Bastedo, 2025-11-27 This edited book brings together leading scholars to share ongoing research on the diffusion of holistic admissions practices around the world Many countries have adopted holistic admissions practices and some have used them for incoming students for over two decades but these developments have been rarely noted in policy and media discussions about university admissions Chapters in this volume explore the similar challenges

global institutions face related to college access admissions transparency and the potential for corruption and how their admissions practices affect equity access and student diversity Translating a body of existing transnational research this volume provides strategies that higher education scholars policymakers and practitioners can use to improve admissions practices and policies in global contexts International Trends in University Governance Michael Shattock,2014-06-05 Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking Historically universities were run by their academic communities but as mass higher education has taken root as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown pressure has mounted for a modernisation of governance structures One aspect of modernisation particularly important in many European systems and in Japan has been the decision by governments to give institutions greater autonomy more control over their budgets and legal responsibility for the employment of their staff International trends to introduce greater competition between institutions to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership a more systematic involvement of external stakeholders and a more corporate style of governance At the same time this has often led to a sense of loss of collegiality a redistribution of authority and a growing gap between the centre and the periphery within universities This book analyses governance change in nine major higher education systems Australia Finland France Germany Italy Japan Norway the UK and the USA each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical cultural political and social characteristics of the different systems Michael Shattock is a leading authority on university governance this study offers the most up to date account of governance reform in a range of higher education systems an analysis of the common trends and an assessment of their impact on the idea of a university It will be essential reading for academics postgraduates and practitioners in higher education **The Cambridge Handbook of Comparative Law** Mathias Siems,Po Jen Yap,2024-02-01 Comparative law is a common subject matter of research and teaching in many universities around the world and the twenty first century has aptly been termed the era of comparative law This Cambridge Handbook of Comparative Law presents a truly global perspective of comparative law today The contributors are drawn from all parts of the world to provide different perspectives on how we understand the law and how it operates in practice In substance the Handbook contains 36 chapters covering a broad range of topics divided under the following headings Methods of Comparative Law Part I Legal Families and Geographical Comparisons Part II Central Themes in Comparative Law Part III and Comparative Law beyond the State Part IV *By the Power Vested in Me* Michael Stambolis-Ruhstorfer,2025-06-03 In both the United States and France each side of the legal battle over same sex marriage and parenthood relied heavily on experts Despite the similarity of issues however lawmakers in each country turned to different sets of authorities from economists and psychoanalysts to priests and ordinary people

They even prized different types of expertise empirical research in the United States versus abstract theory in France Exploring the legalization of same sex marriage in the United States and France this book sheds new light on the power of experts to influence high stakes democratic debates Drawing on extensive interviews and ethnographic observation Michael Stambolis Ruhstorfer traces the divergences between the two countries showing why some experts are ubiquitous in one but absent in the other He argues that lawmakers judges lawyers journalists and activists covet something only experts can provide the credibility and aura of authority or expert capital which they deploy to advance their agendas Expert capital is not derived from scientific or technical merit alone but is produced through cultural norms material resources and social relationships which vary greatly across national contexts Through the story of the fight over gay rights *By the Power Vested in Me* reveals how and why certain experts but not others obtain the authority to shape public opinion and policy At a time of soaring public distrust in experts this book offers new ways to understand the contested political role of expertise and its consequences **Making 21st Century Knowledge Complexes** Julie Miao, Paul Benneworth, Nicholas A.

Phelps, 2015-05-15 The world has changed profoundly since the publication of the influential book *Technopoles of the World* As policy makers and practitioners attempt to harness science technology and innovation to create dynamic and vibrant cities many wonder how relevant Manuel Castells and Peter Hall's messages are today Twenty years later this book returns to their concepts and practices to update their message for the 21st century **Making 21st Century Knowledge Complexes** *Technopoles of the World Revisited* argues that the contemporary technopole concept encompasses three new dimensions Firstly building synergy between partners is vital for the success of complexes Secondly the correct governance arrangements are critical to balance competing interests inevitable in any science city project Thirdly new evaluation mechanisms are indispensable in allowing policy makers to steer their long term benefits Through twelve case study chapters and a detailed comparative analysis this book provides academics policy makers and practitioners with critical insights in understanding managing and promoting today's high technology urban complexes *Higher Education: Handbook of Theory and Research* Michael B. to have attracted annual contributions from distinguished scholars throughout the world **Towards European Science**
Linda Wedlin, Maria Nedeva, 2015-12-18 Since the European Research Area was launched at the beginning of the century significant efforts have been made to realise the vision of a coherent space for science and research in Europe But how does one define such a space and measure its development This timely book analyses the dynamics of change in the policy and governance of science and research within Europe over the past decade It widens the scope of traditional policy analysis by focusing attention on the interaction between policy rationales new governance mechanisms and the organisational dynamics of the scientific field The contributors build a novel analytical framework to understand the European research space as one shifting from a fragmented space of Science in Europe to one that is labeled European Science The chapters explore the dynamics of this shift through the lenses of political science organisation theory science policy and related analytical traditions Towards European Science is an interdisciplinary book which will attract a wide set of scholars and professionals interested in science policy governance and scientific practice It will also be of use to university leaders and managers as well as policy makers and practitioners working on issues of internationalisation and the Europeanisation of science
