ravens lottery and old evidence paradoxes and to a series of questions These include whether explanations or predictions furnish more evidential weight whether individual hypotheses or entire theoretical systems can receive evidential support what counts as a scientific discovery and what sort of evidence is required for it The historical questions include whether Jean Perrin had non circular evidence for the existence of molecules what type of evidence J J Thomson offered for the existence of the electron and whether as is usually supposed he really discovered the electron Achinstein proposes answers in terms of the concepts of evidence introduced As the premier book in the fabulous new series Oxford Studies in Philosophy of Science this volume is essential for philosophers of science and historians of science as well as for statisticians scientists with philosophical interests and anyone curious about scientific reasoning

Behavioural Aspects of Auditors' Evidence Evaluation Magda Abou-Seada, Magdy Abdel-Kader, 2017-11-22 This title was first published in 2003 Based on psychological research auditing studies have focused on belief revision as a way of understanding how auditors evaluate evidence

Moreover a belief revision process is consistent with US auditing standards UK standards on the other hand do not appear to give guidance on the process to follow when evaluating evidence Research in the US indicates that auditors do in fact follow a belief revision process in accordance with US standards Employing survey research based on personal interviews with a number of experienced UK auditors this book demonstrates how auditors prefer to be described as following the open mind approach Building on the findings of the interviews the book then describes an experimental study to investigate the differences between the belief revision and open mind approaches in terms of their effect on the efficiency and effectiveness of the audit process The book concludes that the belief revision approach would improve the efficiency of the audit process without affecting its effectiveness or outcomes

According to the Evidence Henry Cecil, 2012-09-30 Alec Morland is on trial for murder He has tried to remedy the ineffectiveness of the law by taking matters into his own hands In this fascinating murder trial you will not find out until the very end just how the law will interpret his actions Will his defence be accepted or does a different fate await him

Philosophy and Engineering Diane P. Michelfelder, Byron Newberry, Qin Zhu, 2016-11-26 This volume the result of an ongoing bridge building effort among engineers and humanists addresses a variety of philosophical ethical and policy issues emanating from engineering and technology Interwoven through its chapters are two themes often held in tension with one another Exploring Boundaries and Expanding Connections Expanding Connections highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with policy makers lay designers and other members of the public It also speaks to reflections included in this volume on the connections between fact and value reason and emotion engineering practice and the social good and of course between engineering and philosophy Exploring Boundaries highlights contributions that focus on some type of demarcation Public policy sets a boundary between what is regulated from what is not academic disciplines delimit themselves by their subjects and methods of inquiry and professions approach problems with unique goals and by using concepts and language in

particular ways that create potential obstacles to collaboration with other fields These and other forms of boundary setting are also addressed in this volume Contributors explore these two themes in a variety of specific contexts including engineering epistemology engineers social responsibilities engineering and public policy making engineering innovation and the affective dimensions of engineering work The book also includes analyses of social and ethical issues with emerging technologies such as 3 D printing and its use in medical applications as well as social robots Initial versions of the invited papers included in this book were first presented at the 2014 meeting of the Forum on Philosophy Engineering and Technology fPET held at Virginia Tech in Blacksburg Virginia USA The volume furthers fPET s intent of extending and developing the philosophy of engineering as an academic field and encouraging conversation promoting a sense of shared enterprise and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry

Experience, Evidence, and Sense Anna Wierzbicka, 2010-06-24 This book is based on two ideas first that any language English no less than any other represents a universe of meaning shaped by the history and experience of the men and women who have created it and second that in any language certain culture specific words act as linchpins for whole networks of meanings and that penetrating the meanings of those key words can therefore open our eyes to an entire cultural universe In this book Anna Wierzbicka demonstrates that three uniquely English words evidence experience and sense are exactly such linchpins Using a rigorous plain language approach to meaning analysis she unpacks the dense cultural meanings of these key words disentangles their multiple meanings and traces their origins back to the tradition of British empiricism In so doing she reveals much about cultural attitudes embedded not only in British and American English but also English as a global language An interdisciplinary work *Experience Evidence and Sense* will be of interest to both scholars and students in linguistics and English as well as historians of ideas sociologists anthropologists literary scholars and scholars of communication
