Shaping a Nation Stephen M. Lyon, Iain R. Edgar, Ali Khan, 2010 The key to transforming a society into what it should be is apparently linked inextricably to education This book draws the attention of readers to the implications of formal education for the state as a powerful tool that can convert the mindset of the masses The book is particularly pertinent in view of how education is being used and misused in Pakistan especially with reference to religious education The contributors subscribe to a generally positive view of education and support efforts at widening access to formal education both in the richer and poorer parts of the world They recognise however that education comes with consequences Some perhaps most of these may be perceived as beneficial but some of those consequences are undesirable and can be highly damaging to a particular population or segment of a population Thus it is clear that while literacy in Pakistan has slowly but steadily improved there has been a corresponding level of social fragmentation and dissatisfaction within the country To illustrate their viewpoints the contributors examine the impact of General Zia's Islamisation programmes on education in the 1980s General Zia's government tinkered with education in such profound ways that those programmes continue to shape the scope of what is possible within formal education in Pakistan Thus this volume includes discussions of formal religious schools in Pakistan The authors also examine the wide rift between the various state funded and private schooling opportunities available in Pakistan State funded

education currently lags behind the agreed goals set out by the UN in their Millennium Development Goals and this inadequate provision of state funded education has left a vacuum for other groups to move in and introduce rival pedagogical agendas. All of the contributions in this volume focus on particular aspects of education across Pakistan. Some are ethnographic and anthropological, some historical, some pedagogical, some are clearly influenced by social policy agendas. They seek to identify a number of very real and complex sets of issues involved in providing high quality and mass education across Pakistan. The language of instruction, the source of financing, the nationalist and religious agendas embedded within the curricula, gender role expectations and impositions, the historical legacies which have shaped the educational environment are all touched upon. Nestled in amongst the complex issues are examples of very high quality education and dedicated educationalists who achieve little miracles every day. Thus this volume portrays a range of views on how education in Pakistan is what it could be and perhaps most importantly what it ought to be.

Shaping Our Nation Michael Barone, 2013-10-01 It is often said that America has become culturally diverse only in the past quarter century But from the country s beginning cultural variety and conflict have been a centrifugal force in American politics and a crucial reason for our rise to power The peopling of the United States is one of the most important stories of the last five hundred years and in *Shaping our Nation* bestselling author and demographics expert Michael Barone illuminates a new angle on America s rise using a vast array of political and social data to show America is the product of a series large unexpected mass movements both internal and external which typically lasted only one or two generations but in that time reshaped the nation and created lasting tensions that were difficult to resolve Barone highlights the surprising trends and connections between the America of today and its migrant past such as how the areas of major Scots Irish settlement in the years leading up to the Revolutionary War are the same areas where John McCain performed better in the 2008 election than George W Bush did in 2004 and how in the years following the Civil War migration across the Mason Dixon line all but ceased until the annealing effect that the shared struggle of World War II produced Barone also takes us all the way up to present day showing what the

surge of Hispanic migration between 1970 and 2010 means for the elections and political decisions to be made in the coming decades Barone shows how from the Scots Irish influxes of the 18th century to the Ellis Island migrations of the early 20th and the Hispanic and Asian ones of the last four decades people have moved to America in part in order to make a better living but more importantly to create new communities in which they could thrive and live as they wanted And the founders formula of limited government civic equality and tolerance of religious and cultural diversity has provided a ready and useful template for not only to coping with these new cultural influences but for prospering as a nation with cultural variety

Nation-Building in Afghanistan Conor Keane,2016-03-31 Why has the US so dramatically failed in Afghanistan since 2001 Dominant explanations have ignored the bureaucratic divisions and personality conflicts inside the US state This book rectifies this weakness in commentary on Afghanistan by exploring the significant role of these divisions in the US s difficulties in the country that meant the battle was virtually lost before it even began The main objective of the book is to deepen readers understanding of the impact of bureaucratic politics on nation building in Afghanistan focusing primarily on the Bush Administration It rejects the rational actor model according to which the US functions as a coherent monolithic agent Instead internal divisions within the foreign policy bureaucracy are explored to build up a picture of the internal tensions and contradictions that bedevilled US nation building efforts The book also contributes to the vexed issue of whether or not the US should engage in nation building at all and if so under what conditions Annual Report of the Board of
