betting formulas that will let you cover more horses and results for every dollar you bet shaving the odds in your favor For example Most people never win a Pick Six because they don't have the hundreds of dollars needed to put a lot of horses on a single ticket They will bet many 2 tickets instead They could end up with several tickets with 3 or 4 winners but none with 5 or 6 for the big win But by using Gordon's formulas you are guaranteed to line up at least five winners on one ticket if you get a winner in each race You'll also have a decent chance at getting a Pick Six without spending a fortune For example Pick Six Formula 1 covers 4 horses in 1 race 3 horses in 3 races and 2 singles your most likely winners To put all of these horses on one ticket would cost you 216 Using Gordon's formula you can do this for only 24 with the guarantee of 5 or 6 winners on one ticket if you have a winner in each race There is no other place on the planet you can find this kind of incredibly valuable knowledge
