Postwar Moment Militaries Masculinities And International Peacekeeping:

The Postwar Moment Cynthia Cockburn, Dubravka Žarkov, 2002 Will peace bring a democratic inclusive and equal society This depends on many factors this title argues that one of them crucial but often overlooked is the importance accorded to transforming gender power relations Men, Militarism, and UN Peacekeeping Sandra Whitworth, 2004 In this important controversial and at times troubling book Sandra Whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the UN flag Whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers Examining evidence from Cambodia and Somalia she argues that sexual and other crimes can be seen as expressions of a violent hypermasculinity that is congruent with militarized identities but entirely incongruent with missions aimed at maintaining peace She also asserts that recent efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of militaries conflict and women This unsettling critique of UN operations which also investigates the interplay between gender and racial stereotyping in peacekeeping has the power to change conventional perceptions with considerable policy implications

International Peacekeeping: The Yearbook of International Peace Operations Louise Olsson, 2009-05-15 This book expands the inquiry of United Nations peace operations to incorporate their effects on the equality of the host state To achieve this a mainstream based analytical framework additionally informed by suggestions from feminist research is formulated and applied to the case of Timor Leste The study makes two contributions Firstly it enhances our ability to trace changes in the power balance between men and women by developing the concept of gender power relations especially introducing security equality understood as the distribution of protection between men and women Secondly when the concept of gender power relations had been developed to enable a more fine grained analysis the project proceeds to systematically explore effects of peace operations on these power relations in the host state The results shows the importance of considering the differences in situation of men and women in order both to avoid doing harm and to obtain a more equal peace **Global Masculinities** Mangesh Kulkarni, Rimjhim Jain (Associate Editor), 2018-11-20 What does it mean to be male in today s world This volume interrogates the myriad practices and myth making that underlie dominant and subordinate constructions of masculinities around the world Challenging the patriarchal bias that restricts alternative understanding of masculinities this volume documents and shares evidence insights and direction on how men and boys can creatively contribute to gender equality in the twenty first century The book highlights the many lives of men and their interactions with socioeconomic and political processes including the family fatherhood migration development and violence critiques hegemonic masculinities and grapples with effective practices that engage men in the empowerment of women explores how cultures of masculinity can be transformed to promote social justice conflict resolution and peace building

within and across nations The book will be indispensable to researchers interested in critical masculinity studies women's studies sociology social anthropology law public policy political science and international relations It will also be of great relevance to government officials NGO activists and other practitioners concerned with gender health and development issues

The SAGE Handbook of Feminist Theory Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken-for-granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences

Building Walls and Dissolving Borders Max O. Stephenson, 2016-05-23 Walls play multiple social, political, economic and cultural roles and are linked to the fundamental question of how human beings live together. Globalization and urbanization have created high population density, rapid migration, growing poverty, income inequality and frequent discontent and conflict among heterogeneous populations. The writers in this volume explore how walls are changing in this era when social containers have become porous, proximity has been redefined, circulation has intensified and the state as a way of organizing political life is being questioned. The authors analyze how walls articulate with other social boundaries to address feelings of vulnerability and anxiety and how they embody governmental processes, public and social contestation, fears and notions of identity and alterity. This book's authors explore walls as the consequence of a changing web of social relationships. Whether walls are physical objects on the landscape or metaphors for difference among specific groups or communities, the writers consider them as heterotopias, powerful sites around which ways of living together are contested and transformed. They also investigate how architectural planning concerning walls may de facto become a means of waging war as well as how demolishing walls may give way to new ways of imagining security.

Gender, Governance and International Security Nicola Pratt, Sophie Richter-Devroe, 2016-04-08 The United Nations Security Council in 2000 unanimously passed a resolution calling for women's increased participation in conflict prevention and peacebuilding as well as their protection during conflict. This marked the first time that the UN Security Council explicitly addressed gender issues in conflict and post-conflict situations. But what difference has this international agenda on Women, Peace and Security made to women's lives on the ground and to the governance of international peace and security? This volume provides a critical evaluation of the mainstreaming of gender issues in matters of international peace and security resulting from the passage of Resolution 1325 in 2000. It considers how this agenda actually plays out in different contexts and with what implications for women's activism and for peace and security. The picture that emerges is not uniform, obliging us to reconsider the links between gender, conflict, different visions of peace and consequently different projects of peacebuilding. Consequently, the book poses new questions for transnational feminist scholars and activists. This book was based on a special issue of the *International Feminist Journal of Politics*.

