Pregnancy And Life Style Habits:

Lifestyle Nursing Gia Merlo, Kathy Berra, 2022-08-23 Lifestyle medicine is an evidence based approach to helping individuals and families adopt and sustain healthy behaviors in preventing treating and oftentimes reversing chronic diseases This fast growing specialty operates off six main principles including nutrition physical activity stress resilience cessation or risk reduction of substance use quality sleep and social connectivity Nurses are the primary providers of hospital based patient care and deliver most of the nation s long term care Within healthcare nurses are often tasked with educating patients and families and are thereby well positioned to address lifestyle intervention with patients Lifestyle Nursing examines the concepts of lifestyle medicine and nursing practice it is specifically designed to help nurses introduce the concepts of lifestyle medicine to readers while also encouraging them to focus on their own wellness This book features nutritional guidelines and supplemental materials operationalizing this basic nutrition knowledge into personal and patient wellness It addresses evidence based findings of chronic diseases including heart diseases and stroke type 2 diabetes and cancers which can often be prevented by lifestyle interventions Drawing from nursing and medical literature this volume in the Lifestyle Medicine series encourages incorporation of lifestyle principles into nursing practices professionally and personally which will lead to overall improved patient outcomes and happier healthier nurses

HealthyMoms - promoting healthier lifestyle and weight gain during pregnancy with special emphasis on migrant women Emmie Söderström, 2024-09-04 Background Gestational weight gain GWG affects almost 50% of pregnant women and effective and scalable interventions are needed and should be inclusive for all irrespective of origin The overall aim of this thesis was to evaluate the HealthyMoms app targeting GWG as well as dietary and physical activity behaviors and how the app may be adapted to also reach women of migrant backgrounds The first part evaluated the effectiveness of the HealthyMoms trial and the dietary assessment method used in it Paper I II The second part aimed to explore how the HealthyMoms app could be adapted to reach Arabic and Somali speaking women Paper III IV Methods Paper I was a randomized controlled trial in healthy pregnant women n 305 After baseline assessment week 14 women were randomized to the intervention n 152 or control group n 153 The intervention group received standard care and the HealthyMoms app The primary outcome was GWG between baseline and follow up measurement week 37 Secondary outcomes included body fatness air displacement plethysmography dietary habits SHEI score moderate to vigorous physical activity accelerometry glycemia and insulin resistance Paper II Nested validation study of RiksmatenFlex dietary assessment method in HealthyMoms in a subsample of the trial Three days of dietary data energy foods groups macronutrients and SHEI score from RiksmatenFlex was compared to 24 h telephone dietary recalls n 52 Total energy expenditure TEE was measured with the doubly labelled water method n 24 Paper III A qualitative exploration of healthcare professionals views on supporting healthy lifestyle behaviors in pregnant migrant women was performed through individual interviews over phone or in person with healthcare professionals working

in maternity healthcare n 14 An inductive thematic analysis was performed Paper IV Individual interviews with Arabic n 10 and Somali women n 9 exploring what support is needed for healthy lifestyle behaviors and how the HealthyMoms app could be adapted Data was analyzed using content analysis inductive latent approach Results Paper I No statistically significant effect on GWG was observed although data indicated that the effect of the HealthyMoms app differed according to pre pregnancy BMI where women with overweight and obesity in the intervention group had lower GWG compared to the control group in the imputed 1 33 kg 95% CI 2 92 to 0 26 P 10 and completers only analyses 1 67 kg 95% CI 3 26 to 0 09 P 031 Participants in the intervention group further had higher SHEI score at follow up compared to the control group 0 27 95% CI 0 05 0 50 P 017 No other effects for secondary outcomes were found Paper II Average energy intake from RiksmatenFlex 10015 SD 2004 kJ was similar to TEE 10252 SD 1197 kJ P 596 Mean differences between average intakes of unhealthy and healthy foods and average SHEI score between RiksmatenFlex and 24 h telephone dietary recalls were small although Bland and Altman analyses showed wide limits of agreement for all variables Moreover correlations between dietary variables assessed with the two dietary methods were high r 0 751 0 931 P

Treatment Strategy for Unexplained Infertility and Recurrent Miscarriage Keiji Kuroda, Jan J. Brosens, Siobhan Quenby, Satoru Takeda, 2018-06-15 This book offers a highly informative guide to treating unexplained infertility and recurrent miscarriage RM In particular it provides detailed treatment strategies for infertility or RM derived from uterine circumstance such as chronic endometritis and perturbation of endometrial decidualization as well as maternal immunological rejection of an embryo as semi allograft Unexplained infertility refers to those types that cannot be detected by the general screening test The causes are sometimes detected in the course of treatment with assisted reproductive technology including IVF However some unexplained infertility is intractable even after intracytoplasmic sperm injection or repeated implantation of morphologically suitable embryos Patients with unexplained RM also have a high likelihood of undetectable risk factors of miscarriage As a result gynecologists often repeatedly provide these couples with general treatments for infertility and miscarriage or even discontinue treatment because they cannot detect the reason which places serious financial physical and mental burdens on the couples affected This book offers gynecologists essential insights into the pathological condition of unexplained infertility and RM equipping them to identify it explain it to patients and consider further examinations and more aggressive fertility treatments
