Seasoned Socialism Anastasia Lakhtikova, Angela Brintlinger, Irina Glushchenko, 2019-04-04 This essay anthology explores the intersection of gender food and culture in post 1960s Soviet life from personal cookbooks to gulag survival *Seasoned Socialism* considers the relationship between gender and food in late Soviet daily life specifically between 1964 and 1985 Political and economic conditions heavily influenced Soviet life and foodways during this period and an exploration of Soviet women's central role in the daily sustenance for their families as well as the obstacles they faced on this quest offers new insights into intergenerational and inter gender power dynamics of that time *Seasoned Socialism* considers gender construction and performance across a wide array of primary sources including poetry fiction film women's journals oral histories and interviews This collection provides fresh insight into how the Soviet government sought to influence both what citizens ate and how they thought about food

Multiple Moralities and Religions in Post-Soviet Russia Jarrett Zigon, 2011-09-01 In the post Soviet period morality became a debatable concept open to a multitude of expressions and performances From Russian Orthodoxy to Islam from shamanism to Protestantism religions of various kinds provided some of the first possible alternative moral discourses and practices after the end of the Soviet system This influence remains strong today Within the Russian context religion and morality intersect in such social domains as the relief of social suffering the interpretation of history the construction and reconstruction of traditions individual and social health and business practices The influence of religion is also apparent in the way in which the Russian Orthodox Church increasingly acts as the moral voice of the government The wide ranging topics in this ethnographically based volume show the broad religious influence on both discursive and everyday moralities The contributors reveal that although religion is a significant aspect of the various assemblages of morality much like in other parts of the world religion in postsocialist Russia cannot be separated from the political or economic or transnational institutional aspects of morality

A History of Russian Literature Andrew Kahn, Mark Naumovich Lipovet'skiĭ, Irina Reyfman, Stephanie Sandler, 2018 Russia possesses one of the richest and most admired literatures of Europe reaching back to the eleventh century *A History of Russian Literature* provides a comprehensive account of Russian writing from its earliest origins in the monastic works of Kiev up to the present day still rife with the creative experiments of post Soviet literary life The volume proceeds chronologically in five parts extending from Kievan Rus in the 11th century to the present day The coverage strikes a balance between extensive overview and in depth thematic focus Parts are organized thematically in chapters which a number of keywords that are important literary concepts that can serve as connecting motifs and case studies in depth discussions of writers institutions and texts that take the reader up close and Visual material also underscores the interrelation of the word

and image at a number of points particularly significant in the medieval period and twentieth century The History addresses major continuities and discontinuities in the history of Russian literature across all periods and in particular bring out trans historical features that contribute to the notion of a national literature The volume s time range has the merit of identifying from the early modern period a vital set of national stereotypes and popular folklore about boundaries space Holy Russia and the charismatic king that offers culturally relevant material to later writers This volume delivers a fresh view on a series of key questions about Russia s literary history by providing new mappings of literary history and a narrative that pursues key concepts rather more than individual authorial careers This holistic narrative underscores the ways in which context and text are densely woven in Russian literature and demonstrates that the most exciting way to understand the canon and the development of tradition is through a discussion of the interrelation of major and minor figures historical events and literary politics literary theory and literary innovation
