*Preface to Peasantry* Arthur Franklin Raper, 2005 Arguing that the plantation system had taught African Americans only dependence and irresponsibility Raper warned that without social programs that materially altered the South's racial and economic policies the course of events in Greene County and similar communities would drive African American tenant farmers and sharecroppers into a permanently subjugated peasant class **BOOK JACKET** *Preface to Peasantry* Arthur Franklin Raper, 1971 *Preface to Peasantry; a Tale of Two Black Belt Counties* Arthur Franklin 1899- Raper, 2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *The Southern Agrarians and the New Deal* Emily Bingham, Thomas A. **The Whole Machinery** Benjamin S. Child, 2019-11 A familiar story holds that modernization radiates outward from metropolitan origins Expanding on Walter Benjamin's notion of *die Moderne* The Whole Machinery explores representations of people and places objects and occasions that reverse that trajectory demonstrating how modernizing agents move in a contrary direction as well from the country to the city In a crucial reconsideration these figures aren't pulled by or into urban modernity so much as they bring alternate and transformative iterations of the modern to the urban world Upending the U S South's reputation as either retrograde or unresponsive to modernity Benjamin S Child shows how the effects of national and transnational exchange emergent technologies and industrialization animate environments and bodies associated with or performing versions of the rural To this end he also exposes the shadow side of the cosmopolitan modern by investigating the rural sources the laboring bodies and raw materials that made such urban spaces possible thus taking a broader survey of landscapes created by the Atlantic world's histories of uneven development In this investigation of the rural modern that considers multiple media and forms of technology Child's sources range widely encompassing a spectrum of texts and their networks of transmission reception and signification These include novels poems and short stories but also radio broadcasts sound recordings political pamphlets photographs magazine articles newspaper reports and agricultural bulletins Folding such expressive artifacts into his larger arguments Child considers how they both reflect and form modernist culture The result is a geography of southern modernism that includes an unexpected combination of landmarks both actual and imagined Twisted Oak Arkansas and Tukabahchee County Alabama Manhattan Manchester and Moscow Tuskegee and Gobbler's Knob North Carolina Report Russell Sage Foundation. **The Lineaments of Wrath** James W. Clarke, Violence has marked relations between blacks and whites in America for nearly four hundred years In The Lineaments of Wrath James W Clarke draws upon behavioral science theory and primary historical evidence to examine and explain its causes and enduring consequences Beginning with slavery and concluding with the present Clarke describes how the combined effects of state sanctioned mob violence and the discriminatory administration of race blind criminal and contract labor laws terrorized and immobilized the black population in the post emancipation South In this fashion an agricultural system based on debt peonage and convict labor quickly replaced slavery and remained the back bone of the region's economy well into the twentieth century Quoting the actual words of victims and witnesses from former slaves to gangsta rappers Clarke documents the erosion of black confidence in American criminal justice In so doing he also traces the evolution across many generations of a black subculture of violence in which disputes are settled personally and without recourse to the legal system That subculture the

author concludes accounts for historically high rates of black on black violence which now threatens to destroy the black inner city from within The Lineaments of Wrath puts America's race issues into a completely original historical perspective Those in the fields of political science sociology history psychology public policy race relations and law will find Clarke's work of profound importance *Monthly Labor Review*, 1937-03 Publishes in depth articles on labor subjects current labor

Masur, 1999-05-20 In The Challenge of American History Louis Masur brings together a sampling of recent scholarship to determine the key issues preoccupying historians of American history and to contemplate the discipline's direction for the future The fifteen summary essays included in this volume allow professional historians history teachers and students to grasp in a convenient and accessible form what historians have been writing about Deep Souths J. William Harris, 2003-03-17 Finalist for the Pulitzer Prize in History Co-winner of the James A. Rawley Prize from the Organization of American Historians Winner of the Theodore Saloutos Memorial Book Prize from the Agricultural History Society Deep Souths tells the stories of three southern regions from Reconstruction to World War II the Mississippi Yazoo Delta the eastern Piedmont of Georgia and the Georgia Sea Islands and Atlantic coast Though these regions initially shared the histories and populations we associate with the idea of a Deep South all had economies based on slave plantation labor in 1860 their histories diverged sharply during the three generations after Reconstruction With research gathered from oral histories census reports and a wide variety of other sources Harris traces these regional changes in cumulative stories of individuals across the social spectrum Deep Souths presents a comparative and ground level view of history that challenges the idea that the lower South was either uniform or static in the era of segregation By the end of the New Deal era changes in these regions had prepared the way for the civil rights movement and the end of segregation **Agricultural Economics**

