This book explores the varied vernacular forms and rich oral traditions which were such a part of popular culture in early modern England It focuses in particular upon dialect speech and proverbial wisdom old wives tales and children s lore historical legends and local customs scurrilous versifying and scandalous rumour mongering Adam Fox argues that while the spoken word provides the most vivid insight into the mental world of the majority in this semi literate society it was by no means untouched by written influences Even at the beginning of the period centuries of reciprocal infusion between complementary media had created a cultural repertoire which had long ceased to be purely oral Thereafter the expansion of literacy together with the proliferation of texts both in manuscript and print saw the rapid acceleration and elaboration of this process By 1700 popular traditions and modes of expression were the product of a fundamentally literate environment to a much greater extent than has yet been appreciated *The Business Community of Seventeenth-Century England* Richard

improved Marxism Katznelson explores how a Marxism that is open to engagement with other social theoretical traditions can help illuminate our understanding of cities and the patterns of class and group formation that have characterized urban life in the West

The Horse Trade of Tudor and Stuart England Peter Edwards, 2004-06-07 A study of the flourishing market for horses in pre industrial England

Social Structure and Mobility in Sixteenth-Century London Steve Lee Rappaport, 1987

The Public Prints Charles E. Clark, 1994-01-06 The Public Prints is the first comprehensive study of the role of the earliest American newspapers in the society and culture of the eighteenth century In the hands of Charles E Clark American newspaper publishing becomes a branch of the English world of print in a story that begins in the bustling streets of late seventeenth century London and moves to the provincial towns of England and across the Atlantic While Clark s most detailed attention in America is to the three multi newspaper towns of Boston New York and Philadelphia evidence from Williamsburg Charleston and Barbados also contributes to generalizations about the craft and business of eighteenth century publishing Stressing continuing trans Atlantic connections as well as English origins Clark argues that the newspapers were a force both for anglicization in their attempts to replicate English culture in America and for Americanization in creating a fuller awareness of the British American experience across colonial boundaries He

suggests finally that the newspapers greatest cultural role in provincial America was the creation of a community bound by the celebration of common values and attachments through the shared ritual of reading New Geographical Literature and Maps Royal Geographical Society (Great Britain),1979 *The Industrial Revolutions, Volume 1* J. Chartres,1994-03-23 Britain in the sixteenth century appeared little different from its European neighbours and shared their renewed Malthusian pressures as population growth threatened the resource base of the economy Yet by the later seventeenth century Britain had broken the limits imposed by food production With the development of its trade transport and industry and the effective integration of its economy as a whole the country was becoming by the later eighteenth century more urban and industrial than its neighbours and was rapidly overtaking the Netherlands as the least rural country in Europe This volume of key readings sets British development in its broad context and in presenting the strong evidence of the extent and nature of its economic advance in the seventeenth and early eighteenth centuries provides the critical background for the understanding of the late process of British industrialization *Towns in Decline, AD100-1600* Terry Slater,2017-07-05 Many European towns have experienced loss of population degradation of physical structure and profound economic change at least once since the height of the Roman Empire This volume is an examination of the various causes of these changes the results which flowed from them and the reasons why some urban centres survived revived and eventually flourished again while others failed and died The contributors bring to bear the techniques of history and archaeology the perspectives of economics agronomy medicine architecture and planning geography and law to the study The result is a synthesis which connects the Decline of the Roman Empire to the effects of the Black Death and the economic transformation of Renaissance Florence

Geographies of England Alan R. H. Baker,Mark Billinge,2004-06-24 This is the pioneering exploration of the history of a fundamentally geographical concept the North South divide of England Six essays treating different historical periods in time are integrated by two geographical questions and a concluding essay reviews the social construction of England

Immigrants and the Industries of London, 1500-1700 Lien Bich Luu,2017-03-02 Immigration is not only a modern day debate Major change in Europe in the sixteenth and seventeenth centuries led to a surge of political and religious refugees moving across the continent Estimates suggest that from 1550 to 1585 around 50 000 Dutch and Walloons from the southern Netherlands settled in England and in the late seventeenth century 50 000 Huguenots from France followed suit The majority gravitated towards London which already a magnet for merchants and artisans across the centuries began a process of major transformation New skills capital technical know how and social networks came with these migrants and helped to spark London s cosmopolitan flair and diversity But the early experience of many of these immigrants in London was one of hostility serving to slow down the adoption and expansion of new crafts and technologies *Immigrants and the Industries of London 1500 1700* examines the origins and the changing face and shape of many trades crafts and skills in the capital in this transformative period It focuses on three crafts in particular silk weaving beer brewing and the silver trade

crafts which had relied heavily on foreign skills in the 16th century and had become major industries in the capital by the 18th century Each craft was established by a different group of immigrants distinguished not only by their social backgrounds social organisation identity motives migration pattern and experience and links with their home country but also by the nature of their reception assimilation and economic contribution Change was a protracted process in the London of the day Immigrants endured inferior status discrimination and sometimes exclusion and this affected both their ability to integrate and their willingness to share trade secrets And resistance by the English population meant that the adoption of new skills often took a long time in some cases more than three centuries to complete The book places the adoption of new crafts and technologies in London within a broader European context and relates it to the phenomenal growth of the metropolis and technological developments within these specific trades It throws new perspectives on the movement of skills from Europe and the transmission of know how from the immigrant population to English artisans The book explores how through enterprise and persistence the immigrants contribution helped transform London from a peripheral and backward European city to become the workshop of the world by the nineteenth century By way of conclusion the book brings the current immigration debate full circle to examine the lessons we can draw from this early modern experience The Geographical Magazine Michael Huxley, 1979 Vols for 19 include a separate section called GM news and reviews **Essays in the History of Therapeutics** William F. Bynum, Vivian Nutton, 1991 Therapeutics has been central to the medical enterprise in all times and all places but a subject that is all too often neglected by historians The essays in this volume follow a range in chronology from antiquity to the 1980s and in geography from the Mediterranean Basin to the New World They touch on such matters as diet and drugs magic and surgery orthodox and unorthodox approaches What they share is an attempt to get beyond the easy dismissal of almost all therapeutics before the twentieth century as meaningless and harmful and to examine concrete dimensions of the therapeutic encounter in its social professional religious and scientific reverberations
