Reid And His French Disciples:

Reid and his French Disciples James W. Manns, 1994-01-01 The book opens with the most detailed account yet of Thomas Reid's expressionist aesthetic theory integrating it thoroughly into his metaphysical epistemological and metaphilosophical viewpoints each of which is examined closely in its turn The book then traces out the influence which Reid an eighteenth century Scottish thinker exercised on nineteenth century French philosophy an influence which proves considerable Victor Cousin the most significant philosophical figure in post Napoleonic France was profoundly impressed by Reid's thinking The author demonstrates the depth and extent of his dependence in epistemological metaphysical and aesthetic matters He then pursues Cousin's hence Reid's legacy through three succeeding generations of French academics and intellectuals focusing throughout on the development of the expressionist aesthetic Principal among these heritors are Th odore Jouffroy Charles L v que and Sully Prudhomme

Towards a New Anthropology of the Embodied Mind: Maine de Biran's Physio-Spiritualism from 1800 to the 21st Century ,2023-11-13 This exploration in the history of ideas examines the groundbreaking notion of the embodied mind in its analysis by the French philosopher and politician Maine de Biran 1766 1824 and in its afterlife consciousness is generated through frequent interaction between the voluntary and the spiritual The conscious active self is constituted in its sovereign autonomy as free and undivided by an inner act of willful resistance a physical effort towards its own body and the world For the first time a multidisciplinary group of senior and junior researchers from Japan USA and Europe investigate origins and discursive cross fertilization of this concept around 1800 an intermediary stage between 1870 and 1945 and its influence upon existentialism phenomenology and deconstructivism during the postwar period and beyond from 1943 to 2010

Comparative and Intercultural Philosophy Hans Lenk, 2009 The volume documents the results of the Annual Meeting of the International Institute of Philosophy at the occasion of the World Congress of Philosophy 2008 in Seoul Logically systematic and methodological differences and comparisons between cultural traditions are analyzed from a multicultural perspective General challenges of multiculturalism for world philosophy are analyzed from ethical and ontological approaches e g of ancient Chinese and Greek philosophy Historical studies regarding influences and migrations of philosophical texts across different cultures as well as religious and human rights debates about tolerance are topical themes In addition the question is raised whether logical principles are cross culturally valid

Hegel and Schelling in Early Nineteenth-Century France Kirill Chepurin, Adi Eyal-Lautenschläger, Daniel Whistler, Ayşe Yuva, 2023-11-29 Hegel and Schelling in Early Nineteenth Century France is a two volume work that documents the French reception of G W F Hegel and F W J Schelling from 1801 to 1848 It shows that the story of the French Hegel didn't begin with Wahl and Kojve by giving readers a solid understanding of the various ways in which German Idealism impacted nineteenth century French philosophy as well as providing the first ever English language translations of excerpts from the most important philosophical texts of the era Inside volume two readers will find a series of scholarly studies to help them

get to grips with this neglected field in the history of ideas The contributors are world leading and emerging experts from Europe UK and North America They highlight the stakes and trace the pathways of this reception for French and German thought during the period including the ways in which French philosophers of the period took up the debates and concepts of German Idealism transformed them or rejected them In this way the volume aims to redress the serious neglect of early nineteenth century French thought in English language scholarship and in so doing goes beyond a nation based narrative of the history of philosophy Figures covered in the volumes include major philosophers such as Cousin Leroux Proudhon Quinet Ravaisson Renouvier and V ra as well more neglected figures like Barchou de Penho n B nard L bre Lerminier Pictet and Willm

The Debate Over the Origin of Genius During the Italian Renaissance Noel L. Brann,2002 This study explores a prominent Italian Renaissance theme the origin of genius revealing how the coalescence of a Platonic theory of divine frenzy and an Aristotelian theory of melancholy genius eventually disintegrated under the force of late Renaissance events

Emerson's Metaphysics Joseph Urbas,2016-10-12 This book gives the first complete fully historicized account of Emerson s metaphysics of cause and effect and its foundational position in his philosophy as a whole Urbas tells the story of the making of a metaphysician and in so doing breaks with the postmodern anti metaphysical readings that have dominated Emerson scholarship since his philosophical rehabilitation began in late 1970s This is an intellectual biography of Emerson the metaphysician but also a chapter in the cultural life story of a concept synonymous in the Transcendentalist period with life itself the story of the principle at the origin of all being and change Emerson s Metaphysics proposes an account of Emerson s metaphysical thought as it unfolds in his writings as it informs his philosophy as a whole and as it reflects the intellectual and religious culture in which he lived and moved and had his being This book will be of interest to philosophers literary scholars and students of English philosophy and intellectual and religious history who are interested in Emerson and the American Transcendentalist movement

Optiques Andrea Goulet,2013-04-05 Andrea Goulet takes the study of the novel into the realm of the visual by situating it in the context of nineteenth century scientific and philosophical discourse about the nature of sight She argues that French realism detective

fiction science fiction and literature of the fantastic from 1830 to 1910 reflected competition between two modern visual modes a not yet outdated idealism and an empiricism that located truth in the body More specifically the book argues that key narrative forms of the nineteenth century were shaped by a set of scientific debates between idealism and materialism in Honor Balzac s *Com die humaine* between deduction and induction in early French detective fiction and between objective vision and subjective vision in the optogram fictions of Jules Verne and others Goulet aims to revise critical views on the modern novel in a number of ways For instance although many literary studies focus on the impact of cinema photography and painting Optiques asserts the materialist bases of realism by establishing a genealogy of popular fictional genres as fundamentally optical that is as articulated according to bodily notions of sight With its chronological and interdisciplinary scope Optiques stands to contribute an important chapter to the study of literary modernity in its scientific context
