amphitheaters by considering the size and shape of the playhouses the orientation of the stages within the open air yards and the presence of roofs shading the stage Examining the natural lighting of indoor private playhouses Graves takes note of performance times and the size and placement of windows to evaluate the amount of daylight available in various hall playhouses He contrasts the natural light with the artificial light produced for the Court masques Few of the special effects common in Court performances however were used in the production of plays Considering the placement and manipulation of lighting instruments Graves reconstructs the artificial lighting at the professional indoor hall playhouses He discusses the artificial light at the Salisbury Court and Cockpit in Court playhouses and maintains that even though one might expect otherwise the use of hand held property light was essentially the same indoors as outdoors Graves concludes by focusing on the overall visual effect in a scene from Webster s Duchess of Malfi **Shakespeare** Dr. Surinder Mohan
