**Estimating and Tendering for Construction Work** Martin Brook, 2016-12-08 Estimators need to understand the consequences of entering into a contract often defined by complex conditions and documents as well as to appreciate the technical requirements of the project Estimating and Tendering for Construction Work 5th edition explains the job of the estimator through every stage from early cost studies to the creation of budgets for successful tenders This new edition reflects recent developments in the field and covers new tendering and procurement methods the move from basic estimating to cost planning and the greater emphasis placed on partnering and collaborative working the New Rules of Measurement NRM1 and 2 and examines ways in which practicing estimators are implementing the guidance emerging technologies such as BIM Building Information Modelling and estimating systems which can interact with 3D design models With the majority of projects procured using design and build contracts this edition explains the contractor s role in setting costs and design statements to inform and control the development of a project s design Clearly written and illustrated with examples notes and technical documentation this book is ideal for students on construction related courses at HNC HND and Degree levels It is also an important source for associated professions and estimators at the outset of their careers

**Estimating and Tendering for Construction Work , Estimating and Measurement for Simple Building Works in Hong Kong** Caroline T. W. Chan, 2020-12-30 This book is an introductory text on building measurement and estimating for simple buildings in Hong Kong based on the Hong Kong Standard Method of Measurement of Building

Works 4th Edition Revised 2018 HKSM4 Rev 2018 It provides a toolkit for students and surveying technicians who are new to the subject This second edition updates the contents in line with the HKSM4 Rev 2018 and incorporates the latest industry developments such as BIM The main text is divided into five parts following the development of a typical project Part 1 Building the project team introduces the team setup for a typical project Part 2 Deciding the procurement strategy explains the various procurement decisions to be made by an employer before any cost estimating and measurement work takes place Part 3 Preparing for tender covers the tendering methods tender documentation and approximate estimating techniques used by Quantity Surveyors Part 4 Measuring quantities introduces measurement principles and HKSM4 Rev 2018 followed by a detailed review of the measurement methods for each major trade with worked examples Part 5 Estimating unit rates explores the basic techniques for unit rate preparation The book contains worked examples from real Hong Kong building projects self assessment questions reminders and points of note It is essential reading for Hong Kong construction and surveying students international Quantity Surveyors working in the local area and those wanting international examples of Quantity Surveyors practice *Managing the Building Design Process* Gavin Tunstall,2006-08-14 *Managing the Building Design Process* explains the designer's role in the creation of new buildings from the development of the plan through to completion One key case study is used throughout the book so that the reader can clearly follow the process leading to the creation of a new building This new edition expands on the first edition including sections on CAD and sustainability incorporating updates to legislation and adding new illustrations as well as discussion points and useful references at the end of every chapter Gavin Tunstall is an architect and a lecturer in the School of Architecture Design and the Built Environment at Nottingham Trent University UK **Building Cost Planning for the Design Team** Jim Smith,David Jagger,2007-03-14 When will I get it How much will it cost For the client these are the two most critical questions Cost Planning answers these questions and is crucial to the team working on the design and construction of a project This introductory text on building economics and cost planning provides the reader with the fundamental skills and knowledge to operate as a building professional in the area of economic advice and decision making at the project level Cost planning is not an esoteric area for specialists alone but a core skill for the whole design team Starting from the environment in which cost planning and design activities take place the book works through the cost planning process in theory and practice discussing the issues involved from a design team and client perspective With analysis of key concepts related to cost control such as life cycle costing value management cost modelling and accuracy and integration of estimating techniques the authors provide an unequalled introduction to a crucial aspect of professional construction management **Altering Houses and Small Scale Residential Developments** Ann Bridger,Colin Bridger,2012-10-02 *Altering Houses and Small scale Residential Development* is a practical guide for home owners and those undertaking residential building projects It is also useful for students and emerging professionals concerned with the built environment especially small scale development procedures

Undertaking house alterations can be daunting not least because considerations of cost design and method can simultaneously demand urgent and careful attention In addition there are regulations and the law to be satisfied contracts to be entered into and a host of potential problems concerned with the form and condition of the building itself It is a rare building which is not defective in some way but putting things right can be very satisfying The Bridgers book assumes that many home owners now wish to understand more clearly what goes on when they commission contractors and consultants to convert and adapt their homes Or course there are also people who intend to manage a project themselves while others may undertake work on a DIY basis and the secret then is getting the right kind of help This book will be invaluable in either situation because it explains how to perform certain functions yourself yet clarifies the roles and responsibilities of the professionals who may be needed to help with the processes of buying altering and selling a house The economic factors in development are not overlooked since for people who wish to develop in order to sell or let property market conditions will be paramount as will the forecasting and control of costs This book provides practical guidance on these matters it avoids theory but does suggest further reading It is also highly illustrated with over 100 illustrations clarifying parts of the text The main theme of this book is altering houses but in practice the differences between some alterations schemes and building a new house can be relatively small As a result much of the material will be useful for those who wish to acquire a plot of land and undertake a modest residential development Altering or building houses and selling them can be a complex business covering a wide range of interrelated factors This book will make these processes easier
