Missing Links John Reader,2011-10-27 This is the story of the search for human origins from the Middle Ages when questions of the earth s antiquity first began to arise through to the latest genetic discoveries that show the interrelatedness of all living creatures Central to the story is the part played by fossils first in establishing the age of the Earth then following Darwin in the pursuit of possible Missing Links that would establish whether or not humans and chimpanzees share a common ancestor John Reader s passion for this quest palaeoanthropology began in the 1960s when he reported for Life Magazine on Richard Leakey s first fossil hunting expedition to the badlands of East Turkana in Kenya Drawing on both historic and recent research he tells the fascinating story of the science as it has developed from the activities of a few dedicated individuals into the rigorous multidisciplinary work of today His arresting photographs give a unique insight into the fossils the discoverers and the settings His vivid narrative reveals both the context in which our ancestors evolved and also the realities confronting the modern scientist The story he tells is peopled by eccentrics and enthusiasts and punctuated by controversy and even fraud It is a celebration of discoveries Neanderthal Man in the 1850s Java Man 1891

How Modern Science Came into

the World Floris Cohen, 2025-10-01 Once upon a time The Scientific Revolution of the 17th century was an innovative concept that inspired a stimulating narrative of how modern science came into the world Half a century later what we now know as the master narrative serves rather as a strait jacket so often events and contexts just fail to fit in No attempt has been made so far to replace the master narrative H Floris Cohen now comes up with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome Building forth on his earlier *The Scientific Revolution A Historiographical Inquiry* 1994 his new book takes the latest researches duly into account while connecting these in highly innovative ways It is meant throughout as a constructive effort to break up all too deeply frozen patterns of thinking about the history of science

Protecting Intellectual Property in the Arabian Peninsula David Price, Alhanoof AlDebasi, 2017-09-13 This work examines the endeavours of the Arabian Peninsula States namely the Gulf Cooperation Council member States of Bahrain Kuwait Oman Qatar Saudi Arabia and the UAE as well as Jordan and Yemen as prospective GCC members in establishing national intellectual property protection regimes which both meet their international treaty obligations and are also congruent with their domestic policy objectives It uses the WTO s TRIPS Agreement of 1995 as the universal benchmark against which the region s laws are assessed The challenges faced by the States in enforcing their intellectual property laws receive particular attention Protecting Intellectual Property in the Arabian Peninsula considers the changing nature of the States intellectual property laws since 1995 It argues that the decade immediately following the TRIPS Agreement was marked by a period of foreign forces shaping or influencing the character of the States intellectual property legislative regimes primarily through multilateral or bilateral trade based agreements The second and current decade however see a significant shift away from foreign influences and a move towards domestic and regional imperatives and initiatives taking over The work also examines regional initiatives for the protection of traditional knowledge and cultural heritage as areas of intellectual property which fall outside the parameters of the TRIPS Agreement but which are of significant concern to the States and other developing countries and to which they are giving increasing attention in terms of providing proper protection
