Falun Gong in the United States Noah Porter, 2003 Falun Gong also known as Falun Dafa has been described in many ways It has been called qigong one of many schools of physical exercises that aim at improving health and developing supernatural abilities Scholars and mainstream media have referred to it as a spiritual movement or religion although practitioners claim it is not a religion It has been called a cult in the pejorative sense rather than in a sociological context by the Chinese government and by some Western critics In the writings of Li Hongzhi the founder of Falun Gong it is referred to in different ways though primarily as a cultivation practice The question of how to define Falun Gong is not just an academic issue the use of the cult label has been used to justify the persecution of practitioners in China To a limited degree the Chinese Government is able to extend the persecution overseas How society defines Falun Gong has implications for action on the level of policy as well as the shaping of social cultural and personal attitudes This research project addresses what Falun Gong is through ethnography Research methods included participant observation semi structured ethnographic interviews both in person and on line and content analysis of text and visual data from Falun Gong books pamphlets and websites Research sites included Tampa Washington D C and cyberspace In order to keep my research relevant to the issues and concerns of the Falun Gong community I was in regular contact with the Tampa practitioners keeping them abreast of my progress and asking for their input My findings are contrary to the allegations made by the Chinese Government and Western anti cultists in many ways Practitioners are not encouraged to rely on Western medicine but are not prohibited from using it Child practitioners are not put at risk Their organizational structure

is very loose Finally the Internet has played a vital role in Falun Gong s growth and continuation after the crackdown

Religion and the State in American Law Boris I. Bittker, Scott C. Idleman, Frank S. Ravitch, 2015-10-06 This book provides a comprehensive overview of religion and government in the United States providing historical context to contemporary issues

Secular and Religious Edmund Byrne, 2011-05-31 In the United States separation of church and state is maintained to avoid religion centered controversy In recent decades though a politically active religious right has sought to return government to what they claim are its Christian origins By contrast many American philosophers favor an unwavering secularism to keep church and state duly separate Byrne responds in this book by seeking a more nuanced and open ended relationship between religious groups and secular processes Granting there have been religion based excesses in the United States he qualifies their significance by reminding readers that unconstrained secularism often engenders an intolerant civil religion Next he discusses how US courts have gone about setting legal limits to religious influence especially in publicly funded schools Calling this a matter of border control he indicates that US courts are now somewhat accommodating of religious groups in K 12 settings But in the past he shows they required public schools to be quite rigorously secular so religious groups in particular the Roman Catholics founded schools that could include religious instruction Finally drawing on group rights theory he argues that a commitment to church state separation need not preclude religious groups from participating in public sector processes To make his case for religious groups he 1 shows the need to operate in and through groups to influence government 2 addresses moral difficulties that a political system faces if it is open to group generated input 3 recognizes that worthy causes can be better advanced by organized groups than by unconnected individuals and 4 claims this is so whether the cause is advanced by religious or non religious groups His conclusion a group organized around a religious motif should neither be summarily excluded from nor exceptionally favored in secular deliberations as to public policy and practice
