The Archaeology of Events Zackary I. Gilmore, Jason M. O'Donoghue, 2015-03-31 These perspectives are applied to a broad range of archeological contexts stretching across the Southeast and spanning more than 7 000 years of the region s pre Columbian history New data suggest that several of this region s most pivotal historical developments such as the founding of Cahokia the transformation of Moundville from urban center to vacated necropolis and the construction of Poverty Point s Mound A were not protracted incremental processes but rather watershed moments that significantly altered the long term trajectories of indigenous Southeastern societies In addition to exceptional occurrences that impacted entire communities or peoples Southeastern archaeologists are increasingly recognizing the historical importance of localized everyday events such as

building a house crafting a pot or depositing shell      The View from Madisonville Penelope Ballard Drooker, 1997-01-01  
 Madisonville was one of the key settlements of the Ohio Valley Fort Ancient people and was the subject of James Griffin's 1943 classic *The Fort Ancient Aspect*. It is a site rich in burials and artifacts documenting the earliest European influences. Drooker re-explores a century of excavation to explain how Contact Period events affected Madisonville inhabitants and their links to eastern Fort Ancient northern Ohio Iroquoian Oneota and Mississippian groups      Ocmulgee Archaeology, 1936-1986  
 David J. Hally, 2009-11-01 From 1933 to 1941 Macon was the site of the largest archaeological excavation ever undertaken in Georgia and one of the most significant archaeological projects to be initiated by the federal government during the depression. The project was administered by the National Park Service and funded at times by such government programs as the Works Progress Administration, Civilian Conservation Corps, and Civil Works Administration. At its peak in 1955 more than eight hundred laborers were employed in more than a dozen separate excavations of prehistoric mounds and villages. The best known excavations were conducted at the Macon Plateau site, the area President Franklin D. Roosevelt proclaimed as the Ocmulgee National Monument in 1936. Although a wealth of material was recovered from the site in the 1930s little provision was made for analyzing and reporting it. Consequently much information is still unpublished. The sixteen essays in this volume were presented at a symposium to commemorate the fiftieth anniversary of the founding of the Ocmulgee National Monument. The symposium provided archaeologists with an opportunity to update the work begun a half century before and to bring it into the larger context of southeastern history and general advances in archaeological research and methodology. Among the topics discussed are platform mounds, settlement patterns, agronomic practices, earth lodges, human skeletal remains, Macon Plateau culture, origins, relations of site inhabitants with other aboriginal societies and Europeans, and the challenges of administering excavations and park development      **Archaeology at Shiloh Indian Mounds, 1899-1999**  
 Paul D. Welch, 2006 One hundred years of archaeological excavations at an important American landmark, the Shiloh Indian Mounds archaeological site, a National Historic Landmark. The Shiloh Indian Mounds archaeological site, a National Historic Landmark, is a late prehistoric community within the boundaries of the Shiloh National Military Park on the banks of the Tennessee River where one of the bloodiest battles of the Civil War was fought in April 1862. Dating between AD 1000 and 1450, the archaeological site includes at least eight mounds and more than 100 houses. It is unique in that the land has never been plowed so visitors can walk around the area and find the collapsed remains of 800-year-old houses and the 900-meter-long palisade with bastions that protected the village in prehistoric times. Although its location within a National Park boundary has protected the area from the recent ravages of man, riverbank erosion began to undermine the site in the 1970s. In the mid 1990s Paul Welch began a four-year investigation culminating in a comprehensive report to the National Park Service on the Shiloh Indian Mounds. These published findings confirm that the Shiloh site was one of at least fourteen Mississippian mound sites located within a 50 km area and that Shiloh was abandoned in approximately AD 1450. It also

establishes other parameters for the Shiloh archaeological phase This current volume is intended to make information about the first 100 years of excavations at the Shiloh site available to the archaeological community *Southern Indians and Anthropologists* Lisa J. Lefler, Frederic Wright Gleach, 2002 Ranging in setting from a children s summer school program to a museum of history and culture to a fatherhood project these eleven papers document some of the many ways in which anthropologists and Native Americans are striving to work together at higher levels of accountability reciprocity and mutual enrichment The Native American groups discussed in the volume include the Yuchi of Oklahoma the Eastern Band of Cherokee Indians in western North Carolina the Powhatans of Virginia the Chickasaw Nation of Oklahoma the Seminole Tribe of Florida and the Waccamaw Siouan community of coastal North Carolina The volume s contributors consider such issues as education community development funding and the preservation of languages sacred texts oral traditions and artifacts At the same time they offer personal insights into the pressures that can bear on working relationships between anthropologists and Native Americans Not only must all concerned find a balance between their official and informal individual and group selves but Native Americans especially often feel caught between history and the present One contributor for instance discusses the problems that arose from the discovery of Native American graves on land owned by the Cherokees on the site of a planned casino parking lot The anthropological work discussed here suggests strong potential for continuing research partnerships It also illustrates the potential benefits of such partnerships for anthropologists and for Native Americans From Prehistoric Villages to Cities Jennifer Birch, 2014-04-11 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a Neolithic way of life Considerable interest has also concentrated on urbanism and the rise of the earliest cities Between these two landmarks in human cultural development lies a critical stage in social and political evolution Throughout world at various points in time people living in small dispersed village communities have come together into larger and more complex social formations These community aggregates were essentially middle range situated between the earliest villages and emergent chiefdoms and states This volume explores the social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture While there have been a number of studies that address coalescence from a regional perspective less is understood about how aggregated communities functioned internally The key premise explored in this volume is that large scale long term cultural transformations were ultimately enacted in the context of daily practices interactions and what might be otherwise considered the mundane aspects of everyday life How did these processes play out on the ground in diverse and historically contingent settings What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations What changes in social relations occur when people come together This volume employs a broadly cross cultural approach to interrogating these questions employing case studies which span four continents and more than 10 000 years of

