## **Prescription For Change For Doctors Who Want A Life:**

**Prescription for Change for Doctors Who Want a Life** Susan E. Kersley, 2005-11 Prescription for Change for Doctors Who Want a Life promotes a healthy work life balance It is a practical easy to read guide containing useful tools and advice with specific references to medical scenarios written in a straightforward style Susan E Kersley is a qualified doctor and regularly writes for BMJ Career Focus speaks at the BMJ Careers Fair and runs workshops on personal development and self care for doctors Doctors of all grades and specialties will find this philosophy invaluable as will medical mentors careers advisors and counsellors Lifetime Medical Organizer Sandra J. Yorong with Richard Schuttler, Ph.D., 2008-05-08 Sandi created the Lifetime Medical Organizer for the love of her family during a medical crisis with her father As she created organizers for others she realized the value it provided beyond her family s needs This value is what Sandi emphasizes in the Lifetime Medical Organizer as she shares her story of how the organizer came to life and her step by step guide with helping others to establish their own organizer Creating an organizer without instructions is like baking a cake without directions It is difficult to record and organize important information in the same way it is to mix ingredients if you do not know how to begin The Lifetime Medical Organizer includes narrative pages for every form included in the book to walk you through the steps that are easy to follow and simple to understand While writing this book Sandi focused on how she could help you and those closest to you to better manage the process that many are unprepared to deal with until it is too late Whether you create an organizer for yourself or a loved one it will provide you with greater peace of mind in knowing that you are better prepared to help those you love In helping others we shall help ourselves for whatever good we give out completes the circle and comes back to us Flora Edwards **Obesity Management in Family Practice** Thomas L. McKnight, 2007-02-16 The acknowledgment that obesity is a disease a disease with enormous impact on both the public health and the economy and an incredible burden to its victims has nally come This nal recognition will hopefully free research dollars and will encourage third party payers to understand the need to cover services for treatment Dr McKnight is an honored family medicine educator who combines his sense of academic rigor with the understanding of a compassionate family p sician Thus he approaches this clinical syndrome in the manner of a family physician he aims to have an effect on the entire person and that person s life not just some disease entity His broad based approach draws on behavioral strategies diet and exercise modification and limited use of pharmaceuticals in selected cases The practical tools presented here will prove to be valuable additions to the armamentarium of care teams that look to develop treatment plans for their patients with this disease I myself have been obese as long as I can remember I am the son of obese parents and my sister has shared this chronic problem Over my lifetime I have dealt with almost all of the problems of obesity and I have used all of the excuses I have dealt with many obese patients during my years in practice some who have said openly that they chose me as their physician because I really couldn t tell them to lose weight since I could not myself **The Great Physician's Rx for Diabetes** Jordan
