A. Edelstein, Larry Michelson, 2012-12-06 Americans are healing themselves Heckler 1985 and prevention has taken root McGinnis 1985a We are altering our lifestyle to reduce physical and mental health risks Perhaps as important is the fact that the science of prevention is beginning to catch up with the practices of prevention although some might argue that the popularity of these practices far outstrips sound theoretical and empirical foundations The chapter authors in this volume examine the theoretical and empirical foundations of many current prevention practices and where data exist discuss the status of prevention efforts Where substantial prevention is not yet on the horizon the authors attempt to point us in the right direction or at least share with the reader some of the risk factors that should be addressed in our research We hope that readers will be stimulated to discuss the issues raised advance the current research and where possible adopt the prevention and health promotion strategies that are supported by sound theoretical and empirical work This volume can in no way be comprehensive with respect to the current work in prevention however we hope that we have provided a sampling of prevention activities and issues that appear together in one volume for perhaps the first time The primary intent of this volume is modest and the reader should not attempt to find continuity among the various chapters The only binding among these contributions is their focus on prevention

The Practice of Child Therapy Richard J. Morris, Thomas R. Kratochwill, 2008 Consistent with previous editions this book assembles in a single volume summaries of the treatment literature and treatment procedures of the most common childhood behavior disorders facing persons who practice in applied settings clinics schools counseling centers psychiatric hospitals and residential treatment centers Its 16 chapters cover the historical context of child and adolescent therapy obsessive compulsive disorders childhood depression childhood fears phobias and related anxieties attention deficit hyperactivity disorder academic problems conduct disorder somatic disorders autism spectrum disorder intellectual disabilities children medically at risk sexual and other abuse of children child and adolescent psychopharmacotherapy prevention and child therapy and the law Key features include Treatment Orientation Although some chapters include a discussion of theoretical issues the primary emphasis is on intervention techniques and strategies for changing various behavior and learning problems Case examples are often used to illustrate treatment procedures Empirical Orientation While most authors have adopted a broad based behavioral or cognitive behavioral orientation they were encouraged to review the entire treatment literature and to construct their presentations on the basis of empirically supported treatment techniques and procedures Psychopharmacotherapy Chapter The chapter on child and adolescent psychopharmacotherapy focuses on psychopharmacological interventions rather than on which drugs should be prescribed for specific behavior or learning problems Author Expertise Each chapter is written by experts who are well qualified to discuss treatment practices for the specific topic under discussion This book is intended for individuals who have entered or plan to enter the mental health profession or such related professions as counseling special education nursing and rehabilitation It is especially useful for individuals taking child and adolescent therapy and intervention courses

and practicum courses Finally it is suitable for persons who work in applied settings including clinics schools counseling centers psychiatric hospitals and residential treatment centers
