Sigilla Regum Reges Sigillorum:

Ruthenians (the Rus') in the Kingdom of Hungary (11th to mid- 14th Century) Myroslav Voloshchuk, 2021-08-24
This book presents a collective portrait of the inhabitants of the 11th and Angevin era Hungary identified by their countrymen as Rutheni. Many members of this group hailed from the lands of Halych, Chernihiv, Kyiv and Volhynia and migrated to Hungary under the pressure of circumstances, eventually carving out for themselves a position of prominence in the kingdom's social hierarchy and political affairs. Drawing on a range of sources, this is the first work to make extensive use of Latin language documents to throw light on the vicissitudes of the life of Rus settlers and those bearing Rus-related names or bynames in medieval Central Europe, revealing their important role in contemporary social and political life. Seals and their Context in the Middle Ages Phillipp R. Schofield, 2015-01-08
Seals and their Context in the Middle Ages offers an extensive overview of approaches to and the potential of sigillography as well as introducing a wider readership to the range of interest and artistry of medieval seals. Seals were used throughout medieval society in a wide range of contexts: royal, governmental, ecclesiastical, legal, in trade and commerce, and on an individual and personal level. The fourteen papers presented here, which originate from a conference held in Aberystwyth in April 2012, focus primarily on British material, but there is also useful reference to continental Europe. The volume is divided into three sections looking at the history and use of seals as symbols and representations of power and prestige in a variety of institutional, dynastic, and individual contexts; their role in law and legal practice; and aspects of their manufacture, sources, and artistic attributes. Importantly, and distinctively, the volume moves beyond the study of high status seals to consider such themes as the social and economic status of seal makers, the nature and meaning, including reflections of deliberate wit and boastfulness, of specific motifs employed at various levels of society, and the distribution of seals in relation to the location of, for instance, religious institutions and along major routeways. In so doing, it sets out ways in which sigillography can open new pathways into the study of non-elites and their cultures in medieval society. **A Companion to Seals in the Middle Ages**, 2019-02-11
A Companion to Seals in the Middle Ages is a cross-disciplinary collection of fourteen essays on medieval sigillography. It is organized thematically and it emphasizes important, often cutting-edge methodologies for the study of medieval seals and sealing cultures. As the chronological, temporal, and geographic scope of the essays in the volume suggests, the study of the medieval seal, its manufacture, materiality, usage, iconography, inscription, and preservation, is a rich endeavour that demands collaboration across disciplines as well as between scholars working on material from different regions and periods. It is hoped that this collection will make the study of medieval seals more accessible and will stimulate students and scholars to employ and further develop these material and methodological approaches to seals. Contributors are: Adrian Ailes, Elka Cwiertnia, Paul Dryburgh, Emir O. Filipović, Oliver Harris, Philippa Hoskin, Ashley Jones, Andreas Lehnertz, John McEwan, Elizabeth A. New, Jonathan Shea, Caroline Simonet, Angelina A. Volkoff, and Marek L. Wojcik. *Hoards, grave goods, jewellery* Mária

Vargha,2015-10-31 This monograph examines one specific hoard horizon which is connected to the Mongol invasion of Hungary 1241 42 Though this study focuses on hoards connected to the Mongol invasion it is also relevant beyond this specific context **Quaestiones Medii Aevi Novae** ,2004 **A United Europe of Things** Jakub Sawicki,Michael Lewis,Mária Vargha,2024-01-01 This volume studies high and late medieval material culture in a Pan European context The idea of unity of culture in Medieval Latin Europe is well known in historical texts especially when it concerns the so called Europe North of the Alps This book investigates the similarities and differences in material culture between areas regions and political entities and opens the dialogue for a more interregional discussion The editors acknowledge that there are numerous challenges in understanding the phenomenon the volume addresses the fundamental one being defining or even redefining a common material culture of Europe Important in determining this is greater appreciation of how objects reflect interactions between peoples both local and foreign which can be driven by a variety of factors including trade conflict and diplomacy etc But just as important is observing the differences between things across Europe reflecting developments and transformations its cultural social and economic history These works are traditionally presented in isolation or at the local level maybe even in very specialized tomes as often it is thought their observation are not relevant to wider discourses Conversely what is clear however is that by interconnecting these seemingly introvert studies of specific artefact types or sites etc readers can better appreciate the similarities and differences in material culture across Europe This book is of interest to researchers in archaeology and material culture *Sigilla Regum - Reges Sigillorum* Géza Érszegi,2002
