Preliminary Discourse to the Encyclopedia of Diderot D'Alembert Richard Schwab,Walter E. Rex,1963-01

Preliminary Discourse to the Encyclopedia of Diderot ... Translated by Richard N. Schwab ... with the Collaboration of Walter E. Rex ... With an Introduction and Notes by Richard N. Schwab. (Second Printing.). Denis Diderot,Walter Edwin REX,Richard Narum SCHWAB,1972* **Preliminary Discourse to the Encyclopedia of Diderot** Robert Rees Rawson,1963 *The Discourse of Scholarly Communication* Patrick Gamsby,2023-08-14 The Discourse of Scholarly Communication examines the place and purpose of modern scholarship and its dialectical relationship with the ethos of Enlightenment Patrick Gamsby argues that while Enlightenment enlightenment is often used in the mottos of numerous academic institutions its historical social and philosophical elements are largely obscured Using a theoretical lens Gamsby revisits the ideals of the Enlightenment alongside the often contradictory issues of disciplinary boundaries access to research academic labor in the production of scholarship author peer reviewer editor and translator the interrelationship of form and content lectures textbooks books and essays and the stewardship of scholarship in academic libraries and archives It is ultimately argued that for the betterment of the scholarly communication ecosystem and the betterment of society anti Enlightenment rules of scholarship such as publish or perish should be dispensed with in favor of the formulation of a New Enlightenment *Rethinking the Enlightenment* Henry Martyn Lloyd,Geoff Boucher,2017-12-29 One of the most persistent troubling and divisive of the ideological divisions within modernity is the struggle over the Enlightenment and its legacy Much of the difficulty is owed to a general failure among scholars to consider how history philosophy and politics work together Rethinking the Enlightenment bridges these disciplinary divides Recent work by historians has now called into question many of the clichés that still dominate scholarly understandings of the Enlightenment's literary philosophical and political culture Yet this work has so far had little impact on the reception of the Enlightenment its key players debates and

ideas in the disciplines that most rely on its legacy namely philosophy and political science Edited by Geoff Boucher and Henry Martyn Lloyd Rethinking the Enlightenment makes the case for connecting new work in intellectual history with fresh understandings of Continental philosophy and political theory In doing so in this collection moves towards a critical self understanding of the present **Casanova and Enlightenment** David John Thompson, 2024-12-30 Giacomo Casanova 1725 1798 was born the son of a moderately poor acting family at a time when the stage carried enormous social stigma Yet in his own lifetime he achieved celebrity across Europe rubbing shoulders with numerous of the eighteenth century s greatest men and women from Frederick the Great to Catherine the Great from Voltaire to Albrecht von Haller from Pope Benedict XIV to Pope Clement XIII It was a fame that had little to do with his romantic exploits This was to come later following upon the posthumous publication of his magnificent History of My Life An adventurer and a man of learning his was an extraordinary career whose story was intertwined with the story of eighteenth century Europe Casanova s Life and Times the first book of this two volume project concentrates on what it was like to live in the eighteenth century This second book Casanova Enlightenment now turns to Casanova s intellectual development within the context of the Enlightenment proposing a re evaluation of his status as a philosopher **Literary Theory and Criticism: An Introduction** Anne H. Stevens, 2015-06-18 Literary Theory and Criticism An Introduction provides an accessible overview of major figures and movements in literary theory and criticism from antiquity to the twenty first century It is designed for students at the undergraduate level or for others needing a broad synthesis of the long history of literary theory An introductory chapter provides an overview of some of the major issues within literary theory and criticism further chapters survey theory and criticism in antiquity the Middle Ages and Renaissance the Enlightenment and the nineteenth century For twentieth and twenty first century theory the discussion is subdivided into separate chapters on formalist historicist political and psychoanalytic approaches The final chapter applies a variety of theoretical concepts and approaches to two famous works of literature William Shakespeare s Hamlet and Mary Shelley s Frankenstein **Tense Future** Paul K. Saint-Amour, 2015 A work of literary history that redefines literary modernism s development in relation to the concurrent emergence of total war and the psychological effects it created between the two world wars **The Psychology of Inequality** Michael Locke McLendon, 2018-11-19 In The Psychology of Inequality Michael Locke McLendon looks to Jean Jacques Rousseau s thought for insight into the personal and social pathologies that plague commercial and democratic societies He emphasizes the way Rousseau appropriated and modified the notion of self love or amour propre found in Augustine and various early modern thinkers McLendon traces the concept in Rousseau s work and reveals it to be a form of selfish vanity that mimics aspects of Homeric honor culture and in the modern world shapes the outlook of the wealthy and powerful as well as the underlying assumptions of meritocratic ideals According to McLendon Rousseau s elucidation of amour propre describes a desire for glory and preeminence that can be dangerously antisocial as those who believe themselves superior derive pleasure from dominating and even harming those

