

1. PLIAGE

1.1 Principe

Sous l'action d'une force appliquée sur un flan (ou sur une ébauche) reposant sur deux ou plusieurs appuis (fig. 1) ou encastré à une extrémité (fig. 2), le produit est fléchi. Lorsque l'effort cesse, si le fléchissement a été suffisant, le flan ne reprend pas sa forme initiale, mais une forme intermédiaire qui est d'autant plus éloignée de celle obtenue par le fléchissement maximum que l'élasticité du métal est grande. Ce retour élastique, couramment appelé « ressaut », est constaté dans les opérations montrées par les figures 1 et 2.

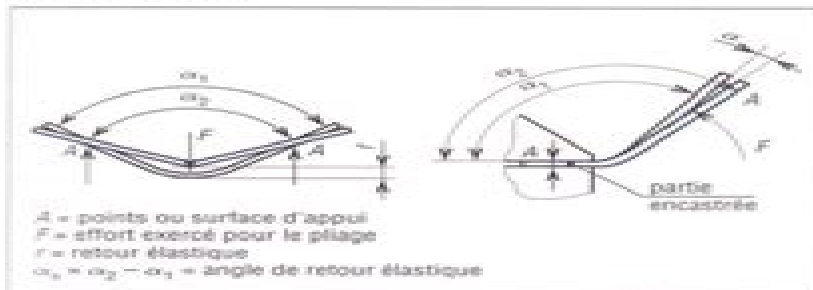

Fig. 1. Exemple de retour élastique de produit plié.

Si le pliage est effectué dans un vè (fig. 2) suivant la position du poinçon en fin de course, différents angles intermédiaires peuvent être obtenus avec le même outillage, l'angle terminal étant celui du vè augmenté du retour élastique. Si, en fin de pliage à fond de vè le poinçon continue sa course, il provoque une forgeage local par un léger encastrement de son extrémité dans l'épaisseur (fig. 3). Le métal, déplacé équilibre, par déformation plastique, les contraintes des zones comprimées avec celles qui sont tendues (fig. 4), le retour élastique est quasiment supprimé. C'est l'opération de pliage avec frappe (fig. 3).

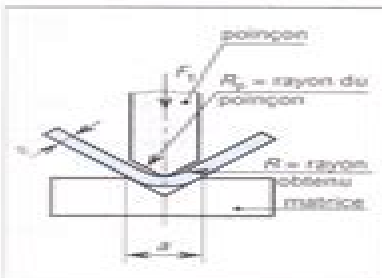

Fig. 2. Pliage en l'air à fond de vè.

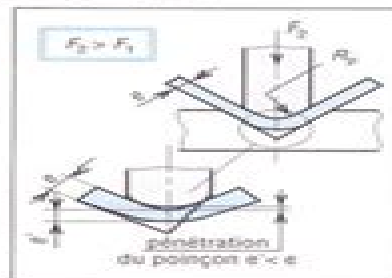

Fig. 3. Pliage (avec frappe).

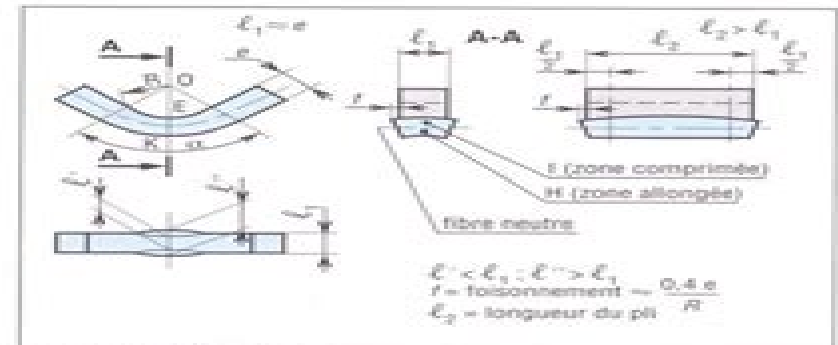

Fig. 4. Résultats obtenus.

1.2 Analyse de la déformation

Sous l'action du poinçon, le métal compris dans la section I est soumis aux forces de compression et de traction pour H, leur intensité s'annule sur la fibre neutre et leur valeur maximum est atteinte en E et K. Le maintien de l'équilibre des sections (l'une qui augmente, l'autre qui diminue) provoque un déplacement de la fibre neutre vers le rayon intérieur.

