Religion and Environmental Crisis Eugene C. Hargrove, 1986 Caring for Creation Max Oelschlaeger, 1996-01-01 Argues that religion blamed for contributing to the ecological crisis provides an ethical context that will help solve the problem The approach suggests that the environmentally positive aspects in various Western creation stories demonstrate religion *Environmental Crisis and Hindu Religion* O. P. Dwivedi, Bholānātha Tivārī, 1987 **Religion and Ecological Crisis** Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr s seminal article *The Historical Roots of Our Ecologic Crisis* was published essentially establishing the academic study of religion and nature White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies White s hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White s arguments offering constructive criticism as well as reflections on the ongoing ever changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions *Religion and Ecological Crisis* addresses a wide range of topics related to White s thesis including its significance for environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis This book is a timely reflection on the legacy and continuing challenge of White s influential article Religion and Environmental Crisis Eugene C. Hargrove, 1986 **Religion and Ecological Crisis** Md. Abu Sayem, 2022-09-02 *Religion and Ecological Crisis* delves into the complex relationship between religions and ecology presenting Christian and Islamic perspectives on ecological issues through the work of John Boswell Cobb and Seyyed Hossein Nasr It examines how faith traditions of the world see and respond to our current unprecedented climate change issues This is the first comparative study of Cobb and Nasr s eco religious understanding and explores how their prescriptions can contribute alternatively to techno scientific initiatives in environmental sustainability Taking Cobb s economism and Nasr s scientism as the key concepts for surveying the roots of the ecological crisis the book offers interdisciplinary and interreligious insights into the debates about ecological equilibrium motivational awareness in human mind and about entanglements between religion and the environment This will be an insightful resource for policy makers faith leaders and for academics working in Environmental Studies and Religious Studies *Morality and the Environmental Crisis* Roger S. Gottlieb, 2019-02-21 The environmental crisis creates an unprecedented

moral predicament how to be a good person when our collective and individual actions contribute to immeasurable devastation and suffering Drawing on an extraordinary range of sources from philosophy political theory global religion ecology and contemporary spirituality Roger S Gottlieb explores the ethical ambiguities challenges and opportunities we face Engagingly written intellectually rigorous and forcefully argued this volume investigates the moral value of nature the possibility of an ecological democracy how we treat animals the demands and limits of individual responsibility and collective political change contemporary ambiguities of rationality and how to face environmental despair In *Morality and the Environmental Crisis* Gottlieb combines compassion for the difficulties of contemporary moral life with an unflinching ethical commitment to awareness and action

A Greener Faith Roger S. Gottlieb, 2009-10 world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb analyzes the growing synthesis of the movement's religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization

Managing the Environmental Crisis in Ghana Kwasi Nyamekye, 2014-11-19 Due to the strong inroads that Western scientism and Western Christianity have made in Africa as a result of colonialism post colonial African governments have tended to rely solely on Western scientific conservation epistemologies and models to the neglect of those of the Indigenous African peoples in addressing their environmental problems However there is enough evidence that neither modern scientific nor indigenous epistemologies and modes of addressing current ecological problems are

O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to

Environmental Solidarity Pablo Martínez de Anguita,2012-05-23 The past few decades have seen the beginnings of a convergence between religions and ecological movements The environmental crisis has called the religions of the world to respond by finding their voice within the larger Earth community At the same time a certain religiosity has started to emerge in some areas of secular ecological thinking Beyond mere religious utilitarianism rooted in an understanding of the deepest connections between human beings their worldviews and nature itself this book tries to show how religious believers can look at the world through the eyes of faith and find a broader paradigm to sustain sustainability proposing a model for transposing this paradigm into practice so as to develop long term sustainable solutions that can be tested against reality

Religion and the Environment Roger S. Gottlieb,2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity s treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from

lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded

Ecology and Religion in History David Spring,Eileen Spring,1974 **Healing the Earth** Richard A. Young,1994 Christianity has been charged with being a key factor in the environmental crises experienced across the world Young considers these charges in the light of a biblical understanding of creation and humankind s place therein and argues that when Scripture is properly interpreted the God centered perspective that results actually provides the best foundation for confronting and solving environmental problems

The Oxford Handbook of Religion and Science Philip Clayton,Zachary Simpson,2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader
