**Prehistoric Figurines** Douglass Bailey, 2005-11-03 Here is a radical new approach to one of the most exciting but poorly understood artefacts from our prehistoric past Studying their roles and functions in society from past to present day archaeology students will find this an invaluable asset

**The Oxford Handbook of Prehistoric Figurines** Timothy Insoll, 2017 The Oxford Handbook of Prehistoric Figurines is the first text to offer a comparative survey of figurines from across the globe bringing together myriad contemporary research approaches to provide invaluable insights into their function context meaning and use as well as past thinking on the human body gender and identity

**Interpreting Ancient Figurines** Richard G. Lesure, 2011-02-21 This book examines ancient figurines from several world areas to address recurring challenges in the interpretation of prehistoric art Sometimes figurines from one context are perceived to resemble those from another Richard G Lesure asks whether such resemblances play a role in our interpretations Early interpreters seized on the idea that figurines were recurrently female and constructed the fanciful myth of a primordial Neolithic Goddess Contemporary practice instead rejects interpretive leaps across contexts Dr Lesure offers a middle path a new framework for assessing the relevance of particular comparisons He develops the argument in case studies that consider figurines from Paleolithic Europe the Neolithic Near East and Formative Mesoamerica

**In Search of God the Mother** Lynn E. Roller, 1999-07-13 This book examines one of the most intriguing figures in the religious life of the ancient Mediterranean world the Phrygian Mother Goddess known to the Greeks and Romans as Cybele or Magna Mater the Great Mother Her cult was particularly prominent in central Anatolia modern Turkey and spread from there through the Greek and Roman world She was an enormously popular figure attracting devotion from common people and potentates alike This book is the first comprehensive assembly and discussion of the entire extant evidence concerning the worship of the Phrygian Mother Goddess from her earliest appearance in the prehistoric record to the early centuries of the Roman Empire Lynn E Roller presents and analyzes literary historiographic and archaeological data with equal acuity and flair While previous studies have tended to emphasize the more outrageous aspects of the Mother Goddess's cult such as her orgiastic rituals and the eunuch priests who attended her this book places a special focus on Cybele's position in Anatolia and the ways in which the identity of the goddess changed as her cult was transmitted to Greece and Rome Roller gives a detailed account of the growth spread and evolution of her cult her ceremonies and her meaning for her adherents This book will introduce students of Classical antiquity to many aspects of the Great Mother which have been previously unexamined and will interest anyone who has ever been piqued by curiosity about the Mother Goddess of the ancient Western world

*Breaking Images* Gianluca Miniaci, 2023-02-16 Archaeological remains are fragmented by definition apart from exceptional cases the study of the human past takes into account mainly traces ruins discards and debris of past

civilizations It is rare that things have been preserved as they were originally made and conceived in the past However not all the ancient fragmentary objects were the leftovers from the past A noticeable portion of them was part and parcel of the ancient materiality already in the form of a fragment or damaged item In 2000 John Chapman with his volume *Fragmentation in Archaeology* attracted the attention of scholars on the need to reconsider broken artifacts as the result of the deliberate anthropic process of physical fragmentation The phenomenon of fragmentation can be thus explored with more outcomes for a category of objects that played an important role inside the society the figurines Due to their portability and size figurines are particularly entangled and engaged in social spatial temporal and material relations and more than other artifacts can easily accommodate acts of embodiment and dismemberment The act of creation symmetrically also involves the act of destruction which in turn is another act of creation since from the fragmentation comes a new entity with a different ontology Breaking contains the paradigms of life creation and reparation destruction and regeneration The scope of this volume is to search for traces of any voluntary and intentional fragmentation of ancient artifacts creating improving and sharpening the methods and principles for a scientific investigation that goes beyond single author impression or sensitivity The comparative lens adopted in this volume can allow the reader to explore different fields taken from ancient societies of how we can address assess detect and even discuss the action of breaking and mutilation of ancient figurines

**A Future for Archaeology** Robert Layton, Stephen Shennan, Peter Stone, 2016-09-16 Over the last thirty years issues of culture identity and meaning have moved out of the academic sphere to become central to politics and society at all levels from the local to the global Archaeology has been at the forefront of these moves towards a greater engagement with the non academic world often in an extremely practical and direct way for example in the disputes about the repatriation of human burials Such disputes have been central to the recognition that previously marginalized groups have rights in their own past that are important for their future The essays in this book look back at some of the most important events where a role for an archaeology concerned with the past in the present first emerged and look forward to the practical and theoretical issues now central to a socially engaged discipline and shaping its future This book is published in honor of Professor Peter Ucko who has played an unparalleled role in promoting awareness of the core issues in this volume among archaeologists

