Animating the Science Fiction Imagination J. P. Telotte, 2018

Long before flying saucers robot monsters and alien menaces invaded our movie screens in the 1950s there was already a significant but overlooked body of cinematic science fiction

Through analyses of early twentieth century animations comic strips and advertising **Animating the Science Fiction Imagination** unearths a significant body of cartoon science fiction from the pre World War II era that appeared at approximately the same time the genre was itself struggling to find an identity an audience and even a name

In this book author J P Telotte argues that these films helped sediment the genre's attitudes and motifs into a popular culture that found many of those ideas unsettling even threatening

By binding those ideas into funny and entertaining narratives these cartoons also made them both familiar and non threatening clearing a space for visions of the future of other worlds and of change that could be readily embraced in the post war period
