Religion and Ethnicity Leslie Kawamura, 2006-01-01 The essays in this volume deal with the relationship between living religious traditions in Canada and the fabric of Canadian society Canada is a pluralistic society ethnically and religiously How are these two pluralisms related Their connection is intimate but never simple For many years there could plausibly have been said to be a dominant Anglo Canadian Protestant tradition with other faiths and denominations being associated primarily with ethnic minorities No doubt this would always have been a simplistic understanding but today as Canadian culture is increasing secularized it is religion itself that the majority sees as a minority concern Ethnic and religious loyalties pull together against a secular assimilation Such a change leaves the establishment denominations with an unwanted identity crisis of their own not the least part of which is due to an unfamiliar awareness of their own ethnic roots and histories

scholars describe the impact of religious practices around the world using rich examples drawn from personal observation. Instead of repeating generalizations about what religion should mean, these volumes examine how religions actually influence our public and private lives on the ground on a day to day basis. Volume one introduces regional histories of the world's religions and discusses major ritual practices such as the Catholic Mass and the Islamic pilgrimage to Mecca. Volume two examines themes that will help readers understand how religions interact with the practices of public life, describing the ways religions influence government, education, criminal justice, economy, technology, and the environment. Volume three takes up themes that are central to how religions are realized in the practices of individuals. In these essays, readers meet a shaman healer in South Africa, laugh with Buddhist monks, sing with Bob Dylan, cheer for Australian rugby, and explore Chicana and Iranian art.

Moroccan Jews in France and Canada Yolande Cohen, 2025-11-12. In this volume are gathered articles published by Yolande Cohen and her team, offering for the first time a global perspective on Moroccan Jews' post-colonial migrations to France and Canada. Having herself migrated from Morocco to Montreal, Cohen is uniquely attuned to the difficulties of living through such a massive exile. Why did members of the Jewish community leave Morocco? When did this migration happen? And how can we analyze their journey? Cohen explores the many vivid memories of departures that she encountered when collecting oral histories of migrants, both in France and in Quebec. She notes the deep attachment some of them have to their King and to Morocco, making this an exception in the Arab-Muslim world. The main disruptive forces in the displacement of these populations were French colonialism and its emancipatory promises, and Zionism, both messianic and modern. After the establishment of the State of Israel and the subsequent Israel-Arab wars, most of them joined in the mass exodus of Jews from Arab lands, leaving their countries for Israel. With the demise of the French colonial empire and the decolonization process, a minority of westernized Jews went to France and to Canada with the help of transnational Jewish organizations. In Montreal, a city with a strong multi-ethnic Jewish community, those migrants understood the crucial aspect of French language as an essential factor of integration. Yet analyzing their trajectories and the words they used to represent their exile allows us to understand the underlying traumas.

Beaman, 2016-02-17 Advocacy for religious freedom has become a global project while religion and the management of religion has become of increasing interest to scholars across a wider range of disciplines Rather than adopting the common assumption that religious freedom is simply incompletely realized the authors in this book suggest that the starting point for understanding religion in public life today should be religious establishment In the hyper globalized world of the politics of religious freedom today a focus on establishments brings into view the cultural assumptions cosmologies anthropologies and institutions which structure religion and religious diversity Leading international scholars from a diverse range of disciplines explore how countries today live with religious difference and consider how considering establishments reveals the limitations of universal multicultural and interfaith models of religious freedom Examining the various forms religion takes in Tunisia Canada Taiwan South Africa and the USA amongst others this book argues that legal protections for religious freedom can only be understood in a context of socially and culturally specific constraints
