**Mark Steyvers**

## **Preliminary Analysis Of Advance Appropriations In Budgeting Method For Navy Ship Procurements:**

A Preliminary Analysis of Advance Appropriations as a Budgeting Method for Navy Ship Procurements Irv Blickstein, Giles K. Smith, 2002 A companion piece to MR 1526 that examines the pros and cons of applying advance appropriations across a broader segment of the Navy shipbuilding program than just aircraft carriers The entire cost of a ship is normally included in the congressional budget for the year of construction start which can cause large year to year fluctuations in the shipbuilding budget and complicate budget management This report analyzes an alternative strategy advance appropriations whereby the full cost of a ship is distributed over several budget years This strategy can reduce fluctuations in the budget level and can create the equivalent of a loan against future budgets but also constrains management flexibility in coping with unexpected events

A Preliminary Analysis of Advance Appropriations as a Budgeting Method for Navy Ship Procurements, 2002 The Navy shipbuilding program typically comprises a few individually very expensive projects together with an irregular schedule of new starts Such a combination can lead to major fluctuations in year to year budget totals even when everything proceeds according to a long range plan However major defense acquisition programs rarely exhibit long term stability Changing circumstances dictate changing needs programs run into problems causing both schedule and cost overruns etc Furthermore when the Navy prepares its budget the relatively large shipbuilding portion is occasionally used as a source of funds to meet other needs The resulting fluctuations in an account as large as shipbuilding it is usually about 10 percent of the Navy s budget combined with a budget cycle that normally requires major allocation decisions to be made two to three years before the appropriation year can pose major problems

A Preliminary Analysis of Advance Appropriations as a Budgeting Method for Navy Ship Procurements, 2002 The Navy shipbuilding program typically comprises a few individually very expensive projects together with an irregular schedule of new starts Such a combination can lead to major fluctuations in year to year budget totals even when everything proceeds according to a long range plan However major defense acquisition programs rarely exhibit long term stability Changing circumstances dictate changing needs programs run into problems causing both schedule and cost overruns etc Furthermore when the Navy prepares its budget the relatively large shipbuilding portion is occasionally used as a source of funds to meet other needs The resulting fluctuations in an account as large as shipbuilding it is usually about 10 percent of the Navy s budget combined with a budget cycle that normally requires major allocation decisions to be made two to three years before the appropriation year can pose major problems *Hearing on National Defense Authorization Act for Fiscal Year 2006 and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Ninth Congress, First Session United States.*

Congress. House. Committee on Armed Services. Projection Forces Subcommittee, 2006 *Why Has the Cost of Navy Ships Risen?* Mark V. Arena, 2006 Over the past several decades the increases in acquisition costs for U S Navy amphibious ships surface combatants attack submarines and nuclear aircraft carriers have outpaced the rate of inflation To understand why

the authors of this book examined two principal source categories of ship cost escalation economy driven factors which are outside the control of the Navy and customer driven factors features for which the Navy has the most control The authors also interviewed various shipbuilders to find out their views on other issues contributing to increasing costs Based on their analysis the authors propose some ways the Navy might reduce ship costs in the future including limiting growth in features and requirements and reconsidering the mission orientation of ships It is recognized however that such reductions come at a cost since the nation and the Navy understandably desire technology and capability that is continuously ahead of their competitors
