Aboriginal Voices and the Politics of Representation in Canadian Introductory Sociology Textbooks John Steckley, 2003

The philosophical underpinnings of this textbook make it a most interesting read for scholars of Aboriginal Studies the social sciences humanities and cultural studies and humanistic curriculum development John Steckley's familiarity with and respect for the epistemology of the Huron Mohawk and Ojibwa peoples enlightens and enables his research In this book he provides a critical framework for assessing Aboriginal content in introductory sociology textbooks He defines what is missing from the seventy seven texts included in his study of the manifestation of cultural hegemony in Canadian sociology textbooks This critique is suitable for students and professors of sociology as Dr Steckley addresses the impact of the ellipses from the textbooks they have traditionally used Social Control and Social Change Liddell Henry, 2019-08-24 Socialization is predominately an unconscious process by which a new born child learns the values beliefs rules and regulations of society or internalizes the culture in which it born Social control is described in detail at the end of the book It is intended as a book for undergraduate and postgraduate students of sociology and a reference tool to the researchers and academic professionals this comprehensive and well structured book presents in a systematic way the Social Control and Social Change The book is undoubtedly a valuable asset for the students researchers as well as teachers of sociology In addition general readers concerned with social aspects and social progress will find it extremely informative **Sociological Wisdom** William E. Thompson, Mica L. Thompson, 2019-09-10 Sociological Wisdom is based on applying the basic principles of sociology to the world around us Sociologists study patterns of behavior in order to draw general conclusions about a social issue that transcend the effect of the problem or issue on any particular individual This is not to say that sociologists are unconcerned about individuals and their lives but sociology's emphasis is on the way individuals relate to others people's positions in society and the interdependence between society and individuals This text teaches students that it is more important than ever to study human behavior social groups and society utilizing critical thinking skills and careful analysis associated with sociological wisdom Debates over the Resurrection of the Dead Outi Lehtipuu, 2015-02-12 In Debates over the Resurrection of the Dead Outi Lehtipuu highlights the striking observation that in many early texts the way that belief in resurrection is formulated is used as a sign of inclusion and exclusion not only in relation to non Christians but vis vis other Christians Those who teach otherwise have deviated from the truth are not true Christians and do the works of the devil Using insights from the sociological study of deviance Dr Lehtipuu demonstrates that labelling was used as a tool for marking boundaries between those who belonged and those who did not This was extremely important in the fluid conditions where the small Christian minority groups found themselves In a situation where there were no universally accepted structures that defined what constituted the true Christian belief several competing interpretations and their representatives struggled for recognition of their views based on what they believed to be the apostolic tradition The most hotly debated aspect of resurrection was whether it would entail the body of flesh and blood or not When resurrection would take place was closely related to this Controversies died since the scriptural legacy was ambiguous enough to allow different hermeneutical

solutions The battle over resurrection was closely related to the question of how scriptures were to be understood as well as to what constituted the human self that would survive death To demonstrate this a wide variety of texts are studied from theological treatises including relevant Nag Hammadi texts to apocryphal acts and martyrologies Acknowledging the complexity and diversity of the early Christian movement this volume views early Christian discourse as part of the broader ancient discursive world where similar debates were going on among both Jews and the majority population OCR Sociology for A Level Book 2 Sue Brisbane, Katherine Roberts, Paul Taylor, Laura Pountney, 2016-08-01 Exam Board OCR Level A level Subject Sociology First Teaching September 2015 First Exam June 2017 Build students confidence to tackle the key themes of the 2015 OCR A Level Sociology specification with this clear and accessible approach delivered by a team of leading subject authors Develop knowledge and understanding of key Year 2 concepts in a contemporary context including globalisation and the digital social world Strengthen essential sociological skills with engaging activities at every stage of the course Reinforce learning and prepare for exams with practice and extension questions and exercises **Structure and Agency in Everyday Life** Gil Richard Musolf, 2003 Structure and Agency in Everyday Life outlines the major concepts of interactionism through its leading theoreticians from William James to Erving Goffman to contemporary writers The text underscores the dynamic relationship between the structures or social forces of constraint and humans ability to act self reflexively and constitute meaning in their lives through everyday action The major foci of interactionism emotions deviance childhood socialization gender the negotiated order and the self are covered in depth The text presents a history of the interactionist perspective **Criminal Law, Second Edition** Charles P. Nemeth, 2011-11-16 In order to fully grasp criminal law concepts students must go beyond mere rote memorization of the penal code and attempt to understand where the laws originate from and how they have developed Criminal Law Second Edition blends legal and moral reasoning in the examination of crimes and explores the history relating to jurisprudence and roots of criminal law It fosters discussions of controversial issues and delivers abridged case law decisions that target the essence of appellate rulings Grounded in the model penal code making the text national in scope this volume examines Why the criminal codes originated and the moral religious spiritual and human influences that led to our present system How crimes are described in the modern criminal justice model The two essential elements necessary for criminal culpability actus reus the act committed or omitted and mens rea the mind and intent of the actor Offenses against the body resulting in death including murder manslaughter felony murder and negligent homicide Nonterminal criminal conduct against the body including robbery kidnapping false imprisonment assault and hate crimes Sexual assault rape necrophilia incest and child molestation Property offenses such as larceny theft bribery forgery and embezzlement Crimes against the home including burglary trespass arson and vandalism The book also examines controversial public morality issues such as prostitution drug legalization obscenity and pornography The final two chapters discuss inchoate offenses where the criminal act has not been completed and various criminal

defenses such as legal insanity entrapment coercion self defense and mistake of fact or law Important keywords introduce each chapter and discussion questions and suggested readings appear at the end of each chapter prompting lively debate and further inquiry into a fascinating subject area that continues to evolve