**The Black Tax** Andrew W. Kahrl, 2024-04-24 Andrew Kahrl's enraging national assessment of legal and financial dispossession proves that African Americans property owners have long been beset by racist practices invisible obstacles and hidden traps that leave them vulnerable to economic predation Kahrl focuses specially on how property taxes have been used to swindle African Americans out of their land with the cooperation of public officials and courts These racist regimes fund and reinforce inequity with blacks paying more in taxes than whites as they lose tremendous inheritable wealth to whites There is something more fundamental than the forty acres of settlement lore the taxes on them **Dark Journey** Neil R. McMillen, 1990 Remarkable for its relentless truth telling and the depth and thoroughness of its investigation for the freshness of its sources and for the shock power of its findings Even a reader who is not unfamiliar with the sources and literature of the subject can be jolted by its impact C. Vann Woodward *New York Review of Books* Dark Journey is a superb piece of scholarship a book that all students of southern and African American history will find valuable and informative

David J Garrow Georgia Historical Quarterly      *Historical Archaeologies of Capitalism* Mark P. Leone, Parker B. Potter Jr., 2012-12-06 American things American material culture and American archaeology are the themes of this book The authors use goods used or made in America to illuminate issues such as tenancy racism sexism and regional bias Contributors utilize data about everyday objects from tin cans and bottles to namebrand items from fish bones to machinery to analyze the way American capitalism works Their cogent analyses take us literally from broken dishes to the international economy Especially notable chapters examine how an archaeologist formulates questions about exploitation under capitalism and how the study of artifacts reveals African American middle class culture and its response to racism      Capturing the South Scott L. Matthews, 2018-10-26 In his expansive history of documentary work in the South during the twentieth century Scott L. Matthews examines the motivations and methodologies of several pivotal documentarians including sociologist Howard Odum photographers Jack Delano and Danny Lyon and music ethnographer John Cohen Their work salvaged and celebrated folk cultures threatened by modernization or strived to reveal and reform problems linked to the region's racial caste system and exploitative agricultural economy Images of alluring primitivism and troubling pathology often blurred together neutralizing the aims of documentary work carried out in the name of reform during the Progressive era New Deal and civil rights movement Black and white southerners in turn often resisted documentarians' attempts to turn their private lives into public symbols The accumulation of these influential and occasionally controversial documentary images created an enduring complex and sometimes self-defeating mythology about the South that persists into the twenty-first century      *King Cotton in Modern America* D. Clayton Brown, 2011-02-25 King Cotton in Modern America places the once-kingly crop in historical perspective showing how cotton culture was actually part of the larger culture of the United States despite many regarding its cultivation and sources as hopelessly backward Leaders in the industry acting through the National Cotton Council organized the various and often conflicting segments to make the commodity a viable part of the greater American economy The industry faced new challenges particularly the rise of foreign competition in production and the increase of man-made fibers in the consumer market Modernization and efficiency became key elements for cotton planters The expansion of cotton growing areas into the Far West after 1945 enabled American growers to compete in the world market Internal dissension developed between the traditional cotton growing regions in the South and the new areas in the West particularly over the USDA cotton allotment program Mechanization had profound social and economic impacts Through music and literature and with special emphasis placed on the meaning of cotton to African Americans in the lore of Memphis's Beale Street blues music and African American migration off the land author D. Clayton Brown carries cotton's story to the present
