

## Preparación para la muerte y celebración de la vida: apoyo emocional para familias con hijos enfermos del corazón en México

Psic. Almudena March-Mitsut, Psic. Gabriela Ma. Gómez-Macal

### RESUMEN

Desde el nacimiento de una persona hasta el momento en que ésta hace estímulos y susciones críticas que llevan que confrontarse para poder crecer internamente y seguir viviendo. Cuando la familia se enfrenta al diagnóstico de enfermedad congénita cardíaca, se dan cuenta que la expectativa de vida para su hijo enfermo y los planes que tienen para el futuro, son inciertos hasta que puedan conocer los resultados de la cirugía o el tratamiento médico que se les indique.

En el Instituto Nacional de Pediatría, a pesar de que la cirugía cardíaca de defectos congénitos ha tenido un gran avance en los últimos años, aún tenemos que manejar muchas factores socioeconómicos que a veces bloquean la recuperación del niño después de la operación. Nuestro hospital pertenece al sector público y es subvencionado por el gobierno. Las familias que atendemos no tienen ningún tipo de seguro médico ni seguro social y muchas viven en situación de pobreza, con todos los consecuentes que esta condición lleva consigo. En todas las cirugías complejas del corazón que se realizan en nuestro Instituto acompañamos a las familias desde el momento en que llegan al hospital hasta que el niño regresa a la escuela. En el camino tratamos con ellos el tema de la muerte en varias ocasiones y este hecho nos permite establecer un lazo especial entre ellos y nosotros. Existeza a su lado al su hijo llega a la clínica y ofrecemos apoyo psicológico durante el tiempo que lo necesiten, a nivel individual y con un grupo de apoyo para padres de familia.

**Palabras clave:** Apoyo emocional, preparación para la muerte, teriología, cardiopatías congénitas.

### ABSTRACT

From the time of birth to the moment of death, there are several critical moments human beings has to face in order to grow internally and go on living. When families are confronted with the diagnosis of congenital heart disease, they realize that the expectation and plans for the future of their child are uncertain until the results of the surgical or medical treatment are known.

At the Instituto Nacional de Pediatría, congenital heart surgery has advanced considerably in the last 7 years. However we still have to deal with many socioeconomics factors that block postoperative recovery. Due to the fact that our hospital is government founded, most of our families have no medical insurance or social security and they live in extreme poverty with all the consequences of this lifestyle. In all of our complex heart surgeries we accompany the family from the moment they arrive to the hospital until the child goes back to school. Along the way we deal with the possibility of death several times, and this creates a special bond between us. This includes being at their side when their child dies, offer individual counseling and be a part of a great support group afterwards. On the other hand, when the child survives we gladly stay with them to celebrate life in a meaningful way.

**Key words:** Emotional support, death preparation, paediatrics, congenital heart disease.
