The Air Force Way of War Brian D. Laslie,2015-06-23 Laslie chronicles how the Air Force worked its way from the catastrophe of Vietnam through the triumph of the Gulf War and beyond Robert M Farley author of Grounded The U S Air Force s poor performance in Operation Linebacker II and other missions during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its

doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program s new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program s methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of advances in training but Laslie s unprecedented study of Red Flag addresses this oversight through its examination of the seminal program A refreshing look at the people and operational practices whose import far exceeds technological advances The Strategy Bridge

Preparing for Hurricanes and Coastal Flooding ,1983 Anatomy of a Hurricane Terri Dougherty,2011 Hurricanes Managing Hurricane Katrina Arjen Boin,Christer Brown,James A. Richardson,2019-05-07 The government s response to Hurricane Katrina one of the most devastating natural disasters in U S history suffered numerous criticisms Nearly every assessment pointed to failure from

evaluations of President George W Bush FEMA and the Department of Homeland Security to the state of Louisiana and the city administration of New Orleans In *Managing Hurricane Katrina Lessons from a Megacrisis* Arjen Boin Christer Brown and James A Richardson deliver a more nuanced examination of the storm s aftermath than the ones anchored in public memory and identify aspects of management that offer more positive examples of leadership than bureaucratic and media reports indicated Katrina may be the most extensively studied disaster to date but the authors argue that many academic conclusions are inaccurate or contradictory when examined in concert Drawing on insights from crisis and disaster management studies Boin Brown and Richardson apply a clear framework to objectively analyze the actions of various officials and organizations during and after Katrina They specify critical factors that determine the successes and failures of a societal response to catastrophes and demonstrate how to utilize their framework in future superdisasters Going beyond previous assessments *Managing Hurricane Katrina* reconsiders the role of government in both preparing for a megacrisis and building an effective response network at a time when citizens need it most *Film Structure and the Emotion System* Greg M. Smith, 2003-10-13 Films evoke broad moods and cue particular emotions that can be broadly shared as well as individually experienced Although the experience of emotion is central to the viewing of movies film studies have neglected to focus attention on the emotions relying instead on vague psychoanalytic concepts of desire *Movies Emotion and Mood* synthesizes recent research on emotion in cognitive psychology and neurology in an effort to provide a more nuanced understanding of how film evokes emotion **Wide Awake** ,1888
