[Combat Biplanes of World War II](#) Peter C. Smith, 2015-09-30 Aviation and maritime historian Peter C. Smith reveals how both Allied and Axis powers used World War I era aircraft in *Combat Biplanes of World War II*. The era of the combat biplane is usually thought to have been between 1914 and 1938. By the outbreak of World War II, most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces, both in bomber and fighter capacities. Yet despite this, many biplanes did still survive, both in front line service and in numerous subsidiary roles, and not just as training machines but as fully operational warplanes. Thus in 1939, the majority of major European powers still retained some, albeit few, biplane aircraft. Great Britain had the bulk of such obsolescent machines, including the Gladiator, Swordfish, Walrus, Vildebeeste, and Audax, while the inferior Albacore, meant to replace the Swordfish, had yet to enter service. Germany still managed to conduct missions in which biplanes like the He 50, He 51, and Hs 120 excelled. Both France and Italy had active biplanes. Mussolini's Regia Aeronautica attached great importance to the type as a fighter aircraft as late as 1941, while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond. By the time Japan and the United States entered the war two years later, they had mainly rid themselves of biplanes, but even here a few specialized types lingered on. *Combat Biplanes of World War II* describes many of these gallant old warriors, representing the author's own personal selection from a surprisingly large range of aircraft that, despite all predictions, fought hard and well.

**Aviation Machinist's Mate R 3 & 2** United States. Bureau of Naval Personnel, 1970 *The Avro Shackleton* Jason Nicholas Moore, 2023-09-17 Long ranged maritime reconnaissance aircraft were a part of British wartime strategy since the First World War in the form of flying boats. During the Second World War, the flying boats were increasingly replaced by land based aircraft such as the American Lend Lease Flying Fortresses and Liberators. After the war, these aircraft were replaced by a purpose built aircraft, the Avro Shackleton, which traced its ancestry through the Lincoln and Lancaster all the way back to the early Second World War bomber, the Manchester. The road from the Manchester to the Shackleton was a long one, and it is described comprehensively. The Shackleton itself went through two major changes, from the MR 1 to the MR 2, then from the MR 2 to the MR 3. Along with a detailed technical description of the Shackleton and its weaponry, photographs and accurate colour profiles accompany the text to illustrate the Shackleton. This aircraft is compared and contrasted with its post war piston engined counterparts. Its former use with the United Kingdom and South Africa is also described. The current survivors, especially an MR 2 WR963 in the United Kingdom and an AEW 2 WL790 in the United States.

are described in great detail      **Aviation Maintenance Administrationman 3 & 2** United States. Bureau of Naval Personnel, 1967      Soviet Bombers of the Second World War Jason Nicholas Moore, 2019-09-08 Soviet bombers were a varied lot during the Second World War ranging from single engined biplanes such as the 1920 s era Polikarpov U 2 to the excellent and modern twin engined Tu 2 medium bomber Although the use of four engined strategic bombers was mostly limited to use of the huge Pe 8 bomber the Soviets used many other aircraft for both strategic and tactical bombing As the bombers of the Red Air Force were mainly tasked with supporting the Red Army most of the bombers were used for tactical bombing attacking tanks troop convoys trains and airfields This book will deal with both strategic bombers and tactical bombers but will concentrate on the smaller tactical bombers as this is where the Red Air Force s emphasis lay Such types as the Il 4 the Su 2 the aforementioned Tu 2 and the most important bomber of all the Il 2 Shturmovik attack bomber will be described in great detail including not only details on the aircraft themselves but how they were deployed in combat The one truly strategic bomber the Pe 8 will not be forgotten and neither will the comparatively tiny U 2 biplane which was so effective in its use as a night time nuisance raider that the Germans copied the tactic wholesale Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers
