Learning to Teach Geography in the Secondary School David Lambert, David Balderstone, 2012-08-21 Learning to Teach

Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps them acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and creative lessons. This fully revised and updated second edition takes account of new legislation and important developments in geography education, including literacy, numeracy, citizenship and GIS. Brand new chapters in this edition provide essential guidance on fieldwork and using ICT in the context of geography teaching and learning. Chapters on teaching strategies, learning styles and assessment place the learner at the centre stage and direct advice and activities encourage successful practice. Designed for use as a core textbook, *Learning to Teach Geography in the Secondary School* is essential reading for all student teachers of geography who aspire to become effective, reflective teachers.

Praise for the first edition of *Learning to Teach Geography in the Secondary School*: This is a practical and visionary book as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative conceptual framework. *The Times Educational Supplement*. This is a modern, powerful, relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales. *Educational Review*.

Continuum Guide to Geography Education Graham Butt, 2010-07-15. A reference guide to geography education. Entries arranged alphabetically cover government legislation and reports, famous geography educators, resources, research findings, movements, trends, debates and issues, organizations and key concepts. An analytical index helps the reader to choose paths through the book, connecting entries.

Geography John Morgan, David Lambert, 2005-06-21. When Geography specialists decide they want to teach it, can be a daunting prospect to enter a real classroom, no matter how much subject knowledge they already possess. *Geography Teaching School Subjects 11-19* puts the subject into perspective and shows new teachers and student teachers how to make Geography accessible and interesting for their pupils. Divided into three sections, the book examines the theory and practice of teaching geography. Section one explores how teachers can frame their own knowledge for classroom practice; section two focuses on Geography in the classroom and curriculum development as well as aspects of pedagogy and lesson design; evaluation and assessment; section three focuses on the teachers themselves and how they can view and work on professional development within their own subject area.

Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone, 2015-05-20. *Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support.

structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school based initial teacher education in mind Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses Educational Review

Geographical Education in a Changing World John Lidstone, Michael Williams, 2006-07-19 This book results from the work of the Commission on Geographical Education of the International Geographical Union Part 1 focuses on the distinctive traditions of school geography Part 2 reviews the state of school geography on a broad continental basis including national case studies by local experts The final chapters extrapolate from the present and point to likely future developments in the subject again with examples drawn from various countries Geography of Education Colin Brock, 2016-09-22 Geography of Education sets out the scope of this emergent interdisciplinary field It illustrates the essential affinity of geographical and educational studies by emphasising the geographical factors influencing formal education systems and other forms of knowledge transfer Colin Brock begins by arguing the theoretical synergy that exists between the nature of both geography and educational studies as disciplines This is then exemplified by an analysis of the emergence of systems of schooling under the influence of religious political and economic forces The author also considers informal and non formal modes of education and argues that the huge diversity of such provision creates a rich resource for research into geographies of education In the final chapters the author turns his attention to the role of cyberspace which has its own geography in learning and considers education as a form of humanitarian response to issues of environmental sustainability By bringing together a wide range of themes and topics relating to both education and geography Colin Brock argues that the geographical approach should inform the evolution of all types of educational provision around the world Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians

Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map. Prof Dennis Hayes, Oxford Brookes University, UK. A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake. Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts, ideas and skills to a more ethics-based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In this book the new approach is critically examined within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike. *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself.

Understanding GCSE Geography Ann Bowen, John Pallister, 2002. This Foundation book has simplified text covering the same material as the core student book with the same pagination. Written to AQA A specification it encourages the development of geographical skills. There are activity and test questions and guidance for students on tackling coursework.

Debates in Geography Education Mark Jones, David Lambert, 2017-09-07. *Debates in Geography Education* encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include geography's identity as an academic discipline, what constitutes knowledge in geography, places and regional geography, what it means to think geographically, constructing the curriculum, how we link assessment to making progress in geography, the contribution of fieldwork and outdoor experiences, technology and the use of Geographical

Information school geography and employability understanding the gap between school and university geography evidence based practice and research in geography education The comprehensive rigorous coverage of these key issues together with carefully annotated selected further reading will help support and shape further research and writing Debates in Geography Education is a key resource that is essential reading for all teachers and researches who wish to extend their grasp of the place of geography in education Mark Jones is Senior Lecturer in Education at the University of the West of England Bristol UK David Lambert is Professor of Geography Education at UCL Institute of Education London UK
