The World's Eye Albert M. Potts, 2014-10-17

Greek vases and Peruvian bottles Chinese bronzes and African masks Tel Brak idols and Egyptian tomb paintings artifacts ancient and modern reveal man's universal fascination with the eye and his awe before its mysterious powers In this wide ranging and richly illustrated essay Albert M Potts considers the special properties the human mind has ascribed to the eye over the millennia and seeks out its peculiar significance as symbol Amulets against the Evil Eye persist today in nearly every part of the world Almost as pervasive is the conception of the Good Eye itself used as a protective amulet The Eye of Horus for example was one of the holiest symbols of the ancient Egyptian religion and its descendants can still be found in the Mediterranean basin Using artifacts and texts the folklore of our own times and aspects of the unconscious revealed by Jungian psychology Potts reveals the diverse forms and meanings of this powerful symbol **British Journal of Dental Science**, 1917 **New**

York Magazine, 1981-12-07 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The Publishers Weekly**, 1892 Visual Culture of the Ancient Americas Esther Pasztory, 2017-01-26

In the past fifty years the study of indigenous and pre Columbian art has evolved from a groundbreaking area of inquiry in the mid 1960s to an established field of research This period also spans the career of art historian Esther Pasztory Few scholars have made such a broad and lasting impact as Pasztory both in terms of our understanding of specific facets of ancient American art as well as in our appreciation of the evolving analytical tendencies related to the broader field of study as it developed and matured The essays collected in this volume reflect scholarly rigor and new perspectives on ancient American art and are contributed by many of Pasztory's former students and colleagues A testament to the sheer breadth of Pasztory's accomplishments Visual Culture of the Ancient Americas covers a wide range of topics from Aztec picture writing to nineteenth century European scientific illustration of Andean sites in Peru The essays written by both established and rising scholars from across the field focus on three areas the ancient Andes including its representation by European explorers and scholars of the nineteenth century Classic period Mesoamerica and its uses within the cultural heritage debate of the twentieth and twenty first centuries and Postclassic Mesoamerica particularly the deeper and heretofore often hidden meanings of its cultural production Figures maps and color plates demonstrate the vibrancy and continued allure of indigenous artworks from the ancient Americas Pre Columbian art can give more Pasztory declares and the scholars featured here make a compelling case for its incorporation into art theory as a whole The result is a collection of essays that

celebrates Pasztory's central role in the development of the field of Ancient American visual studies even as it looks toward the future of the discipline

Bones of Complexity Haagen D. Klaus, Harvey, Amanda R, Mark N. Cohen, 2017-04-11 This volume examines the various interrelationships between social structures skeletal biology and health outcomes in antiquity Bringing together studies by physical anthropologists archaeologists and economists the volume attempts to gain a better understanding of the potential effects of social complexity on human biology from ancient Egypt to South America

The Battle over America's Origin Story Brian Regal, 2022-05-06 This book examines the legends of who really discovered America It argues that histories of America's origins were always based less on empirical evidence and more on social political and cultural wish fulfillment Influenced by a complex interplay of Nativist hatred of immigrants and Aboriginal people as well as distrust of academic scholarship these legends ebbed and flowed with changing conditions in wider American society The book focuses on the actions of a collection of quirky obsessed amateur investigators who spent their lives trying to prove their various theories by promoting Welsh princes Vikings Chinese admirals Neo lithic Europeans African explorers and others who they say arrived centuries before Columbus These myths acted as mitigating agencies for those who embraced them Along with recent scholarship this book makes extensive use of archival materials some of which have never been employed before It covers the period from the sixteenth century to the present It brings together separate historiographic ideas to create a unified history rather than focusing on one particular legend as most books on the subject do It shows how questions of who discovered America helped create the field of historical scholarship in this country This book does not attempt to prove who discovered America rather it tells the story of those who think they did

Historical Ecology and Landscape Archaeology in Lowland South America André Carlo Colonese, Rafael Guedes Milheira, 2023-06-22 This edited volume scrutinizes how pre Columbian human societies have shaped and transformed lowland South America contributing to biological and landscape diversity This geographic area has supported human populations since at least the transition from the Pleistocene to Holocene but the nature and scale of these interactions are matters of debate and their legacy to modern lowland environments is not fully understood This book brings together works from distinct disciplines including theoretical and methodological approaches on single case studies or broad regional syntheses with no chronological constraint The editors aim to generate a novel contribution reporting the most recent and ground breaking research on human interactions with past environments and resources in lowland South America from pre Columbian to Colonial times The volume also discusses the legacy of these past interactions and their potential contribution to informing current conservation and development agendas providing examples of how archaeology and paleoecology can fill gaps in conservation and developmental policy This volume will be of interest to students archaeologists and readers of Latin American studies

Pearce, David G. Beresford-Jones, Paul Heggarty, 2020-10-21 Nowhere on Earth is there an ecological transformation so swift and so extreme as between the snow line of the high Andes and the tropical rainforest of Amazonia The different disciplines that research the human past in South America have long tended to treat these two great subzones of the continent as self contained enough to be taken independently of each other Objections have repeatedly been raised however to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia when there are also clear indications of significant connections and transitions between them *Rethinking the Andes Amazonia Divide* brings together archaeologists linguists geneticists anthropologists ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia from deepest prehistory up to the European colonial period The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness discussion and co operation across the divides between disciplines Underway since 2008 this programme has already yielded major publications on the Andean past including *History and Language in the Andes* 2011 and *Archaeology and Language in the Andes* 2012
