Prejudice The Targets Perspective:

Prejudice Janet K. Swim, Charles Stangor, 1998-05-07 Prejudice The Target's Perspective turns the tables on the way prejudice has been looked at in the past. Almost all of the current information on prejudice focuses on the person holding prejudiced beliefs. This book however provides the first summary of research focusing on the intended victims of prejudice. Divided into three sections the first part discusses how people identify prejudice, what types of prejudice they encounter and how people react to this prejudice in interpersonal and intergroup settings. The second section discusses the effect of prejudice on task performance, assessment of one's own abilities, self-esteem and stress. The final section examines how people cope with prejudice including a discussion of coping mechanisms, reporting sexual harassment and how identity is related to effective coping. Includes an introduction, the consequences of prejudice and how to cope with prejudice. The editors are top researchers in the field of prejudice. All the contributors are major figures in the social psychological analysis of intergroup relationships.

Social Psychological Perspectives on Stigma John B. Pryor, Arjan E. R. Bos, 2016-04-08 The year 2013 marks the 50th anniversary of the publication of Erving Goffman's landmark work *Stigma: Notes on the Management of Spoiled Identity*. Through this edited volume we commemorate the continuing contribution of Goffman's work on stigma to social psychology. As Goffman originally used the term stigma implies some sort of negative deviance or in his words an undesired differentness from what we had anticipated. Since Goffman's pioneering treatise there have been thousands of articles published on different aspects of stigma. The accelerating volume of articles is testimony to the growing importance of stigma research with almost three out of four of the stigma related publications in the research literature appearing in the last 10 years. In this volume a collection of up and coming and seasoned stigma researchers provide both theoretical insights and new empirical findings. The volume should be of interest to both established researchers and advanced students seeking to learn more about the depth and breadth of stigma research. This book was originally published as a special issue of *Basic and Applied Social Psychology*.

Objectification and (De)Humanization Sarah J. Gervais, 2013-05-24 People often see nonhuman agents as human-like. Through the processes of anthropomorphism and humanization people attribute human characteristics including personalities, free will and agency to pets, cars, gods, nature and the like. Similarly there are some people who often see human agents as less than human or more object-like. In this manner objectification describes the treatment of a human being as a thing, disregarding the person's personality and/or sentience. For example, women, medical patients, racial minorities and people with disabilities are often seen as animal-like or less than human through dehumanization and objectification. These two opposing forces may be considered a continuum with anthropomorphism and humanization on one end and dehumanization and objectification on the other end. Although researchers have identified some of the antecedents and consequences of these processes, a systematic investigation of the motivations that underlie this continuum is lacking. Considerations of this continuum may have considerable implications for such areas as everyday human

functioning interactions with people animals and objects violence discrimination relationship development mental health or psychopathology The edited volume will integrate multiple theoretical and empirical approaches on this issue **Good Works in 1 Peter** Travis B. Williams,2014-10-08 Drawing on recent insights from postcolonial theory and social psychology Travis B Williams seeks to diagnose the social strategy of good works in 1 Peter by examining how the persistent admonition to do good is intended to be an appropriate response to social conflict Challenging the modern consensus which interprets the epistle s good works language as an attempt to accommodate Greco Roman society and thereby to lessen social hostility the author demonstrates that the exhortation to do good envisages a pattern of conduct which stands opposed to popular values The Petrine author appropriates terminology that was commonly associated with wealth and social privilege and reinscribes it with a new meaning in order to provide his marginalized readers with an alternative vision of reality one in which the honor and approval so valued in society is finally available to them The good works theme thus articulates a competing discourse which challenges dominant social structures and the hegemonic ideology which underlies them
