**Predicates and Their Subjects** Susan Rothstein,2004-10-06 *Predicates and Their Subjects* Susan

Rothstein,2012-12-06 *Predicates and their Subjects* is an in depth study of the syntax semantics interface focusing on the structure of the subject predicate relation Starting from where the author s 1983 dissertation left off the book argues that there is syntactic constraint that clauses small and tensed are constructed out of a one place unsaturated expression the predicate which must be applied to a syntactic argument its subject The author shows that this predication relation cannot be reduced to a thematic relation or a projection of argument structure but must be a purely syntactic constraint Chapters in the book show how the syntactic predication relation is semantically interpreted and how the predication relation explains constraints on DP raising and on the distribution of pleonastics in English The second half of the book extends the theory of predication to cover copular constructions it includes an account of the structure of small clauses in Hebrew of the use of be in predicative and identity sentences in English and concludes with a study of the meaning of the verb be **30**

Theodore B. Fernald,2000-02-10 A distinction is made in formal semantics between stage level predicates predicates that describe the general state of a noun and individual level predicates predicates that specify the specific properties of a noun Fernald investigates various contexts in which this distinction is traditionally said to come into play His aim is to show that the effects displayed are not uniform and that the differences between the analyses proposed in the literature arise from the authors considering different subsets of data that they take to exemplify the core meaning of the stage individual distinction Fernald presents alternatives and extensions that shed light on the limitations of previous theories as well as making original observations about important aspects of the topic including coercion and perceptual reports vs other phenomena **30**

**The Dynamics of Focus Structure** Nomi Erteschik-Shir, 1997 In this book Nomi Erteschik Shir develops a new theory of focus structure integrating insights from syntax semantics phonology and pragmatics She explores the role of focus structure in grammar examining the interface between focus structure and syntax the semantics of focus structure and the intonation associated with it Dr Shir defines a grammatical level of f structure focus structure which is an annotated s structure in which topic and focus constituents are marked F structure feeds both PF Phonological Form and semantics and is sensitive to lexical information Dr Shir argues that f structure and not LF Logical Form is the input to a semantic rule of predication One of the

major results of Dr Shir's analysis is that wh movement turns out to be subject to the same constraint which accounts for anaphora and other subject object asymmetries

*A Guide to Kant's Psychologism* Wayne Waxman, 2019-01-16 This book presents an interpretation of Kant's Critique of Pure Reason as a priori psychologism. It groups Kant's philosophy together with those of the British empiricists Locke, Berkeley and Hume in a single line of psychologistic succession and offers a clear explanation of how Kant's psychologism differs from psychology and idealism. The book reconciles Kant's philosophy with subsequent developments in science and mathematics including post-Fregean mathematical logic, non-Euclidean geometry and both relativity and quantum theory. It also relates Kant's psychologism to Wittgenstein's later conception of language. Finally, the author reveals the ways in which Kant's philosophy dovetails with contemporary scientific theorizing about the natural phenomenon of consciousness and its place in nature. This book will be of interest to Kant scholars and historians of philosophy working on the British empiricists.

*Universal Logic, Ethics, and Truth* Timothy J. Madigan, Jean-Yves Béziau, 2024-05-13 John Corcoran was a very well known logician who worked on several areas of logic. He produced decisive works giving a better understanding of two major figures in the history of logic: Aristotle and Boole. Corcoran had a close association with Alfred Tarski, a prominent 20th century logician. This collaboration manifested in Corcoran's substantial introduction to Tarski's seminal book *Logic Semantics Metamathematics* (1956). Additionally, Corcoran's posthumous editorial involvement in *What are logical notions* (1986) breathed new life into this seminal paper authored by Tarski. His scholarly pursuits extended to the intricate explication of fundamental concepts in modern logic including variables, propositions, truth, consequences, and categoricity. Corcoran's academic curiosity extended further to the intersection of ethics and logic, reflecting his contemplation of their interrelation. Beyond these theoretical contributions, Corcoran was deeply engaged in the pedagogical dimensions of logic instruction. This volume serves as a compilation of articles contributed by Corcoran's students, colleagues, and international peers. By encompassing a diverse range of subjects, this collection aptly mirrors Corcoran's wide-ranging interests, offering insights that not only deepen our understanding of his work but also advance the theoretical frameworks he explored.

**Case Configuration and Noun Phrase Interpretation** Helen Dehoop, 2014-07-16

First Published in 1997 The present study examines the relation between two types of structural Case on the one hand and the interpretation of NPs on the other The author argues that there are two types of structural Case to wit weak D structural and strong S structural Case The hypothesis that links these two types of Case to different interpretations states that an object is interpreted as a generalized quantifier if and only if it bears strong Case This title particularly considers the semantics of noun phrases and the weak strong distinction     The Works of Aristotle Aristotle,1928     **The Swedenborg Concordance** John Faulkner Potts,1902     **Works** Aristotle,1928     **The Works of Aristotle: Categoriae and De interpretatione, by E.
