Preparing Teachers National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on the Study of Teacher Preparation Programs in the United States, 2010-06-25 Teachers make a difference The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation Yet there are many questions about how teachers are being prepared and how they ought to be prepared Yet teacher preparation is often treated as an afterthought in discussions of improving the public education system *Preparing Teachers* addresses the issue of teacher preparation with specific attention to reading mathematics and science The book evaluates the characteristics of the candidates who enter teacher preparation programs the sorts of instruction and experiences teacher candidates receive in preparation programs and the extent that the required instruction and experiences are consistent with converging scientific evidence *Preparing Teachers* also identifies a need for a data collection model to provide valid and reliable information about the content knowledge pedagogical competence and effectiveness of graduates from the various kinds of teacher preparation programs Federal and state policy makers need reliable outcomes based information to make sound decisions and teacher educators need to know how best to contribute to the development of effective teachers Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now **SRA Open Court Reading**, 2002 *Reading Begins at Home* Dorothy Butler, Marie M. Spear, 2015-07-13 Excerpt from *Preparing to Read or the Beginning of School Life* If we would make a success of anything we must have a good foundation upon which to build even though the task of making this basis is slow and laborious No satisfactory superstructure can rest upon a defective base Many who are just beginning to teach a primary school fail to understand the nature or the amount of preparatory work which is necessary before a child is able to read from a book with ease and with a natural expression It is my purpose to offer such suggestions and to present such details as will assist the inexperienced The exercises given are but suggestive of many others of a similar nature Slowly but steadily must the pupil be led on from the known and familiar to that which is unknown and strange The blackboard is essential in preparatory work since it affords the teacher a means for presenting written forms until they are well known It is a help in gaining the attention of the child who is interested in seeing form given to his oral expression About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst
