geographies of everyday living **Introducing Human Geographies** Kelly Dombroski, Mark Goodwin, Junxi Qian, Andrew Williams, Paul Cloke, 2024-07-09 *Introducing Human Geographies* is a travel guide into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. This updated and much extended fourth edition includes a diverse range of authors and topics from across the globe with a completely revised set of contributions reflecting contemporary concerns in human geography. Presented in four parts with a streamlined structure, it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject. It maps out the big foundational ideas that have shaped the discipline past and present, explores key research themes being pursued in human geography's various sub-disciplines, and identifies emerging collaborations between human geography and other disciplines in the areas of technology, justice, and environment. This comprehensive, stimulating, and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps, and photos. The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society, place, culture, and space.

Cultural Geographies John Horton, Peter Kraftl, 2013-10-08 Cultural geography is a major, vibrant subdiscipline of human geography. Cultural geographers have done some of the most important, exciting, and thought-provoking, zesty work in human geography over the last half century. This book exists to provide an introduction to the remarkably diverse, controversial, and sometimes infuriating work of cultural geographers. The book outlines how cultural geography, in its various forms, provides a rich body of research about cultural practices and politics in diverse contexts. Cultural geography offers a major resource for exploring the importance of cultural materials, media, texts, and representations in particular contexts and is one of the most theoretically adventurous subdisciplines within human geography, engaging with many important lines of social and cultural theory. The book has been designed to provide an accessible, wide-ranging, and thought-provoking introduction for students studying cultural geography or specific topics within this subdiscipline. Through a wide range of case studies and learning activities, it provides an engaging introduction to cultural geography. Everyday America Chris Wilson, Paul Erling Groth, 2003-02 A collection of seventeen essays examining the field of American cultural landscapes past and present. The role of J. B. Jackson and his influence on the field is explored in many of them. Better Books for Children Robert Maxwell & Co, 1963 **Manufacturers' Record**, 1919 **Ethics in Everyday Places** Tom Koch, 2022-11-01 An exploration of moral stress, distress, and injuries inherent in modern society through the maps that pervade academic and public communications worlds. In *Ethics in Everyday Places*, ethicist and geographer Tom Koch considers what happens when, as he puts it, you do everything right but know you've done something wrong. The resulting moral stress and injury, he argues, are pervasive in modern Western society. Koch makes his argument from the ground up, from the perspective of average

persons and through a revealing series of maps in which issues of ethics and morality are embedded The book begins with a general grounding in both moral stress and mapping as a means of investigation The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences including graphic artists journalists researchers and social scientists Koch expands from the particular to the general from mapmaker and journalist to the readers of maps and news He explores the moral stress and injury in educational funding poverty and income inequality Why aren't we angry that one in eight fellow citizens lives in federally certified poverty transportation modeling seen in the iconic map of the London transit system and the hidden realities of exclusion and U S graft organ transplantation This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress distress and injury and ethics in modern life Written accessibly and engagingly it transforms how we think of ethics personal and professional amid the often conflicting moral injunctions across modern society Copublished with Esri Press **Ordinary Matters** Lorraine Sim,2016-10-20 The first major interdisciplinary study of the ordinary in modernist women's literature and photography that demonstrates how their alternative vision of the everyday extends and often complicates that of their male contemporaries as well as contemporary everyday life theory ENC Focus ,2000 **Narrating the Multispecies World** Michaela Fenske,2025-04-17 In present times we are increasingly witnessing a loss of life especially among animals and plants Some species are becoming extinct while others struggle to adjust to new habitats Human beings are looking for strategies to overcome the effects of climate change and mass extinction The contributors to this volume reflect on how the current problems affect the living world Artists and scholars from around the world share their views on the changes and challenges produced by the effects of the ecological crises in a variety of regions While some of their stories concern loss others offer hope by suggesting new ideas for living together in sustainable harmony within a multispecies world Mathematics & Science in the Real World ,2000 Wild Things Judy Attfield,2020-08-20 What do things mean What does the life of everyday objects reveal about people and their material worlds Has the quest for the real thing become so important because the high tech world of total virtuality threatens to engulf us This pioneering book bridges design theory and anthropology to offer a new and challenging way of understanding the changing meanings of contemporary human object relations The act of consumption is only the starting point of object's lives Thereafter they are transformed and invested with new meanings and associations that reflect and assert who we are Defining designed things as things with attitude differentiates the highly visible fashionable object from ordinary artefacts that are too easily taken for granted Through case studies ranging from reproduction furniture to fashion and textiles to clutter the author traces the connection between objects and authenticity ephemerality and self identity Beyond this she shows the materiality of the everyday in terms of space time and the body and suggests a transition with the passing of time from embodiment to disembodiment Reader's Guide to Books for the Reluctant Reader Library Association.