Geographies of Peace Fiona McConnell, Nick Megoran, Philippa Williams, 2014-06-20 From handshakes on the White House lawn to Picasso's iconic dove of peace, the images and stereotypes of peace are powerful, widespread and easily recognizable. Yet if we try to offer a concise definition of peace, it is altogether a more complicated exercise. Not only is peace an emotive and value-laden concept, it is also abstract, ambiguous and seemingly inextricably tied to its antithesis, war. And it is war and violence that have been so compellingly studied within critical geography in recent years. This volume offers an attempt to redress that balance and to think more expansively and critically about what peace means and what geographies of peace may entail. The editors begin with an examination of critical approaches to peace in

other disciplines and a helpful genealogy of peace studies within geography The book is then divided into three sections The opening section examines how the idea of peace may be variously constructed and interpreted according to different sites and scales The chapters in the second section explore a remarkably wide range of techniques of peacemaking This widens the discussion from the archetypal image of top down diplomatic state led initiatives to imperial boundary making practices grassroots cultural identity assertion boycotts self immolation ex paramilitary community activism and protective accompaniment The final section shifts the scale and focus to everyday personal relations and a range of practices around the concept of coexistence In their concluding chapter the editors spell out some of the key questions that they believe a geography of peace must address What spatial factors have facilitated the success or precipitated the failure of some peace movements or diplomatic negotiations Why are some ideologies productive of violence in some places but co operation in others How have some communities been better able to deal with religious racial cultural and class conflict than others How have creative approaches to sharing sovereignty mitigated or transformed territorial disputes that once seemed intractable Geographies of Peace is the first book wholly devoted to exploring the geography of peace Drawing on both recent advances in social and political theory and detailed empirical research covering four continents it makes a significant intervention into current debates about peace and violence

Gendered Agency in War and Peace Maria O'Reilly, 2017-11-03 This book examines how gendered agency emerges in peacebuilding contexts It develops a feminist critique of the international peacebuilding interventions through a study of transitional justice policies and practices implemented in Bosnia Herzegovina and local activists responses to official discourses surrounding them Extending Nancy Fraser s tripartite model of justice to peacebuilding contexts the book also advances notions of recognition redistribution and representation as crucial components of gender just peace It argues that recognising women as victims and survivors of conflict achieving a gender equitable distribution of material and symbolic resources and enabling women to participate as agents of transitional justice processes are all essential for transforming the structural inequalities that enable gender violence and discrimination to materialise before during and after conflict This study establishes a new avenue of analysis for understanding responses and resistances to international peacebuilding by offering a sustained engagement with feminist social and political theory

Sex in Peace Operations Gabrielle Simm, 2013-04-25 This book critically re evaluates the problem of sex between international personnel and local people and offers regulatory solutions to legal problems

Women in the Military and in Armed Conflict Helena Carreiras, Gerhard Kümmel, 2008-08-26 The debate about the role of women in war violent conflict and the military is not only a long and ongoing one it is also a heated and controversial one The contributions to this anthology come from experts in the field who approach the topic from various angles thus offering different and at times diverging perspectives The reader will therefore gain in depth insight into the most important aspects and positions in the debate

Gender, Agency, and Coercion S. Madhok, A. Phillips, K. Wilson, 2013-01-16 Drawing on recent feminist discussions

this collection critically reassesses ideas about agency exploring the relationship between agency and coercion in greater depth and across a range of disciplinary perspectives and ethical contexts *Team Diversity and Inclusion in Defence and Security* Barbara T. Nadjie Al-Ali, Nicola Pratt, 2009-01-07 In the run up to war in Iraq the Bush administration assured the world that America s interest was in liberation especially for women The first book to examine how Iraqi women have fared since the invasion What Kind of Liberation reports from the heart of the war zone with dire news of scarce resources growing unemployment violence and seclusion Moreover the book exposes the gap between

rhetoric that placed women center stage and the present reality of their diminishing roles in the new Iraq Based on interviews with Iraqi women s rights activists international policy makers and NGO workers and illustrated with photographs taken by Iraqi women What Kind of Liberation speaks through an astonishing array of voices Nadjé Al Ali and Nicola Pratt correct the widespread view that the country s violence sectarianism and systematic erosion of women s rights come from something inherent in Muslim Middle Eastern or Iraqi culture They also demonstrate how in spite of competing political agendas Iraqi women activists are resolutely pressing to be part of the political transition reconstruction and shaping of the new Iraq

On the Frontlines Fionnuala Ní Aoláin, Dina Francesca Haynes, Naomi Cahn, 2011-11-16 Gender oppression has been a feature of war and conflict throughout human history yet until fairly recently little attention was devoted to addressing the consequences of violence and discrimination experienced by women in post conflict states Thankfully that is changing Today in a variety of post conflict settings the former Yugoslavia Afghanistan Colombia Northern Ireland international advocates for women s rights have focused bringing issues of sexual violence discrimination and exclusion into peace making processes In On the Frontlines Fionnuala Ní Aoláin, Dina Francesca Haynes and Naomi Cahn consider such policies in a range of cases and assess the extent to which they have had success in improving women s lives They argue that there has been too little success and that this is in part a product of a focus on schematic policies like straightforward political incorporation rather than a broader and deeper attempt to alter the cultures and societies that are at the root of much of the violence and exclusions experienced by women They contend that this broader approach would not just benefit women however Gender mainstreaming and increased gender equality has a direct correlation with state stability and functions to preclude further conflict If we are to have any success in stabilizing failing states gender needs to move to fore of our efforts With this in mind they examine the efforts of transnational organizations states and civil society in multiple jurisdictions to place gender at the forefront of all post conflict processes They offer concrete analysis and practical solutions to ensuring gender centrality in all aspects of peace making and peace enforcement