human history      *Architectural Variability in the Southeast* Cameron H. Lacquement, 2007-10-28 Some of the most visible expressions of human culture are illustrated architecturally Unfortunately for archaeologists the architecture being studied is not always visible and must be inferred from soil inconsistencies or charred remains This study deals with research into roughly a millennium of Native American architecture in the Southeast and includes research on the variation of construction techniques employed both above and below ground

**Yuchi Indian Histories Before the Removal Era** Jason Baird Jackson, 2012-11-01 In *Yuchi Indian Histories Before the Removal Era* folklorist and anthropologist Jason Baird Jackson and nine scholars of Yuchi Euchee Indian culture and history offer a revisionist and in depth portrait of Yuchi community and society This first interdisciplinary history of the Yuchi people corrects the historical record which often submerges the Yuchi within the Creek Confederacy instead of acknowledging the Yuchi as a separate tribe By looking at the oral historical ethnographic linguistic and archaeological record contributors illuminate Yuchi political circumstances and cultural identity Focusing on the pre Removal era the volume shows that from the entrada of Hernando de Soto into the American South in 1541 to the Yuchis internal migrations throughout the hinterlands of the South and their entanglement with the Creeks to the maintenance of community and identity today the Yuchis have persisted as a distinct people This volume provides a voice to an indigenous nation that previous generations of scholars have misidentified or erroneously assumed to be a simple constituent of the Creek Nation In doing so it offers a fuller picture of Yuchi social realities since the arrival of Europeans and other non natives in their Southern homelands

**Monuments to Absence** Andrew Denson, 2017-02-02 The 1830s forced removal of Cherokees from their southeastern homeland became the most famous event in the Indian history of the American South an episode taken to exemplify a broader experience of injustice suffered by Native peoples In this book Andrew Denson explores the public memory of Cherokee removal through an examination of memorials historic sites and tourist attractions dating from the early twentieth century to the present White southerners Denson argues embraced the Trail of Tears as a story of Indian disappearance Commemorating Cherokee removal affirmed white possession of southern places while granting them the moral satisfaction of acknowledging past wrongs During segregation and the struggle over black civil rights removal memorials reinforced whites authority to define the South s past and present Cherokees however proved capable of repossessing the removal memory using it for their own purposes during a time of crucial transformation in tribal politics and U S Indian policy In considering these representations of removal Denson brings commemoration of the Indian past into the broader discussion of race and memory in the South

*Archaeological Perspectives on the Southern Appalachians* Ramie A. Gougeon, Maureen Meyers, 2015-03-10 This volume demonstrates how archaeologists working in the Southern Appalachian region over the past 40 years have developed rich interpretations of prehistoric and historic Southeastern Native societies by examining them from multiple scales of analysis The end results of these examinations demonstrate both the uses and the constraints of multiscale approaches in reconstructing various lifeways across the

Southeast      **Ancient Foodways** C. Margaret Scarry, Dale L. Hutchinson, Benjamin S. Arbuckle, 2022-12-30 Through various case studies this volume illustrates how archaeologists can use bioarchaeology zooarchaeology archaeobotany architecture and other evidence to interpret past foodways and reconstruct past social worlds      *Time before History* H. Trawick Ward, R. P. Stephen Davis Jr., 2018-06-15 North Carolina's written history begins in the sixteenth century with the voyages of Sir Walter Raleigh and the founding of the ill fated Lost Colony on Roanoke Island But there is a deeper unwritten past that predates the state's recorded history The region we now know as North Carolina was settled more than 10 000 years ago but because early inhabitants left no written record their story must be painstakingly reconstructed from the fragmentary and fragile archaeological record they left behind *Time before History* is the first comprehensive account of the archaeology of North Carolina Weaving together a wealth of information gleaned from archaeological excavations and surveys carried out across the state from the mountains to the coast it presents a fascinating readable narrative of the state's native past across a vast sweep of time from the Paleo Indian period when the first immigrants to North America crossed a land bridge that spanned the Bering Strait through the arrival of European traders and settlers in the sixteenth and seventeenth centuries
