Preindustrial Korea And Japan In Environmental Perspective:

Pre-Industrial Korea and Japan in Environmental Perspective Conrad D. Totman, 2004 Taking the history of Japan and Korea and their environmental interactions from late Pleistocene down to about 1870 AD this work aims to make a convincing case for viewing the two countries together looking at their pre industrial experiences Politics, and Ideology in North Korea Robert Winstanley-Chesters, 2014-11-12 Environmental and developmental matters have long proved key to North Korea's revolutionary industrial and economic strategies. They have equally been important to Pyongyang's diplomatic and geo political efforts both during the Warsaw Pact period and in our contemporary era following the collapse of its supportive and collaborative partners However while environmental issues have been very important to North Korea academic analysis and commentary addressing this field of governmental and institutional functionality has been almost entirely lacking This book fills this analytical void Taking a narrative view of developmental approach throughout the political and ideological history of North Korea Winstanley Chesters first considers its impact on its landscapes and topographies in general throughout the era of the Kim dynasty Second in light of recent academic analysis suggesting North Korea as a space of Charismatic politics the book focuses on the specificity of individual developmental sectors and projects such as those addressing forestry and hydrology seeking to trace general trends into these more What is Environmental History? J. Donald Hughes, 2015-11-30 What is environmental particular environmental fields history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook I Donald Hughes provides a masterful overview of the thinkers topics and perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for **Japan** Conrad Totman, 2014-01-30 From the outset society in Japan has been shaped by its environmental future work context The lush green mountainous archipelago of today with its highly productive lowlands supports a population of more than 127 million people and one of the most advanced economies in the world How has this come about and at what environmental cost Conrad Totman one of the world's foremost scholars on Japanese here provides a comprehensive and detailed account of the country's environmental history from its beginnings to the present day Professor Totman traces the country's development through successive historical phases as early agricultural society based on non intensive forms of cultivation gave way to more intensified forms With each stage came greater utilisation of natural resources but a steady

reduction in the richness of the indigenous biosystem By the late seventeenth century the country was well on the way to ecological disaster Yet Japan's isolation in the seventeenth and eighteenth centuries led to an unusually enlightened set of environmental policies and the system of regenerative forestry brought in during the Tokugawa period prevented certain devastation of the country's forests At the end of the nineteenth century however the country began to go to the opposite extreme as industrialisation brought with it a period of unprecedented change Growth and diversification led to a surge in environmental pollution as it became necessary to look beyond the country's domestic natural resources to meet the demand for foodstuffs fossil fuels and the raw materials necessary to an advanced industrial economy. The population was particularly badly affected and some of the problems that emerged especially from the 1960s onwards provided important test cases not just for Japan but worldwide What makes the Japanese story particularly instructive is that the country's boundaries are uncommonly clear and the nature timing and extent of external influences on its history are unusually identifiable The Japanese experience therefore not only yields important insights into the processes of environmental history it offers important lessons for the wider environmental history of the planet and for our understanding of current global ecological problems A work of immense erudition and reflecting a lifetime of scholarship Japan an Environmental History will be welcomed by all with an interest in environmental history and the historical development of Japan Seeds of Control David Fedman, 2020-07-23 Conservation as a tool of colonialism in early twentieth century Korea Japanese colonial rule in Korea 1905 1945 ushered in natural resource management programs that profoundly altered access to and ownership of the peninsula's extensive mountains and forests Under the banner of forest love the colonial government set out to restructure the rhythms and routines of agrarian life targeting everything from home heating to food preparation Timber industrialists meanwhile channeled Korea's forest resources into supply chains that grew in tandem with Japan's imperial sphere These mechanisms of resource control were only fortified after 1937 when the peninsula and its forests were mobilized for total war In this wide ranging study David Fedman explores Japanese imperialism through the lens of forest conservation in colonial Korea a project of environmental rule that outlived the empire itself Holding up for scrutiny the notion of conservation Seeds of Control examines the roots of Japanese ideas about the Korean landscape as well as the consequences and aftermath of Japanese approaches to Korea s greenification Drawing from sources in Japanese and Korean Fedman writes colonized lands into Japanese environmental history revealing a largely untold story of green imperialism in Asia **Ecoambiguity** Karen Thornber, 2012-03-02 Delving into the complex contradictory relationships between humans and the environment in Asian The Underground Wealth of Nations Jeannette Graulau, 2019-10-08 Silver mining was a capitalist business literatures long before the supposed origin of modern capitalism Hundreds of years before a sixteenth century crisis in European agriculture led to the origins of capital investment and finance the silver mining industry exhibited many of the features of modern capitalism Silver mines were large scale businesses that demanded large investments and steady cash flow achieved

by spreading that risk through fungible shares and creating legal structures to protect entrepreneurs from financial disaster Jeannette Graulau argues that mining preceded agriculture as the first true capitalist enterprise of the modern world

Japan at Nature's Edge Ian Jared Miller, Julia Adeney Thomas, Brett L. Walker, 2013-07-01 Japan at Nature's Edge is a timely collection of essays that explores the relationship between Japan's history culture and physical environment It greatly expands the focus of previous work on Japanese modernization by examining Japan's role in global environmental transformation and how Japanese ideas have shaped bodies and landscapes over the centuries The immediacy of Earth's environmental crisis a predicament highlighted by Japan's March 2011 disaster brings a sense of urgency to the study of Japan and its global connections The work is an environmental history in the broadest sense of the term because it contains writing by environmental anthropologists a legendary Japanese economist and scholars of Japanese literature and culture The editors have brought together an unparalleled assemblage of some of the finest scholars in the field who rather than treat it in isolation or as a unique cultural community seek to connect Japan to global environmental currents such as whaling world fisheries mountaineering and science mining and industrial pollution and relations with nonhuman animals The contributors assert the importance of the environment in understanding Japan's history and propose a new balance between nature and culture one weighted much more heavily on the side of natural legacies This approach does not discount culture Instead it suggests that the Japanese experience of nature like that of all human beings is a complex and intimate negotiation between the physical and cultural worlds Contributors Daniel P Aldrich Jakobina Arch Andrew Bernstein Philip C Brown Timothy S George Jeffrey E Hanes David L Howell Federico Marcon Christine L Marran Ian Jared Miller Micah Muscolino Ken ichi Miyamoto Sara B Pritchard Julia Adeney Thomas Karen Thornber William M Tsutsui Brett L Walker Takehiro Watanabe Sacred Forests of Asia Chris Coggins, Bixia Chen, 2022-05-30 Presenting a thorough examination of the sacred forests of Asia this volume engages with dynamic new scholarly dialogues on the nature of sacred space place landscape and ecology in the context of the sharply contested ideas of the Anthropocene Given the vast geographic range of sacred groves in Asia this volume discusses the diversity of associated cosmologies ecologies traditional local resource management practices and environmental governance systems developed during the pre colonial colonial and post colonial periods Adopting theoretical perspectives from political ecology the book views ecology and polity as constitutive elements interacting within local regional and global networks Readers will find the very first systematic comparative analysis of sacred forests that include the karchall mabbuy of the Katu people of Central Vietnam the leuweng kolot of the Baduy people of West Java the fengshui forests of southern China the groves to the goddess Sarna Mata worshiped by the Oraon people of Jharkhand India the mauelsoop and bibosoop of Korea and many more Comprising in depth field based case studies each chapter shows how the forest s sacrality must not be conceptually delinked from its roles in common property regimes resource security spiritual matters of ultimate concern and cultural identity.
