Untrapped Value: 1.01 Software Reuse Powering Future Prosperity Dave R. Erickson,2023-03-25 Mankind has invested vast resources time manhours computer machinery sunk costs maintenance building space heating venting cooling and so on into software for all kinds of digital and analog hardware for over sixty years Far longer if you consider punched cards and so on In the end most of the source code ends in the waste heap of history Old code gets forgotten rub bished and a new wave of developers is forced to recreate new versions of old ideas People get promoted graduate from college and leave to get married before they do they don t have time

don't believe in the priority and don't place the code where others can find it to make an important curation of their software and by this donate it to future generations worldwide the society at large If organizations at the other end of the spectrum would realign software for a legacy of centuries instead of product runs mankind can preserve the sunk costs speed up advancement and make software impact far wider when it's made in a reusable form People move to a new job and remake linked lists factory classes or ring buffers in the new language of the day or within the design paradigm of the latest fad management It's kind of insane when you think about it people spend many years getting a consumer product working finely tuned and profitable Then two companies merge product lines are unified or obsoleted and some or all of the intellectual property gets forgotten in a corner as one team is merged and the others retire to golf or the pool While filling in cardboard boxes of stuff as they leave does anyone drag out the old tapes and floppies to make sure the new guys aren't starting by reinventing the wheel
