you make better buying decisions and get more from technology   Evaluation and Translation Carol Maier,2014-04-23 The definition of value or quality with respect to work in translation has historically been a particularly vexed issue Today however the growing demand for translations in such fields as technology and business and the increased scrutiny of translators work by scholars in many disciplines is giving rise to a need for more nuanced more specialized and more explicit methods of determining value Some refer to this determination as evaluation others use the term assessment Either way the question is one of measurement and judgement which are always unavoidably subjective and frequently rest on criteria that are not overtly expressed This means that devising more complex evaluative practices involves not only quantitative techniques but also an exploration of the attitudes preferences or individual values on which criteria are established Intended as an interrogation and a critique that can serve to prompt a more thorough and open consideration of evaluative criteria this special issue of The Translator offers examinations of diverse evaluative practices and contains both empirical and hermeneutic work Topics addressed include the evaluation of student translations using more up to date and positive methods such as those employed in corpus studies the translation of non standard language translation into the second language terminology the application of theoretical criteria to practice a social textual perspective and the reviewing of literary translations in the press In addition reviews by a number of literary translators discuss specific translations both into and out of English   **History and Electronic Artefacts** Edward Higgs,1998 We are now entering a world of electronic communications where an increasing amount of contemporary information is created and retained only in electronic form How will such unstable flows of information be preserved for future historians Will the future have a past Will the history of ourcontemporary world be lost to our descendants History and Electronic Artefacts is the first publication to examine the implications of this revolution for historical research Historians are used to handling paper and parchment record in archives These are actual pieces of correspondence which passed between historical actors They are alsorelatively stable artefacts which can be preserved easily Two factors introduced by the electronic revolution threaten the existence of paper archives the dissociation between information content and the media by which it is transmitted ruptures the solidity of the archival object The ability tostore electronic information anywhere and access it remotely via networks could make the central paper archive redundant Experts from the fields of information management and technology data archiving library science as well as historians consider the issues raised in depth The authors also place a unique emphasis on European developments   **An Ethical Global Information Society** Jacques J. Berleur,Diane Whitehouse,2013-11-11 Many challenges lie ahead in the development of a global information society Culture and democracy are two areas which may be under particular threat The book reflects on today s complex and uncertain cultural and democratic developments arising as a result of an increasingly global technologically connected world In particular it focuses on the Internet examining new metaphors for communication defining the issues at stake and proposing options actions and solutions Among the issues discussed were multi cultural

developments cultural sensitivities and the involvement of cultural minorities generation gaps gender issues technology access for the elderly and the disabled technology transfer *Quality Software Project Management* Robert T.
