team of contributors from different continents offers a survey of the reception of Classical Antiquity in children's and young adults literature by applying regional perspectives      Bridging East and West Yuliya V. Ladygina, 2019-10-25 Bridging East and West explores the literary evolution of one of Ukraine's foremost modernist writers Ol'ha Kobylianska who was a major contributor in the intellectual debates of her time Investigating themes of feminism populism Nietzscheanism nationalism and fascism in her works this study presents an alternative intellectual genealogy in turn of the century European arts and letters whose implications reach far beyond the field of Ukrainian studies Rather than repeating various narratives about modernism as a radical response to nineteenth century bourgeois culture or an aesthetic of fragmentation this study highlights the fissures and fusions inherent to turn of the century thought For feminist scholars Bridging East and West makes accessible a thorough account of a central yet overlooked woman writer who served as a model and a contributor within a major cultural tradition For those working in Victorian studies or comparative fascism and for those interested in Nietzsche and his influence on European intellectuals Kobylianska emerges in this study as an unlikely but no less active trailblazer in the social and aesthetic theories that would define European debates about culture science and politics in the first half of the twentieth century For those interested in questions of transnationalism and intersectionality this study's discussion of Kobylianska's hybrid cultural identity and philosophical program exemplifies cultural interchange and irreducible complexities of cultural identity      The RoutledgeFalmer Guide to Key Debates in Education Dennis Hayes, 2005-09-29 Debating is out of fashion No one raises the question of what has gone wrong when the entire political project of a society is seemingly reduced to education education education The aim of this lively and challenging book is to provide the stimulus for further thinking about key educational issues by exposing and explaining the assumptions behind this obsession Over forty contributors all experts in their fields have written short accessible informed and lively articles for students teachers and others involved in education They address broad questions that are central to any understanding of what is really going on in the education system Topics covered include the new relationship of the state to education the changed nature of schools whether teachers are afraid to teach the problems with circle time anti bullying strategies citizenship education and multiple intelligences the retreat from truth and the demise of theory in teacher training and much more Everyone learning to teach in primary and secondary schools and further education colleges will find this book relevant to their programmes In particular the book would be useful for students on Education Studies courses      Novelists in Conflict Martin Hurcombe, 2021-11-01 This volume represents the first in depth English language study of the French combat novel of the Great War an immensely popular genre at the time which includes influential texts such as Henri Barbusse's *Le Feu* and Roland Dorgelès's *Les Croix de bois* It explores through these works and less well known but equally popular patriotic novels of the period the effect that experiencing war has upon the writer's understanding of the world arguing that in their depiction of conflict these writers demonstrate a decidedly complex and modernist understanding of humanity's place

in the world In particular the author examines the French combat novel's evocation of a world where a sense of the Absurd vies with the novelist's desire to re-impose order through a particular political understanding of the Great War itself be it in the form of revolutionary socialism French nationalism or humanism In this way this volume contends ideology becomes a force for responding to and countering the sense of contingency that characterises the human experience of combat It will be of interest to scholars of twentieth century French fiction and thought      **Forts of the United States** Bud
