Planning And Engineering Guidelines For The Seismic Retrofitting Of Historic Adobe Structure:

Planning and Engineering Guidelines for the Seismic Retrofitting of Historic Adobe Structures E. Leroy Tolles, Edna E. Kimbro, William S. Ginell, 2003-03-20 Adobe or mud brick has been widely used as a building material in the American Southwest including California The vulnerability of many original adobe structures to damage or destruction from earthquakes has been of great concern The guidelines presented here address the practical aspects of this problem and represent the culmination of 12 years of research and testing on the seismic retrofitting of adobe buildings These guidelines can assist in the planning of seismic retrofitting projects consistent with both conservation principles and established public policy

Seismic Stabilization of Historic Adobe Structures Getty Conservation Institute, 2000-11-30 This book describes tests performed on model adobe buildings to evaluate seismic damage mitigation techniques applicable to the retrofitting of historic and culturally significant adobe structures Part of the Getty Seismic Adobe Project GSAP the three year program outlined in this volume was designed to develop and test minimally invasive inexpensive and easily implemented methods of protecting such structures from severe earthquake damage Small and large scale models were tested on computer controlled shaking tables at Stanford University and at the IIZIS Earthquake Engineering Laboratory in the Republic of Macedonia respectively The authors identify typical failure modes of adobe structures and describe specific retrofit techniques to help minimize such failures Extensive photographic documentation is included

discussion on adobe construction and its use throughout the world over time highlighting characteristics and performance of adobe masonry structures as well as different contributions for cultural heritage conservation Chapter 1 Then the seismic behaviour of adobe masonry buildings is addressed including examples of real performance during recent earthquakes Chapter 2 In the following chapters key research investigations on seismic response assessment and retrofitting of adobe constructions are reviewed The review deals with the following issues mechanical characterization of adobe bricks and adobe masonry Chapters 3 and 4 quasi static and shaking table testing of adobe masonry walls and structures Chapters 5 and 6 non destructive and minor destructive testing for characterization of adobe constructions Chapter 7 seismic strengthening techniques for adobe constructions Chapter 8 and numerical modelling of adobe structures Chapter 9 The book ends with Chapter 10 where some general conclusions are drawn and research needs are identified Each chapter is co authored by a group of experts from different countries to comprehensively address all issues of adobe constructions from a worldwide perspective The information covered in this book is fundamental to support civil engineers and architects in the rehabilitation and strengthening of existing adobe constructions and also in the design of new adobe buildings This information is also of interest to researchers by providing a summary of existing research and suggesting possible directions for future research efforts

Seismic Retrofitting: Learning from Vernacular Architecture Mariana R. Correia, Paulo B.

Lourenco, Humberto Varum, 2015-08-31 Local communities have adapted for centuries to challenging surroundings resulting from unforeseen natural hazards Vernacular architecture often reveals very intelligent responses attuned to the environment Therefore the question that emerged was how did local populations prepare their dwellings to face frequent earthquakes It was to respond to this gap in knowledge that the SEISMIC V research project was instigated and this interdisciplinary international publication was prepared The research revealed the existence of a local seismic culture in terms of reactive or preventive seismic resistant measures able to survive if properly maintained in areas with frequent earthquakes The fundamental contribution and aims of the publication were to enhance The disciplinary interest in vernacular architecture Its contribution to risk mitigation in responding to natural hazards To encourage academic and scientific research collaboration among different disciplines To contribute to the improvement of vernacular dwellings which half of the world's population still inhabits nowadays Fifty international researchers and experts presented case studies from Latin America the Mediterranean Eastern and Central Asia and the Himalayas region with reference to 20 countries i.e. Algeria Bolivia Bhutan Chile China Egypt El Salvador Greece Haiti Italy Japan Mexico Morocco Nepal Nicaragua Peru Romania Taiwan Turkey and a closer detailed analysis of Portugal This publication brings together 43 contributions with new perspectives on seismic retrofitting techniques and relevant data addressing vernacular architecture an amazing source of knowledge and to this day home to 4 billion people

Advances in the Protection of Museum Collections from Earthquake Damage Jerry Podany, J. Paul Getty Museum, 2008 For nearly three decades the J Paul Getty Museum has played a leading role in the development of seismic mitigation for museum collections Contributors to this volume ranging from museum conservators mount makers and historical archaeologists to seismologists and structural engineers discuss and illustrate a wide variety of earthquake mitigation efforts for collections from the simple and inexpensive to the complex and costly The book's essays examine the techniques applied to large collections and to small house museums to exhibition cases containing objects as well as to monumental works of art and historical structures Approaches range from securing and restraining objects to decoupling them from the ground through a variety of base isolation mechanisms These pioneering efforts have been developed in the face of significant challenges since as any engineer conservator or mount maker who has undertaken this work can attest a small sculpture can often be a far greater challenge to protect than a multistory building
