Alvaro, 2009-12-15 This highly important book introduces the realm of organ donation providing an overview of the current situation highlighting the challenges summarizing past research and providing guidance for future research The first book to bridge the gap between applied research and the social and behavioral issues surrounding organ donation An impressive collection of contributors from a range of both practitioners and scientists actively working in the field Provides a concrete example of how evidence based research and theory can be applied with real world value Explores future directions of organ donation and research including community based health interventions ethical considerations and advancing donor registration The latest publication in the prestigious Claremont Applied Social Psychology Series      **Life and Loss** Linda

Goldman, 2013-11-20 Many clinicians recognize that denying or ignoring grief issues in children leaves them feeling alone and that acknowledging loss is crucial part of a child's healthy development Really dealing with loss in productive ways however is sometimes easier said than done For decades Life and Loss has been the book clinicians have relied on for a full and nuanced presentation of the many issues with which grieving children grapple as well as an honest exploration of the interrelationship between unresolved grief educational success and responsible citizenry The third edition of Life and Loss brings this exploration firmly into the twenty first century and makes a convincing case that children's grief is no longer restricted only to loss identified children Children's grief is now endemic it is global Life and Loss is not just the book clinicians need to understand grief in the twenty first century it's the book they need to work with it in constructive ways

Last Best Gifts Kieran Healy, 2010-08-15 More than any other altruistic gesture blood and organ donation exemplifies the true spirit of self sacrifice Donors literally give of themselves for no reward so that the life of an individual often anonymous may be spared But as the demand for blood and organs has grown the value of a system that depends solely on gifts has been called into question and the possibility has surfaced that donors might be supplemented or replaced by paid suppliers Last Best Gifts offers a fresh perspective on this ethical dilemma by examining the social organization of blood and organ donation in Europe and the United States Gifts of blood and organs are not given everywhere in the same way or to the same extent contrasts that allow Kieran Healy to uncover the pivotal role that institutions play in fashioning the contexts for donations Procurement organizations he shows sustain altruism by providing opportunities to give and by producing public accounts of what giving means In the end Healy suggests successful systems rest on the fairness of the exchange rather than the purity of a donor's altruism or the size of a financial incentive      **The Sociology of the Economy** Frank Dobbin, 2004-02-12 The new economic sociology is based on the theory that patterns of economic behavior are shaped by social factors The Sociology of the Economy brings together a dozen path breaking empirical studies that explore how social forces such as shifts in political power the influence of social networks or the spread of new economic ideas shape real world economic behavior The

contributors all leading economic sociologists show these social forces at work in a diverse range of international settings and historical circumstances Examining why so many American banks followed industry leaders into foreign markets in the 1970s only to pull back within a few years Mark Mizruchi and Gerald Davis suggest that social emulation rather than rational calculation led banks to expand globally before there was any evidence that foreign offices paid off William Schneper and Mauro Guill show that despite the international diffusion of the hostile takeover during the last twenty years the practice became widespread only in countries with political institutions conducive to buying and selling entire companies Thus during the 1990s the United States and United Kingdom saw hundreds of hostile takeover bids while Germany had only a handful and Japan just one Deborah Davis explores resistance to the globalization of Western ideas about real estate ownership particularly in China where the government has had little success in instituting a market system in place of traditional family based real estate inheritance And Richard Scott examines the controversial rise of managed care in the American healthcare system as the quest for market efficiency collided with the ideal of equity in access to health care Together these studies provide compelling evidence that economic behavior is not ruled by immutable laws and is but one realm of social behavior with its own conventions roles and social structures The Sociology of the Economy demonstrates the vitality of empirical research in the field of economic sociology and the power of sociological models in explaining how markets operate