**The Lost World of Old Europe** David W. Anthony, Jennifer Chi, 2010 In the prehistoric Copper Age long before cities writing or the invention of the wheel Old Europe was among the most culturally rich regions in the world Its inhabitants lived in prosperous agricultural towns The ubiquitous goddess figurines found in their houses and shrines have triggered intense debates about women s roles The Lost World of Old Europe is the accompanying catalog for an exhibition at New York University s Institute for the Study of the Ancient World This superb volume features essays by leading archaeologists as well as breathtaking color photographs cataloguing the objects some illustrated here for the first time The heart of Old Europe was in the lower Danube

valley in contemporary Bulgaria and Romania Old European coppersmiths were the most advanced metal artisans in the world Their intense interest in acquiring copper Aegean shells and other rare valuables gave rise to far reaching trading networks In their graves the bodies of Old European chieftains were adorned with pounds of gold and copper ornaments Their funerals were without parallel in the Near East or Egypt The exhibition represents the first time these rare objects have appeared in the United States An unparalleled introduction to Old Europe's cultural technological and artistic legacy

The Lost World of Old Europe includes essays by Douglass Bailey John Chapman Cornelia Magda Lazarovici Ioan Opris and Catalin Bem Ernst Pernicka Dragomir Nicolae Popovici Michel S f riad s and Vladimir Slavchev *On Art and Science* Shyam Wuppuluri, Dali Wu, 2019-11-02

Einstein once remarked After a certain high level of technical skill is achieved science and art tend to coalesce in aesthetics plasticity and form The greatest scientists are always artists as well In this volume some of the world's leading thinkers come together to expound on the interrelations between sciences and arts While one can segregate art and place it outside the scientific realm it is nevertheless inextricably linked to our essential cognitive emotional perceptual modalities and abilities and therefore lies alongside and in close contact with the method of science and philosophy What inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works How are art and science grounded in our cognition What role does perception play in science and art Are criteria for beauty in art and science the same How does evolution shape our understanding of art How do science art and scientific artistic frameworks shape society as a whole and help us address its pressing issues The epistemological and ontological aspects haunt artists philosophers and scientists alike The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life **Escaping the Labyrinth** Valasia Isaakidou, P. Tomkins, 2008-07-25

Beneath the Bronze Age Palace of Minos Neolithic Knossos is one of the earliest known farming settlements in Europe and perhaps the longest lived For 3000 years Neolithic Knossos was also perhaps one of very few settlements on Crete and for much of this time maintained a distinctive material culture This volume radically enhances understanding of the important but hitherto little known Neolithic settlement and culture of Crete Thirteen papers from the tenth Sheffield Aegean Round Table in January 2006 explore two aspects of the Cretan Neolithic the results of recent re analysis of a range of bodies of material from J D Evans excavations at EN FN Knossos and new insights into the Cretan Late and Final Neolithic and the contentious belated colonisation of the rest of the island drawing on both new and old fieldwork Papers in the first group examine the idiosyncratic Knossian ceramic chronology P Tomkins human figurines from a gender perspective M Mina funerary practices S Triantaphyllou chipped stone technology J Conolly land and use and its social implications V Isaakidou Those in the second group present a re evaluation of LN Katsambas N Galanidou and K Mandeli evidence for later Neolithic exploration of eastern Crete T Strasser Ceremony and consumption at late Final Neolithic Phaistos S Todaro and S Di Tonto Final Neolithic settlement patterns K Nowicki the transition to the Early Bronze Age at

Lesko, 1999 The book presents in depth histories of the cults of seven major goddesses and many excerpts from their literature hymns prayers and magical spells as well as descriptions of ritual temples and clergy *Objects of Authority* Jakub Stejskal, 2022-08-12 Is the celebrated elegance of Cycladic marble figurines an effect their Early Bronze Age producers intended Can one adequately appreciate an Assyrian regal statue described by a cuneiform inscription as beautiful What to make of the apparent aesthetic richness of the traditional cultures of Melanesia which however engage in virtually no recognizable aesthetic discourse Questions such as these have been formulated and discussed by scholars of remote cultures against the backdrop of a general scepticism about the prospects of escaping the conditioning of one's own aesthetic culture and attuning to the norms of a remote one This book makes a radical move it treats the remote observers lack of aesthetic insight not as a hindrance to aesthetic analysis but as a condition requiring an aesthetic theory that would make room for an aesthetic analysis independent of the model of competent aesthetic judgement or appreciation *Objects of Authority* represents a rare effort at bringing together methods

and concepts that are often addressed by separate disciplines It will appeal to scholars and advanced students working on philosophical art historical and anthropological theories of visual art and material culture