they consider beneath them Drawing on Rousseau s insights McLendon asserts that certain forms of inequality especially those associated with classical aristocracy and modern day meritocracy can corrupt the mindsets and personalities of people in socially disruptive ways The Psychology of Inequality shows how amour propre can be transformed into the demand for praise whether or not one displays praiseworthy qualities and demonstrates the ways in which this pathology continues to play a leading role in the psychology and politics of modern liberal democracies **The Other Enlightenment** Matthew Sharpe,2023-02-16 Challenging widespread misunderstandings this book shows that central to key enlightenment texts was the practice of estranging taken for granted prejudices by adopting the perspective of Others The enlightenment s key progenitors led by Montesquieu Voltaire and Diderot were more empiricist than rationalist and more critical than utopian Moreover each was an artful exponent of the proto postmodernist practice of asking Europeans to review what they considered unquestionable through the eyes of Others Persians women Tahitians Londoners natives and natives the blind and even imaginary extra terrestrials This book aims to show that this self estrangement as a means to gain critical distance from one s taken for granted assumptions was central to the enlightenment and remains vital for critical and constructive sociopolitical thinking today Divine Art, Infernal Machine Elizabeth L. Eisenstein,2011 Annotation Divine Art Infernal Machine presents a history of the printing press of the ambivalent attitudes of the public toward printers printing since the days of Gutenberg his business partner Johann Fust a gentleman often tellingly confused with the notorious Doctor Faustus

Rebuilding the Profession Dorothy Figueira,2020-01-20 This volume is meant to be a retrospective look at the field of Comparative Literature as it has developed in the past two decades as well as a reflection on its future direction if it is to remain relevant and innovative as a field of study From its inception in the second half of the twentieth century Comparative Literature in the US has been conceived as a cross disciplinary cross national and crosscultural enterprise that brings together theoretical developments in the Humanities and Social Sciences to reflect on the most important intellectual and cultural trends from a comparative perspective through the lens of literary studies Most of the founders of Comparative Literature were distinguished European scholars who sought a safe haven from the ravages of World War II and its aftermath and who understandably focused on the Western literary intellectual and cultural tradition which at the time was in danger of being annihilated by the onslaught of Fascism and Communism With the advent of the age of globalization the field of Comparative Literature has become increasingly diverse and must therefore be reoriented and recognized accordingly

Living Skepticism. Essays in Epistemology and Beyond ,2022-10-17 This book of original papers offers fresh approaches to skepticism a topic in philosophy with a noble two millennia history and one that even inaugurated modern philosophy in Descartes s Meditations Particularly with the rise of scientific forms or models of philosophy skepticism today is often treated as a dead end not worthy of serious reflection In contrast to this prevailing attitude the skepticisms discussed in these pages are alive Here are assembled leading thinkers who claim at least some forms of skepticism to be true e g

skepticism about ethics or metaphysics or insightful enough to be a lasting source of philosophical enlightenment and inspiration

Information Ages Michael E. Hobart, Zachary S. Schiffman, 2000-05-26 A grand intellectual history from clay tablets to Bill Gates Selected by Choice Magazine as an Outstanding Academic Title The late twentieth century is trumpeted as the Information Age by pundits and politicians alike and on the face of it the claim requires no justification But in Information Ages Michael E Hobart and Zachary S Schiffman challenge this widespread assumption In a sweeping and captivating history of information technology from the ancient Sumerians to the world of Alan Turing and John von Neumann the authors show

how revolutions in the technology of information storage from the invention of writing approximately 5 000 years ago to the mathematical models for describing physical reality in the seventeenth and eighteenth centuries to the introduction of computers profoundly transformed ways of thinking
