The Preppy Problem Stephanie Austin, 1984-01-01 **The Terror** C. Gross, 2024-03-26 A fascinating history of the profitable paradox of the American outdoor experience visiting nature first requires shopping No escape to nature is complete without a trip to an outdoor recreational store or a browse through online offerings This is the irony of the American outdoor experience visiting wild spaces supposedly untouched by capitalism first requires shopping With consumers spending billions of dollars on clothing and equipment each year as they seek out nature the American outdoor sector grew over the past 150 years from a small collection of outfitters to an industry contributing more than 2 percent of the nation s economic output Rachel S Gross argues that this success was predicated not just on creating functional equipment but also on selling an authentic anticommercial outdoor identity In other words shopping for the woods was also about being or becoming the right kind of person Demonstrating that outdoor culture is commercial culture Gross examines Americans journey toward outdoor expertise by tracing the development of the nascent outdoor goods industry the influence of World War II on its growth and the boom years of outdoor businesses **Trouble Man** Travis Hunter, 2009-01-27 Growing up on Philadelphia s gritty streets Jermaine Banks was used to fighting but life has now thrown him some unexpected hooks and jabs Almost thirty years old with a three year old son who worships the ground he walks on a pregnant girlfriend whose family hates every breath he takes and a slain best friend whose death racks him with guilt Jermaine realizes it s time to change But can he step up to the challenge or will he continue to be a trouble man 101 Activities for Teaching Creativity and Problem Solving Arthur B. Challenges of Communication in a Context of Crisis Marc Breviglieri, Alexandre Cotovio Martins, 2018-10-09. This book questions the political tools and the basis upon which the values of an informed and objective communication rest, and that nowadays encompass most of the ordinary situations encountered in institutions. What is the fate of the involuntary drifts of communication, such as disturbances, misunderstandings, and troubles in the use of decision making tools, participatory mechanisms, and the establishment of contractual procedures or informed consent practices? How do they open a discordant and potentially critical gap in the protocols and assessment and categorization measures that govern these institutions? How can the virtues of these drifts, whether in the exercise of sociological research or of scientific discovery, be revalued? Crisis situations seem implicitly or explicitly to involve communicative issues. The efforts of normative framing of communication and of information formatting are then numerous. However, as this book shows, one can question not only the effectiveness of these efforts but also how the actors receive them and how they transform the actual modalities of their communication processes.

Weighty Problems Laura Backstrom, 2019-04-05 Many parents teachers and doctors believe that childhood obesity is a social problem that needs to be solved Yet missing from debates over what caused the rise in childhood obesity and how to fix it are the children themselves By investigating how contemporary cultural discourses of childhood obesity are experienced by children Laura Backstrom illustrates how deeply fat stigma is internalized during the early socialization experiences of children Weighty Problems details processes of embodied inequality how the children came to recognize inequalities related to their body size how they explained the causes of those differences how they responded to micro level injustices in their lives and how their participation in a weight loss program impacted their developing self image The book finds that embodied inequality is constructed and negotiated through a number of interactional processes including resocialization stigma management social comparisons and attribution

What Women Want--What Men Want John Marshall Townsend, 1998-04-23 Following the work of E O Wilson Desmond Morris and David Buss What Women Want What Men Want offers compelling new evidence about the real reasons behind men s and women s differing sexual psychologies and sheds new light on what men and women look for in a mate the predicament of marriage in the modern world the relation between sex and emotion and many other hotly debated questions Drawing upon 2000 questionnaires and 200 intimate interviews that show how our sexual psychologies affect everyday decisions John Townsend argues against the prevailing ideologically correct belief that differences in sexual behavior are culturally constructed Townsend shows there are deep seated desires inherited from our evolutionary past that guide our actions In a fascinating series of experiments men and women were asked to indicate preferences for potential mates based on their attractiveness and apparent economic status Women overwhelmingly preferred expensively dressed men to more attractive but apparently less successful men and men were clearly inclined to choose more attractive women regardless of their professional status Townsend s studies also indicate that men are predisposed to value casual sex whereas women cannot easily separate sexual relations from the need for emotional attachment and economic security Indeed wherever men possess sexual alternatives to marriage and women possess economic alternatives divorce rates will be high In the concluding chapter Townsend draws upon the advice of couples who have maintained their marriages over the years to suggest ways to survive our evolutionary predicament Lucidly and accessibly written What Women Want What Men Want shows us why we are the way we are and brings new clarity to one of the most intractable debates of our time
