Sandars, 1995-01-01 Until around 10 000 BC art in Europe appears to have been in advance of the rest of the world and throws light on the total history of early man The great masterpieces of cave painting at Lascaux are well known and one tradition of early sculpture is from the first surprisingly classical With the shelter paintings of the Spanish Levant and the clay modelling and painted pottery of eastern Europe in the fourth and third millennia BC fresh artistic problems were tackled Later still evolved the high technical accomplishment of the metal workers and this study concludes with an account of the new departures of Celtic La Tene art of the last four centuries BC

*European Landscapes of Rock-art* George Nash, Christopher Chippindale, 2002 Rock art the ancient images which still scatter the rocky landscapes of Europe is a singular kind of archaeological evidence Fixed in place it does not move about as artefacts as trade objects do Enigmatic in its meaning it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds *European Landscapes of Rock Art* provides a number of case studies covering a range of European locations including Ireland Italy Scandinavia Scotland and Spain which collectively address the chronology and geography of rock art as well as providing an essential series of methodologies for future debate Each author provides a synthesis that focuses on landscape as an essential part of rock art construction From the paintings and carved images of prehistoric Scandinavia to Second World War graffiti on the German Reichstag this volume looks beyond the art to the society that made it The papers in this volume also challenge the traditional views of how rock art is recorded Throughout there is an emphasis on informal and informed methodologies The authors skilfully discuss subjectivity and its relationship with landscape since personal experience from prehistoric times to the present day plays an essential role in the interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general

prehistoric images primordial creativity With a transnational scope this book reveals new facts about the connections between Paris and New York and the importance of communication and collaboration between them for these artists In doing so Seibert shows that this debate was about more than just legitimizing abstract art forms from the past but about recognizing an autonomous American abstract art Presenting unseen archival material letters and exhibition documentation Prehistoric Pictures and American Modernism offers a new reading of the development of modern American abstraction and will hold an important place in the historiography of the movement its global traditions and its legacy **A Comparative**

Understanding, 2013-02-02 **When the World Was Black** The Untold History of the World's First Civilizations Volume Two of The Science of Self series has been published in TWO parts Why two Because there are far too many stories that remain untold We had over 200 000 years of Black history to tell from the southern tip of Chile to the northernmost isles of Europe and you can't do that justice in a 300 page book So there are two parts each consisting of 360 pages of groundbreaking history digging deep into the story of all the world's original people Part One covers the Black origins of all the world's oldest cultures and societies spanning more than 200 000 years of human history Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20 000 years up to the time of European contact Each part has over 100 helpful maps graphs and photos an 8 page full color insert in the center and over 300 footnotes and references for further research In this book you'll learn about the history of Black people I don't mean the history you learned in school which most likely began with slavery and ended with the Civil Rights Movement I'm talking about Black history BEFORE that Long before that In this book we'll cover over 200 000 years of Black history For many of us that sounds strange We can't even imagine what the Black past was like before the slave trade much less imagine that such a history goes back 200 000 years or more Part Two covers history from 20 000 years ago to the point of European contact This is the time that prehistoric cultures grew into ancient urban civilizations a transition known to historians as the Neolithic Revolution
