks a definitive step in the institutionalisation of qualitative business research. By gathering leading scholars and educators who study markets, marketing and consumption through the lenses of philosophy, sociology and anthropology, this book clarifies and applies the investigative tools offered by assemblage theory, actor network theory and non-representational theory. Clear theoretical explanation and methodological innovation alongside empirical applications of these emerging frameworks will offer readers new and refreshing perspectives on consumer culture and market societies. This is an essential reading for both seasoned scholars and advanced students of markets, economies and social forms of consumption. **Governing the Society of Competition** Martin Hardie, 2020-10-29

This book considers the manner in which the making and implementation of law and governance is changing in the global context. It explores this through a study of the deployment of the global anti-doping apparatus, including the World Anti-Doping Code and its institutions, with specific reference to professional cycling, a sport that has been at the forefront of some of the most famous doping cases and controversies in recent years. Critically, it argues that the changes to law and governance are not restricted to sport and anti-doping but are actually inherent in broader processes associated with neoliberalism and social and behavioural surveillance, and affect all aspects of society and its political institutions. The author engages with concepts and arguments in contemporary social theory, including Dardot and Laval on neoliberalism, Agamben on sovereignty, Hardt and Negri on globalisation, and others including Foucault, Deleuze and Guattari, and Louis Dumont. The work seeks to answer a question posed by both Foucault and Agamben: that is, given the growing primacy of the arts of government, what is the juridical form and theory of sovereignty that is able to sustain and found this primacy? It is argued that this question can be understood by reference to the shift from a social or public contract that was understood to be the foundation of society to a society that is constituted by consent, private agreement and contract. In addition, the book examines the juridical concepts of the rule of law and sovereignty. Commencing with the Festina scandal of 1998, the Spanish case of Operación Puerto, and concluding with the fall from grace of the American cyclist Lance Armstrong in 2012, the principal processes examined include the increasing crossing of the borders between different legal regimes, whether supranational or simply particularised, and with it, the erosion of what we knew as state sovereignty and constitutionalism. The increasing use of judgment achieved through the media, and how this arrives at new configurations of moral panic and scapegoating. The creation of a need for rapid outcomes at the expense of the modernist value or version of the rule of law. The increasing use of new and alternative methods of guilt proof and ultra-legal detection. Forthcoming Books Rose

Army, 2000. **Law for Sale** Johanna Stark, 2019-02-21. Common markets, open borders, air traffic and the internet have made it faster and less expensive to change places and jurisdictions. As a result, legal forums are increasingly treated as a good that is subject to the market mechanism. Individuals and corporations increasingly have free reign to choose which legal rules to apply to their company, their contract, their marriage or their insolvency proceedings. States in turn grant these opportunities.

The Global Politics of Sport Lincoln Allison, 2005 Sport presents one of the most advanced cases of globalisation, arguably because there are fewer cultural and political obstacles to the development of trade and international power in sport than there are in other fields. Thus there has been a change in the nature of the politics of sport since the end of the Cold War; the subject must be rewritten to acknowledge a twenty-first century world in which international sporting organisations and transnational corporations have become far more important than states. *The Global Politics of Sport* presents a range of essays examining the emerging global political issues in twenty-first century sport, including the role and power of organisations such as FIFA and the IOC, the influence of US exceptionalism, the construction of global sports heroes, tensions developing within traditionally alternative sports in a global commercial culture. *The Global Politics of Sport* presents new and fresh exploration of different conceptions of sport as a purely commercial activity and as an activity as
