

# Preliminary Approaches To Language Development

**Brian MacWhinney**

## **Preliminary Approaches To Language Development:**

Preliminary approaches to language development Kim Plunkett, 1982      Preliminary Approaches to Language Development Kim Plunkett, 1985 Preliminary Approaches to Language Development      **The Crosslinguistic Study of Language Acquisition** Dan Isaac Slobin, 2022-03-01 Extending the tradition of this series which has become a standard reference work in language acquisition this volume contains chapters on seven more languages including a section on ergative languages Languages in this volume include Georgian Greenlandic Kiche Mayan Warlpiri Mandarin Scandinavian and Sesotho      *The Childes Project* Brian MacWhinney, 2014-01-09 Volume I is the first of two volumes that document the three components of the CHILDES Project It is divided into two parts which provide an introduction to the use of computational tools for studying language learning The first part is the CHAT manual which describes the conventions and principles of CHAT transcription and recommends specific methods for data collection and digitization The second part is the CLAN manual which describes the uses of the editor sonic CHAT and the various analytic commands The book will be useful for both novice and experienced users of the CHILDES tools as well as instructors and students working with transcripts of child language Volume II describes in detail all of the corpora included in the CHILDES database The conversational interactions in the corpora come from monolingual children and their caregivers and siblings as well as bilingual children older school aged children adult second language learners children with various types of language disabilities and aphasic recovering from language loss The database includes transcripts in 26 different languages      **A Developmental-functionalist Approach To Child Language** Nancy Budwig, 2013-04-15 Although there has been much empirical study within what has been referred to as functional approaches to child language there has yet to be a major attempt to compare and contrast such proposals In addition much of the work carried out within child language from a functionalist perspective has not been specific with regard to the nature of the approach adopted In attempting to fill the gap the author of this book begins with a comparison of various functionalist approaches By concentrating on one domain agentivity and control Budwig develops a set of research questions based on an examination of findings stemming from linguistics psycholinguistics and developmental psychology and also provides an in depth discussion of related methodological issues In the second part of the book she traces the development of linguistic means to refer to oneself within a developmental functionalist perspective Individual case studies as well as group analyses of six children in the early phases of acquiring English grammar are provided In the last part Budwig examines the relationship between forms and functions in development with special attention to potential generalizations about the organization and reorganization of the children's linguistic systems      **The Acquisition of Derivational Morphology** Veronika Mattes, Sabine Sommer-Lolei, Katharina Korecky-Kröll, Wolfgang U. Dressler, 2021-11-15 This book offers the first systematic study of the early phases in the acquisition of derivational morphology from a cross linguistic and typological perspective It presents ten empirical

longitudinal studies in genealogically and typologically diverse languages Indo European Finno Ugric Altaic with different degrees of derivational complexity Data collection analysis and systematic comparison between child speech and parental child directed speech are strictly parallel across the chapters In order to identify the productivity of a derivational pattern signalling the crucial developmental stage in its acquisition the concept of the mini paradigm criterion was applied Similar developmental processes can be observed in all children independent of the language they acquire but the children s courses of development also show obvious typological differences This points towards an important impact of the structural properties of the specific language on emergence use and the early course of development of derivational patterns

**Resources in Education** ,1995-04      **Development of Verb Inflection in First Language Acquisition** Dagmar Bittner,Wolfgang U. Dressler,Marianne Kilani-Schoch,2011-06-24 The volume deals with the emergence of verb morphology in children during their second and early third year of life from a cross linguistic perspective It covers 15 contributions each analyzing one single language based on parallel longitudinal investigations of children with parallel methodology and macrostructure in representation The main question addressed is How do children detect morphology and construct first subsystems of verbal inflection The focus lies on the transition from a premorphological phase to a protomorphological phase The main proposal consists in the concept of miniparadigms and of their relation to morpho syntactic developments in early first language acquisition      **Nominal Compound Acquisition** Wolfgang U. Dressler,F. Nihan Ketrez,Marianne Kilani-Schoch,2017-12-15 This book offers a systematic study of the emergence and early development of compound nouns in first language acquisition from a cross linguistic and typological perspective The language sample is both genealogically and typologically diversified ranging from languages rich in compounds such as German Saami Estonian and Finnish to languages poor in compounds such as French Some of them differ in compound richness according to genres of adult directed speech in contrast to child directed speech and thus also child speech like Russian Lithuanian and especially Greek Differences in the delimitation and transition between compounds and phrases and in the distribution of subtypes of compounds in these languages involve great typological variety and thus different tasks for children acquiring them The eleven languages investigated in the volume and the common methodology of longitudinal collection of spontaneous speech data concerning the interaction between children and their caretakers or peers supplemented by lexical typology as a new means of cross linguistic comparison of language acquisition allow new generalizations and make the volume a unique contribution      **The Acquisition of Complex Morphology** William Forshaw,2021-10-15 Many theories of language acquisition struggle to account for the morphological complexity and diversity of the world s languages This book examines the acquisition of complex morphology of Murrinhpatha a polysynthetic language of Northern Australia It considers semi naturalistic data from five children 1 9 6 1 collected over a two year period Analysis of the Murrinhpatha data is focused on the acquisition of polysynthetic verb constructions large irregular inflectional paradigms and bipartite stem verbs which all

pose interesting challenges to the learner as well as to theories of language acquisition The book argues that morphological complexity which broadly includes factors such as transparency predictability regularity richness type token frequency and productivity must become central to our understanding of morphological acquisition It seeks to understand how acquisition is impacted by differences in morphological systems and by the ways in which children and their interlocutors use these systems

**The Acquisition of Verbs and their Grammar:** Natalia Gagarina, Insa Gülzow, 2006-07-15 language specific competence within the acquisitional process Together with the focus on acquisition of the verb and its grammar research in this domain provides a fruitful basis for discussion The maturation model of language acquisition assumes that UG becomes the language specific grammar over time and that UG is entirely available only up until the time when the native language has been completely acquired cf Atkinson 1992 Wexler 1999 Constructivist models that may also be opposed to theories of UG alongside with the usage based approaches mentioned above mostly elaborate on the early acquisition of spatial relations e g Bowerman and Choi 2001 Sinha et al 1999 however two main hypotheses of this approach a holistic view of universal spatial cognition and the language specific acquisition hypothesis are beyond the main scope of this book The book presents original contributions based on analyses of naturalistic data from eleven languages Croatian Dutch English Estonian French German Hebrew Jakarta Indonesian Japanese Russian and Spanish Three of the contributions make cross linguistic comparisons between English and Russian English German and Spanish and German Croatian and English All papers in the volume investigate first language acquisition and one paper studies both first and second language acquisition

*Computer Supported Collaborative Learning 2005* Timothy Koschmann, 2017-10-03 The Computer Supported Collaborative Learning CSCL conference has become an internationally recognized forum for the exchange of research findings related to learning in the context of collaborative activity and the exploration of how such learning might be augmented through technology This text is the proceedings from CSCL 2005 held in Taipei Taiwan This conference marked the 10th anniversary of the first CSCL Conference held at Indiana University in 1995 Subsequent meetings have been held at the University of Toronto Stanford University University of Maastricht Netherlands University of Colorado at Boulder and the University of Bergen Norway Just as the first CSCL conference was instrumental in shaping the trajectory of the field in its first decade the conference in Taipei will play an important role in consolidating an increasingly international and interdisciplinary community and defining the direction of the field for the next 10 years This volume and the papers from which it is comprised will be an important resource for those active in this area of research and for others interested in fostering learning in settings of collaboration
