Young, 2021-06-21

Precalculus was developed to create a program that seamlessly aligns with how teachers teach and fully supports student learning Cynthia Young's goal was to create an intuitive supportive product for students without sacrificing the rigor needed for true conceptual understanding and preparation for calculus. Precalculus helps bridge the gap between in-class work and homework by mirroring the instructor's voice outside the classroom through pedagogical features. Publisher: **The Bulletin of Mathematics Books**, 1992. *College Mathematics for the Managerial, Life, and Social Sciences* Soo Tang Tan, 2002. In this revision of his best-selling text, Soo Tan builds on the features that have made his texts best sellers: a problem-solving approach, accurate mathematical development, a concise yet accessible writing style, and a wealth of interesting and appropriate applications. These features are combined with practical pedagogical tools to help students understand and comprehend the material. Tan also now includes innovative use of technology that is optional yet well integrated throughout the book. *Applied Mathematics for the Managerial, Life, and Social Sciences* Soo Tang Tan, 2004. In this third edition of a text for students in business management, economics, and social and life sciences, Tan Stonehill College provides 150 new application exercises plus step-by-step instructions, examples, and problems using Excel and numerous graphing calculator screens. Material has been added on the algebra of functions, functions and mathematical models, and analyzing mathematical models, and a chapter on the mathematics of finance has been strengthened with new real-life applications.
