Precedent Inflation:

Precedent Inflation Susan W. Brenner, 1992 Precedents are decisions judges have issued in prior cases In the common law precedents are used to determine what the outcome of present cases should be under the doctrine of stare decisis which stipulates that new cases are resolved by applying legal rules developed in the process of deciding past cases This volume postulates a relationship between the concept of legal precedent and the means that are used to make specific precedents available to the legal profession The author concentrates specifically on the effect computer databases such as lexis and westlaw will have on the use of precedent in the common law By tracing the history of law reporting Professor Brenner demonstrates how the Anglo American conception of precedent has altered over the past seven hundred years and that these alterations reflect changes in the means used to distribute precedents She explains why computers will become the primary means of disseminating precedents and describes the evolution and operation of the two on line services that provide access to precedents by means of computer terminals and modems These services lexis and westlaw are operated by private entrepreneurs in the business of providing precedents to the legal profession Arguing that such services will have a profound effect on the conception and use of precedent Brenner provides an empirical study of both services to show the effects they have already had and outlines the conception of precedent that will result from the use of computers as law reporters This she believes will be a quantitative conception in which judicial decisions will be used in a manner analogous to the use of quantitative data in scientific endeavors This study written with a brilliance often reserved for popular writing at its best is unique in its application of sociology of knowledge principles to the analysis of law reporting in its examination of citations to approximately 25 000 judicial decisions It will be of special interest to lawyers sociologists and policymakers

Staff Oil Pipeline Handbook, Volume V-B, August 2014 ,2014 Comparative Reasoning in European Supreme Courts Michal Bobek,2013-08-08 The last two decades have witnessed an exponential growth in debates on the use of foreign law by courts Different labels have been attached to the same phenomenon judges drawing inspiration from outside of their national legal systems for solving purely domestic disputes By doing so the judges are said to engage in cross border judicial

dialogues They are creating a larger transnational community of judges This book puts similar claims to test in relation to highest national jurisdictions supreme and constitutional courts in Europe today How often and why do judges choose to draw inspiration from foreign materials in solving domestic cases The book addresses these questions from both an empirical and a theoretical angle Empirically the genuine use of comparative arguments by national highest courts in five European jurisdictions is examined England and Wales France Germany the Czech Republic and Slovakia On the basis of comparative discussion of the practice and its national theoretical underpinning in these and partially also in other European systems an overreaching theoretical framework for the current judicial use of comparative arguments is developed Drawing on the author's own past judicial experience in a national supreme court this book is a critical account of judicial engagement with foreign authority in Europe today The sober middle ground inductively conceptualized and presented in this book provides solid jurisprudential foundations for the ongoing use of comparative arguments by courts as well as its further scholarly discussion