- Approximativement, la fibre neutre est située à :
 $e/2$ si $R/e \geq 3$;
 $2e/5$ si $R/e = 2$;
 $e/3$ si $R/e = 1$.

À partir de cette remarque et toujours avec approximation, il est possible de définir :
 - l'allongement supporté par les fibres les plus tendues ;
 - le développement du flan théorique.

1.2.1 Allongement de la fibre extérieure.

Il est défini par la relation.

$$A\% = \frac{(R+e)\alpha - (R+e/2)\alpha}{(R+e/2)\alpha} \times 100 \quad \text{si } R \geq 3e$$

Exemple : A % = 14 % acceptable pour un acier doux mais insuffisant pour un acier dur.

Nota : l'influence de la relation entre R et e oblige, pour éviter les criques sur métaux fragiles (fig. 6), à plier dans le sens perpendiculaire au sens de laminage, ou à établir un compromis (fig. 6) (voir également tableau du tome 1 pour les rayons recommandés suivant les métaux).

1.2.2 Développement du flan (fig. 5)

Si R₁ et R₂ sont les rayons de la fibre neutre

$$L_1 = l_1 + \frac{2\pi R_1 \alpha_1}{360} + l_2 + \frac{2\pi R_2 \alpha_2}{360} + l_3 \quad (\alpha \text{ en degrés})$$

Society (Great Britain), 1891 *Précis de Mécanique théorique et appliquée* N. DEGUIN, 1862 *Précis de mécanique*
théorique et appliquée, rédigé conformément au programme de l'enseignement scientifique des lycées et du baccalauréat ès
sciences ... Troisième édition, revue et corrigée Nicolas DEGUIN, 1858 **Mathematics Unbound** Karen Hunger
Parshall, Adrian Clifford Rice, Although today's mathematical research community takes its international character very much
for granted this global nature is relatively recent having evolved over a period of roughly 150 years from the beginning of the
nineteenth century to the middle of the twentieth century During this time the practice of mathematics changed from being
centered on a collection of disparate national communities to being characterized by an international group of scholars for
whom the goal of mathematical research and cooperation transcended national boundaries Yet the development of an
international community was far from smooth and involved obstacles such as war political upheaval and national rivalries
Until now this evolution has been largely overlooked by historians and mathematicians alike This book addresses the issue by
bringing together essays by twenty experts in the history of mathematics who have investigated the genesis of today's
international mathematical community This includes not only developments within component national mathematical
communities such as the growth of societies and journals but also more wide ranging political philosophical linguistic and
pedagogical issues The resulting volume is essential reading for anyone interested in the history of modern mathematics It
will be of interest to mathematicians historians of mathematics and historians of science in general *Catalogue of Books*
Added to the Library of Congress Library of Congress. Catalog, 1868, 1876 **Catalogue of Recently Added Books,**
Library of Congress, 1873-75 Library of Congress, 1876 *Catalogue of Books Added to the Library of Congress* Library
of Congress (Washington), 1876 *The Study of Time III* J. T. Fraser, N. Lawrence, D. Park, 2013-03-09 The papers in this
volume were delivered and responded to at the Third Conference of the International Society for the Study of Time The
meeting took place during sunny days punctuated by an occasional brief storm in the conference facilities of the
Steirerisches College in Alpbach Austria from July 1 to July 10 1976 In the middle of it came July 4 the 200th anniversary of
the Declaration of Independence and in honor of participants from the United States there was a special session of papers on
the subject of Freedom and Time See Fraser Park in this volume The effect of the papers was kaleidoscopic reading the table
of contents one can surmise the experience of those enthusiasts and there were several who heard them all I think that most
people who have been puzzled about time will agree that it is not clear what the puzzle is or from what direction the insights
will come that will enable us to understand the situation a little more clearly As one of the participants wrote afterwards

After all we do not know apriori whether there exists areal unity in studies about time but if one exists it must reveal itself progressively in the course of successive experiences such as these lectures If it were easy to find it would have been found already without the Society s help Catalogue of Books Added to the Library of Congress ,1861 *Précis de mécanique rationnelle à l'usage des élèves des facultés des sciences* Georges Bouligand,1925 **Précis des institutions politiques et sociales de l'ancienne France** Amédée Gasquet,1885 **Revue Semestrielle Des Publications Mathématiques** ,1911
